COAGULATOR, ko-ag'u-la-tur, *s.* That which causes coagulation.

COAGULUM, ko-ag'u-lum, *s.* Rennet; curd; the clot of blood, separated in cooling.

COAK.—See Coke.

COAL, kole, *s.* (*kohle*, Germ.) A mineral of vegetable origin, found embedded generally in strata of various thicknesses, usually accompanied with layers of shale, sandstone, and sometimes ironstone. Mineral coal appears to have been produced by a long continued decomposition of wood or wood-coal, by which 9 atoms of carbonic acid, 3 of water, and 3 of carburetted hydrogen, have been separated; the formula of wood being C^{36}, H^{22}, O^{22}; and that of splint and cannel coal C^{24}, H^{13}, O. Coking coal, according to Liebig, is C^{20}, H^{9}, O, which is cannel coal minus C^{4}, H^{4}, the constituents of olefiant gas. This explains the occurrence of fire-damp or carburetted hydrogen in coal mines; whereas, in mines of wood coal, carbonic acid or choke-damp alone occurs. A chemical change is in continual operation in beds of coal; and to the removal in the form of carburetted hydrogen in the long lapse of ages we attribute the production of anthracite, which is nearly pure carbon. The coal of the tertiary strata is generally lignate, wood or brown coal; and anthracite occurs chiefly in the oldest carboniferous deposits, or in situations where subterranean heat has expelled its volatile portion by the generation of carburetted hydrogen gas. *Coal formation*, or *carboniferous formation*, a series of deposits consisting of coal, limestone, ironstone, sandstone, and shales of various kinds, estimated in Scotland at an entire thickness of twelve hundred yards or more, and containing in East Lothian and Fifeshire about one hundred and forty feet of workable coal, in from sixty to seventy seams.—*See Landell's and Craig's Surveys in Transactions of the Highland Society, and Milne's account of the Coal Fields of East Lothian.* The coal fields of England are numerous, and contain fewer beds than the Scottish, but they are not so disrupted; and the coal, particularly that of Newcastle and Durham, is of superior quality. *Coal-gas*, carburetted hydrogen-gas, produced by the distillation of coal, and now generally used in lighting streets, houses, &c. *Coal-tar*, tar produced in the distillation of coal. *Coal-plants*, plants, the remains of which are found in the strata of the coal formation, and from the wood of which coal itself has been produced. Bronguiart has figured upwards of three hundred species. They are often in a state of high preservation, exhibiting the most delicate nervures of the leaves, and cortical markings of the stems.

COALESCE, ko-a-les', *v. n.* (*coalesco*, Lat.) To grow together; to join; to unite in masses by spontaneous approximation; to unite in interest or affection.

COALESCENCE, ko-a-les'ens, *s.* The act of coalescing; concretion; union.

COALESCENT, ko-a-les'ent, *a.* Joined; united.

COALITION, ko-a-lish'un, *s.* (*coalesco*, Lat.) Union in a body or mass; conjunction of separate parts in close union.

COALITIONER, ko-a-lish'shun-ur, *s.* One who joins a coalition.

CO-ALLY, ko'al-li, *s.* A joint ally.

COALY, ko'le, *a.* Containing coal; like coal.

COAL-YARD, kole'yärd, *s.* An enclosure set for the deposit or sale of coal.

COAMINGS, koo'mingz, *s.* In a ship, the frame ing a border round the hatches, and raising above the rest of the deck.

COAPTATION, ko-ap-ta'shun, *s.* (*con*, and make fit, Lat.) The adjustment or adapta parts to each other.

COLOR, } of bodies to the eye; tint; hue; die; freshness; representation of anything superficially examined; concealment; palliation; excuse; pretence; false show; kind; species; character;—*plural*, a standard; an ensign of war. In Natural Philosophy, it is that property in bodies, which, when acted upon by the rays of light, impresses us through the medium of vision, with those sensations which we denominate colour. Light, although apparently white or colourless, is capable of being separated into seven tints or hues, red, orange, yellow, green, blue, indigo, and violet, such as we naturally witness in the rainbow. These seven colours were designated by Newton *primitive colours*. It is now, however, determined that the primitive colours consist only of three—red, yellow, and blue, by the various combinations of which the other tints are produced; as may be easily proved by mixing red with yellow, thus producing orange; or yellow with blue, thus producing green. If a substance be so constituted that it absorbs none of the rays of light, it will appear white; but if it absorbs all the rays of light, it will appear black; and if it absorbs all the rays but one, it will appear of the colour of the ray which it rejects. *Accidental colours*, if we look with one eye intently upon any coloured spot, such as a piece of wax upon a sheet of white paper, and then turn the same eye to another part of the paper, a similar spot, but of a different colour, will be seen. *Adjective colours*, in Dyeing, such colours as will not unite with the material to be dyed without a mordant. *Prismatic colours*, the colours into which the rays of light are decomposed or refracted through a prism, known as

Newton's seven primitive colours. *Substantive colours*, in Dyeing, such colours as unite immediately with the material to be dyed without a mordant. In Heraldry, the colours are thus distinguished—red, *gules:* blue, *azure;* black, *sable;* green, *vert*; purple, *purpule;* yellow, *or*, (gold); white, *argent*, (silver);—*v. a.* to mark or cover with some hue or dye; to dye or tinge; to paint; to palliate; to excuse; to dress in specious colours, or fair appearances; to make plausible; to exaggerate;—*v. n.* to blush.

In Mathematics, *an equation of condition* is an equation which will not always be true, but requires certain conditions to be satisfied, and is distinguished from an *identical equation*, or one which is true independently of all conditions;—*v. n.* to make terms; to stipulate;

Pay me back my credit,
And I'll *condition* with you.—*Beau. & Fl.*

—*v. a.* to contract; to stipulate; to agree.—Seldom used as a verb.

CONDITIONAL, kon-dish'un-al, *a.* By way of stipulation; not absolute; made with limitations granted on particular terms, conditions, or stipulations. In Grammar and Logic, expressing some condition or supposition;—*s.* a limitation.—Obsolete as a substantive. *Conditional proposition*, in Logic, a proposition which asserts the dependence of one categorical proposition on another; as, 'If ye love me, ye will keep my commandments.' The proposition from which the other results is termed the *antecedent*, the resulting proposition the *consequent*. *A conditional syllogism* is one in which the reasoning depends on a conditional proposition. It is of two kinds—constructive and destructive. Constructive: as, 'If A = B, then C = D; but A = B, therefore C = D.' Destructive: as, 'If A = B, then C = D; but C is not equal to D, therefore A is not equal to B.' The connection between the antecedent and the consequent of a conditional proposition is called the *consequence*.

CONDITIONALITY, kon-dish-un-al'e-te, *s.* The quality of terms being conditional; limitation by certain terms or stipulations.

CONDITIONALLY, kon-dish'un-al-le, *ad.* With certain limitations; on particular conditions or stipulations.

CONDITIONARY, kon-dish'o-na-re, *a.* Stipulated.

CONDITIONATE, kon-dish'un-ate, *v. a.* To qualify; to regulate;—*a.* established on certain terms or conditions; conditional.

CONDITIONED, kon-dish'und, *a.* Having certain qualities, good or bad.

The dearest friend to me, the kindest man,
The best *conditioned.*—*Shaks.*

Copper, kop'pur, *s.* (*koper*, Dut. *cuprum*, Lat.; name said to be derived from the island of Cyprus.) A metal of a reddish colour, and capable of receiving a good polish; when rubbed it emits a disagreeable smell. Its preparations are all poisonous. Copper is malleable in both the hot and cold states, and can be beat into very thin plates. Native copper consists of 97.8 per cent. of pure copper, with a trace of gold and iron. It is of a reddish-yellow colour, with a tinge of brown; often tarnished black externally. It occurs in cubical and octahedral crystals; often in macules; also capillary, dentritic, or in thin plates filling crevices, and

massive: when isolated and rubbed it acquires vitreous electricity: sp. gr. 8.5—8.9; its equivalent, 31.6; symbol, Cu.

The chemical compounds of copper and their formulæ are as follow:—

Red or Dinoxide,	2Cu	+ O
Black or Protoxide,	Cu	+ O
Superoxide,	Cu	+ 2O
Chloride,	Cu	+ Cl
Dichloride,	2Cu	+ Cl
Diniodide,	2Cu	+ I
Disulphuret,	2Cu	+ S
Sulphuret,	3Cu	+ S
Triphosphuret,	C	+ 3P
Subsesqui-phosphuret,	Cu	+ 2P

COPPER, *Bisulphuret of*, or *Covelline*, occurs in black or greenish-blue incrustations, having the appearance of spiders' webs; deposited round the fumeroles of the crater of Mount Vesuvius. It consists of copper, 66; and sulphur, 32.

COPPER, *Black; Copper Black*, or *Melaconise*, is of a black or blackish-brown colour, friable and heavy; never crystalized. It consists of copper, 79.83; and oxygen, 20.17.

COPPER, *Blue; Azurite, Azure Copper Ore*, or *Prismatic Azure Malachite*, is of an azure or Berlin-blue colour, with sometimes a tinge of black. It occurs crystalized in a great variety of forms, and consists of deutoxide of copper, 70; carbonic acid, 24; water, 6: sp. gr. 3.5—3.77.

COPPER, *Emerald*.—See Dioptase.

COPPER, *Grey; Tetrahedral Copper Glance*, or *Panabase*, is of a steel-grey or iron-black colour, and contains about 40 per cent. of copper, and variable quantities of arsenic, iron, sulphur, silver, and sometimes antimony: sp. gr. 4.4—5.2. Copper pyrites, the most abundant ore of copper, is of a brass-yellow colour, rather deeper than that of iron pyrites, from which it is easily distinguished by its yielding to the knife. The crystals are tetrahedrons, having the solid angles replaced.

COPPER, *Green Carbonate of*, or *Fibrous Malachite*, is of various shades of green, and occurs in slender fibres, which are sometimes fasiculated, and sometimes stellated. It contains about 70 per cent. of copper, 20 of carbonic acid, and 8 or 9 of water.

COPPER, *Hydrous Phosphate of*, occurs both massive and crystalized. The colour of the massive varieties is emerald-green, striated, with blackish-green. The crystals are generally dull, and of a blackish-green colour externally, and, by transmitted light, emerald green. It consists of phosphoric acid, 21.687; oxide of copper, 62.847; water, 15.454: sp. gr. 4.2—4.3.

COPPER, *Muriate of*.—See Atacamite.

COPPER, *Octahedral Arseniate of*, or *Lenticular Copper Ore*, is of a sky-blue, smalt-blue, deep grass, or verdigris-green colour, and is crystalized in obtuse rectangular prisms. It consists of arsenic acid, 49.00; oxide of copper, 14.00; and water, 35.00. A specimen analyzed by Wachtbacher contained oxide of copper, 35.19; arsenic, 20.79; water, 22.24; alumina, 8.03; oxide of iron, 3.41; phosphoric acid, 3.61; silica, 4.04.

COPPER, *Oblique Prismatic Arseniate of*, or *Radiated Acicular Olivenite*, is of a bluish-black, passing into a deep black colour; occurs, though rarely, in oblique rhomboidal prisms, often transparent, and of a beautiful greenish-blue colour by transmitted light. It is composed of oxide of copper, 54; arsenic acid, 30; water, 16; sp. gr. 4.1—4.28.

COPPER, *Phosphate of*, or *Diprismatic Olive Malachite*, occurs crystalized, and in radiated masses; externally the crystals are greenish or blackish-green, resplendent with uneven surfaces. It consists of phosphoric acid, 28.7; oxide of copper, 63.6; water, 7.4.

COPPER PYRITES, *Octahedral* or *variegated*, occurs both massive and crystalized, of a copper-red or tombac-brown colour; in the crystalized varieties the latter colour prevails, with an irridescent tarnish, generally blue, sometimes yellow. It contains from 19 to 23 per cent. of sulphur; 7 to 18 per cent. of iron; and from 58 to 61 of copper.

COPPER, *Red Oxide of*, or *Octahedral Copper Ore*, occurs crystalized in the form of the octahedron and its varieties, and is of a red, sometimes crimson-red colour. It contains about 70 per cent. of copper, and 10 of oxygen; sp. gr. 5.6—6.1.

COPPER, *Rhomboidal Arseniate of, Prismatic Copper*, or *Copper Mica*, is of a grass-green or emerald-green colour. It occurs in six-sided tabular crystals, of which the lateral planes are trapeziums. Its constituents are from 39 to 58 per cent. of oxide of copper; 21 to 43 of arsenic acid; water, 17 to 21; sp. gr. 2.5—2.6.

COPPER, *Right Prismatic Arseniate of, Prismatic Olive Malachite, Acicular Olivenite*, or *Acicular Arseniate of Copper*, &c., is of an olive-green, pistachio-green, or black-green colour, passing into liver-brown and wood-brown. It occurs in prismatic crystals. Its varieties are capillary or amianthiform arseniate of copper, and hæmatitic or wood arseniate of copper. It is composed of about 60 per cent. of copper, and 40 of arsenic acid, sometimes associated with water and phosphoric acid.

COPPER, *Silenuret of*, or *Berzeline*, occurs in masses having an impalpable composition, and of a silver-white colour. It consists of copper, 64; and silenium, 40.

COPPER, *Sulphuret of, Vitreous Copper*, or *Copper Glance*, is of a lead or iron-grey colour. It occurs crystalized in regular six-sided prisms. It contains about 80 per cent. of copper, 12 to 20 of sulphur, and a little iron.

COPPER, *Sulphate of, Blue Vitriol*, or *Cyanose*, is of a deep sky-blue colour, passing sometimes into bluish-green; occurs massive, stalactitic, and pulverent. It consists of oxide of copper, 32.13; sulphuric acid, 31.57; water, 36.30. A specimen from Mexico, analyzed by Berthier, contained oxide of copper, 66.2; sulphuric acid, 16.6; water, 17.2.

COPPER, *Velvet Blue*, is a compound of oxide of copper, sulphuric acid, silica, and zinc. It consists of short delicate fibres of a smalt-blue colour, frequently grouped in spherical globules, and produced by the divergement of the capillary crystals from a centre.

COPPER, kop'pur, *a.* Consisting of copper;—*v. a.* to cover with copper.

COPPERAS, kop'pur-as, *s.* (*kopparosa*, Ital. *couperose*, Fr.) Sulphate of iron or green vitriol. It crystalizes into transparent rhomboidal prisms, has a strong styptic taste, and reddens vegetable blues.

COPPER BUTTERFLIES, or COPPERS.—See Lycæna.

COPPERISH, kop'pur-ish, *a.* Containing copper; resembling copper.

COPPER-NICKEL, kop'pur-nik'el, *s.* A native arsenuret of nickel, a mineral of a copper colour, found in Westphalia.

COPPER-NOSE, kop'pur-noze, *s.* A red nose.

I had as lieve Helen's golden tongue had commended Troilus for a *copper-nose*.—*Shaks.*

COPPERPLATE, kop'pur-plate, *s.* A plate of copper, flattened, smoothed, and polished, on which designs are engraved.

COPPERSMITH, kop'pur-smith, *s.* One whose occupation is to construct and manufacture articles from copper.

COPPERY, kop'pur-e, *a.* Containing copper; made of copper.

COPPICE, kop'pis, } *s.* (*coupiz*, Norm.) A wood of
COPSE, kops, } small growth; a place overgrown with short wood; a wood cut at stated times for fuel.

COPPLE-DUST, kop'pl-dust, *s.* A powder used in purifying metals.

COPPLE-STONES, kop'pl-stonze, } *s.* Boulders.—
COBBLE-STONES, kob'bl-stonze, } Which see.

COPRACRATIA, kop-ra-kra'she-a, *s.* (*kopros*, excrement, and *akrateia*, want of command, Gr.) Involuntary discharge of fæces, or excrements.

COPRINUS, kop-ri'nus, *s.* (*kopros*, Gr.) A genus of Fungi: Order, Hymenomyceti.

COPRIS, kop'ris, *s.* (*kopros*, Gr.) A genus of insects, so named from their living and burrowing in dung: Subfamily, Scarabæninæ, or True Scarabs.

COPROBIS, kop'ro-bis, } *s.* (*kopros*, and *bios*,
COPROBIUS, ko-pro'be-us, } life, Gr.) A genus of insects of the Scarab family, which live in dung: Subfamily, Scarabæninæ.

COPROLITE, kop'ro-lite, *s.* (*kopros*, and *lithos*, a stone, Gr.) The petrified fæces of fishes, reptiles, or other animals. Coprolites occur abundantly in certain formations, such as the Lias and the Coal strata: the former containing those of the fish-lizards of that period, and the latter of the sauroid fishes; the other remains of teeth, scales, &c. are very abundant.

COPROLITIC, kop-ro-lit'ik, *a.* Composed of coprolites; containing coprolites.

COPROMESIA, kop-ro-me'zhe-a, } *s.* (*kopros*, and
COPROMESIS, kop-ro-me'sis, } *emesia*, vomiting, Gr.) Vomiting of fæces.

COPROPHAGA, kop-rof'a-ga, } *s.* (*kopros*, dung,
COPROPHAGANS, kop-rof'a-ganz, } and *phago*, I eat, Gr.) A section of Lamellicorn beetles, so named from their living in and upon the dung of animals.

COPROPHAGOUS, kop-ro-fa'gus, *a.* (*kopros*, and *phago*, I eat, Gr.) Feeding on excrements.

COPROPHILUS, kop-ro-fil'us, *s.* (*kopros*, and *philo*, I love, Gr.) A genus of Coleopterous insects: Family, Brachelytra.

COPROPHORIA, kop-ro-fo're-a, *s.* (*kopros*, and *phoro*, I carry away, Gr.) Evacuation of fæces.

COPROSCLEROSIS, kop-ro-skle-ro'sis, *s.* (*kopros*, and *skleros*, hard, Gr.) Induration of the fæces.

COPROSMA, kop-ros'ma, *s.* (*kopros*, and *osme*, smell, Gr.) A genus of plants: Order, Cinchonaceæ.

COPROTASIA, kop-ro-ta'zhe-a, *s.* (*kopros*, and *stasis*, stoppage, Gr.) Complete obstruction of the bowels.

COPSE, kops, *v. a.* To preserve underwoods.

COPSY, kop'se, *a.* Having copses.

COPTIC, kop'tic, *a.* Relating to the descendan
the ancient Egyptians, called *Copts*, or *Copth*
distinguished from the Arabians and other inh
tants of modern Egypt;—*s.* the language of
Copts.

COPTIS, kop'tis, *s.* (*kopto*, I cut.) A genu
plants: Order, Ranunculaceæ.

COPTODERA, kop-tod'e-ra, *s.* (*kopto*, I split,
the summit or peak, Gr.) A genus of Co
terous insects: Family, Carabidæ.

COPULA, kop'u-la, *s.* (Latin, a bond or tie.)
Logic, that part of a proposition which affirm
denies the predicate of the subject.

COPULATE, kop'u-late, *v. a.* (*copulo*, Lat.)
unite; to conjoin; to link together;—*n.*
come together sexually;—*a.* joined.

COPULATION, kop-u-la'shun, *s.* (*copulatio*, L
Union of the two sexes; coition.

COPULATIVE, kop'u-lay-tiv, *a.* That unite
couples. *Copulative propositions*, in Logic,
where the subject and predicate are so linked

COQUETRY, ko-ket're, *s.* Affectation of amorous advances; desire of attracting notice.

COR, kor, *s.* The measure of a pottle; an old Hebrew measure.—Obsolete.

Ye shall offer the tenth part of a bath out of the *cor*, which is an homer of ten baths.—*Ezek.* xlv. 14.

In Anatomy, the heart. *Cor Caroli*, a constellation in the northern hemisphere, situated between the Coma Berenicis and Ursa Major, so termed by Dr. Halley in honour of King Charles I. of England. *Cor Hydræ*, a fixed star of the first magnitude in the constellation Hydra. *Cor Leonis*, or Regulus, a fixed star of the first magnitude in the constellation Leo.

CORACIAS, ko-ra'she-as, *s.* (*korax*, a crow, Gr.) The Rollers, a genus of Asiatic birds, allied to jays: Family, Corvidæ.

CORACINA, ko-ras'e-na, *s.* (*korax*, a crow, Gr.) A genus of birds, separated from the true crows by Vieillot; distinguished from the other species of the Coracinæ, or fruit crows, by the front and base of the bill being protected by short thick feathers.

CORACINÆ, ko-ras'e-ne, *s.* (*coracina*, one of the genera.) The Fruit Crows, a subfamily of the Corvidæ, or Crow family, natives of South America: Tribe, Conirostres.

CORACLE, kor'a-kl, *s.* (*cwrwgle*, Welsh.) A boat used in Wales by fishermen, made by drawing leather or oil-cloth upon a frame of wicker work.

CORACO-BRACHIALIS, kor'a-ko-bra-ke-a'lis, *s.* The Coraco-brachial muscle. In Anatomy, a muscle situated on the interior and superior part of the arm, and extending from the *coracoid process* of the scapula to the middle of the internal border of the *os brachii*. Its use is to raise the arm upwards and forwards.

CORACOID, kor'a-koyd, *a.* (*korax*, a raven, and *eidos*, resemblance, Gr.) Resembling a raven's beak. In Anatomy, certain processes are so designated, as the *coracoid processes* of the scapula; the *coracoid ligament* (*ligament corcoidien*, Fr.), a minute fibrous band, by which the superior border of the scapula is converted into a foramen, for the transit of the supra-scapular branch of the axillary artery.

CORACO-RADIAL, kor'a-ko-ra'de-al, *a.* An epithet applied by Winslow to the Biceps flexor cubiti muscle, as attached to the *coracoid process* of the scapula and the radius.

CORAL, kor'al, *s.* (*korallion*, probably from *kore*, a daughter, and *als*, the sea, Gr.) A calcareous marine production secreted by polypi.

CORALLACEOUS, kor-al-la'shus, *a.* Like coral, or partaking of its qualities.

CORALLE, ko-ral'le, *s.* A genus of serpents, allied to the Boas: Family, Serpentia.

CORALLIA, ko-ral'le-a, *s.* A family of Corticiferous Polyparia, in which the animals are hydriform, with internal ovaria, and ten tentacula irregularly scattered on the surface of a compound polyparium, formed externally of a living gelatinose-cretaceous substance, and internally of a solid, horny, or calcareous axis, concentrically laminated, with a large base, by which they are attached to foreign substances.

CORALLIFERI, kor-al-lif'fer-e, *s.* (*korallion*, and *fero*, I bear, Gr.) In Zoology, an order of Zoophites, the species of which were long considered as marine plants; the calcareous secretions of minute animals called polypi, more or less analogous to Actinæ or Hydræ, connected by a common body, and nourished in common, so that what is eaten by one goes to the nutrition of the general fabric, and of all the other polypi. Their volition seems also to be in common, at least in the free species, such as the Pennatulæ, which are seen swimming by the contractions of their stems, and the combined motions of their polypi.

CORALLIFORM, kor'al-le-fawrm, *a.* Shaped like coral.

CORALLINA, kor-al-li'na, *s.* Corallines, a genus of the Pseudozoaria, in which the stem and branches are flabelliform; trichotomous, with distinct articulations, the upper ones being compressed and dilated; the pores obscure.

CORALLINE, kor'al-line, *a.* (*corallin*, Fr. *corallino*, Ital.) Composed of coral; resembling coral; of the colour of coral;—*s.* a zoophyte, in which each polypus is contained in a calcareous or horny shell without any central axis; also, the animal which secrets coral; a polypus.

CORALLIUM RUBRUM, kor-al'le-um rŭ'brum, *s.* Red coral. The Gorgonia nobilis of Linnæus, a genus and species of coral, a native of the Mediterranean, the cells of which are immersed in a thin external fleshy ligament; the axis is thick, strong, solid, striated, ramified, and fixed by a broad basis: Family, Corallia.

CORALLODENDRON, kor-al-o-den'drun, *s.* (*korallion*, and *dendron*, a tree, Gr.) The Coral-tree.—See Erythrina.

CORALLOID, CORALLOIDAL, kor'al-loyd, kor-al-loyd'al, *a.* (*coral*, and *eidos*, form, Gr.) Resembling the form of coral.

CORALLORHIZA, kor-al-lo-ri'za, *s.* (*korallion*, and *rheza*, a root, Gr. in reference to its branched roots, which have the resemblance of coral.) Coral root, a genus of plants, one of the species of which, *C. innata*, the Ophrys corallorhiza of Linnæus, is found in marshy umbrageous woods in Scotland: Order, Orchidaceæ.

CORAL-RAG, kor'al-rag, *s.* In Geology, a calcareous highly coralliferous deposit in the neighbourhood of Calne, England, forming a member of the Oolitic formation.

CORAL-ROOT.—See Corallorhizo.

CORAL-TREE.—See Erythrina.

CORAL-WORT, kor'al-wurt, *s.* In Botany, the common name of plants of the genus Dentaria.—Which see.

CORANT, ko-rant', *s.* A lofty sprightly dance.

CORB, kawrb, *s.* (*corbis*, Lat.) A basket used in coaleries; an ornament in a building.

CORBAN, kawr'ban, *s.* (Latin.) An alms-basket; a receptacle of charity; a gift; an alms. Among the ancient Jews, an offering which had life, in opposition to the *minchab*, or those which had not life; also, a ceremony which the Mahometans perform at the foot of Mount Ararat in Arabia, near Mecca: it consists in killing a great number of sheep, and distributing them among the poor.

CORBE, kawrb, *a.* (*courbe*, Fr.) Crooked.

CORBEILS, kawr'beels, *s.* (*corbis*, a basket, Lat.) In Architecture, sculptured baskets of flowers or fruit, sometimes placed on the heads of caryatides. The term is also applied to the bell of the Corinthian capital. In Fortification, little baskets of earth set upon the parapets, to shelter the men in firing on the besiegers.

CORBELS, kawr'bels, *s.* In castellated and Gothic edifices, a row of stones projecting from the wall to support the parapet, serving in the place of brackets or modillions; also, applied to a horizontal row of stones and timber in a wall or vault, to sustain the floor or roof. *Corbel* is sometimes used to denote a niche or hollow in a wall, for the reception of a bust or statue; also, the vase of the Corinthian capital, so called from its resemblance to a basket. *Corbel table*, a series of semicircular arches, which cut one another in a wall, supported by timbers with their ends projecting out, and carved into heads, faces, lions' heads, &c.

CORBIS, kawr'bis, *s.* A genus of bivalved Mollusca, the shell of which is transversely roundish; the bosses curved in different directions; cardinal teeth, $\frac{2}{2}$; lateral, remote; short, $\frac{1}{1}$.

CORBULA, kawr'bu-la, *s.* (Latin, a little pannier or basket.) A genus of bivalve-shelled Mollusca, in which the shell is inequivalve and ovate; the umbones central; one more prominent than the other; valves not gaping; cardinal teeth $\frac{1}{1}$, bearing the ligament: Family, Myadæ.

CORBY, kawr'be, *s.* A raven.—Obsolete.

CORCHORUS, kawr'ko-rus, *s.* (*koreo*, I purge, and *kore*, the pupil, Gr. in reference to the purgative qualities of *C. oliterius.*) A genus of small shrubs or herbs, with simple serrated leaves, covered with simple or stellate hairs, and having a small yellow corolla.

CORD, kawrd, *s.* (*corde*, Fr. *cord*, Welsh.) A rope; a string composed of several strands or twists; a measure for firewood, so called because it was anciently measured by a cord. Its dimensions are said to be eight feet in length, four feet in height, four feet in breadth, and its weight ten cwt. It is equal to 1000 billets·—*v. a.* to bind or fasten with a cord.

CORDAGE, kawr'dij, *s.* (Spanish and French.) A general term for the running rigging of a ship; also for the rope which is kept in reserve to supply the place of such as may be rendered unserviceable; a quantity of cords or ropes.

CORDATE, kawr'date, } *a.* (*cordatus*, Lat.) In
CORDATED, kawr'day-ted, } Botany, having the shape of a heart, as represented on a card; when the word is joined by a hyphen to another term, it signifies between heart-shaped and that form indicated by the term to which it is linked: as, cordate-reniform, cordately-reniform, cordate-triangular, cordate-roundish, cordate-oblong, cordate-sagittate, cordately-sagittate, cordate-auriculate, having auricles at the base, so as to give the leaf the figure of a heart; cordate-orbicular, cor
ceolate, cordate-peltate.—See the latter
CORDATELY, kawr'date-le, *ad.* In a cord
ner.
CORDED, kawr'ded, *a.* Bound with co
rowed. In Heraldry, a cross *corded*, i
wound or wrenched about with cords,
made of two pieces of cord.
CORDELIER, kawr-de-leer', *s.* (French.)
ciscan friar; so named from the cord wh
him for a cincture.
CORDIA, kawr'de-a, *s.* (in memory of Eur
dius, a German botanist.) A genus o
shrubs with drupaceous fruit, and bifid
tomous style: Type of the order Cordia
CORDIACEÆ, kawr-de-a'se-e, *s.* (*cordia*,
genera.) A natural order of Exogeno
consisting of trees with harsh, alternate
leaves, without stipules, and panniclе
with minute bracts; an inferior four
toothed calyx, usually ribbed; a mon
four or five-cleft, regular, imbricated co
free stamens; axile placentæ; leafy
folded longitudinally; fruit drupaceous;
dulous. Placed by Lindley in his Solan

IVE.—See Correlative.

IDEÆ, ko-re-op-sid'e-e, *s.* A tribe of eæ, or Composite plants, having the genus sis for its type.

IS, ko-re-op'sis, *s.* (*koris*, a bug, and *opsis*, lance, Gr. from the seed having much the nce of a bug.) A genus of Composite Tribe, Coreopsideæ.

A, ko-re'thra, *s.* (*korethron*, a besom, Gr.) s of Dipterous insects: Family, Nemocera.

ko're-us, *s.* A genus of Hemipterous Family, Geocorisæ.

WRF', *s.* A basket used in raising or carry- l or other minerals in mines.

OUS, ko-re-a'shus, *a.* (*coriaceus*, Lat.) ing of leather, or resembling leather; ap- Botany to leaves, capsules, &c., when of a or parchment-like appearance.

DER.—See Coriandrum.

ORIDÆ, ko-re-an'dre-de, } *s.* A tribe of DREÆ, ko-re-an'dre-e, } umbelliferous of which the genus Coriandrum is the type.

DRUM, ko-re-an'drum, *s.* (*koris*, a bug, Gr. reece to the fetid smell of the leaves.) Co- , a genus of umbelliferous annual plants. eds of *C. sativum* are used by distillers in ing spirits, and by confectioners for incrust- ith sugar. They are recommended as car- ve and stomachic. They are also used to the taste of senna, and in spices, as currie r, &c.

IA, ko-re-a're-a, *s.* (*corium*, a hide, Lat. from *rtifolia* being used in tanning leather.) A of shrubs: Type of the natural order Cori- e.

IACEÆ, ko-re-a-ri-a'se-e, *s.* (*coriaria*, the nus.) A natural order of Hypogenous Exogens, belonging to the Rutal alliance of Lindley. It consists of a few species of shrubs with somewhat tetragonal opposite branches; leaves opposite, simple, ribbed entire; buds scaly; racemes terminal and axillary; calyx companulate, five-parted, ovate; petals five (according to Lindley—wanting according to De Candolle); stamens ten, hypogenous; five between the outer lobes of the calyx and angles of the ovary, and the other five between the inner lobes of the calyx and the furrows of the ovary; filaments filiform; anthers oblong and two-celled; stigmas five, long, awl-shaped, rising from the top of the ovary; carpels five; style wanting; seed pendulous; fruit poisonous: natives of the south of Europe, Chili, Peru, New Zealand, and Nepaul. Two of the species, *C. myrtifolia* and *rucifolia*, are used in dyeing black.

CORICUS, kor'e-kus, *s.* (*korikos*, delicate, Gr.) The Sublets, a genus of fishes: Family, Labridæ.

CORINE, kor'e-ne, *s.* A genus of Gelatinous polypi, which have a fixed stem terminated by an oval body, of a firmer consistence than that of the Hydræ, open at the summit, and completely covered with little tentacula: Family, Gelatosi.

CORINTH, kawr'in*th*, *s.* (from the city of that name in Greece.) The ancient name of the *currant*.

CORINTHIAC, ko-rin'*the*-ak, *a.* Relating to Corinth.—Obsolete.

CORINTHIAN, ko-rin'*the*-an, *a.* Pertaining to Corinth. *Corinthian order*, in Architecture, one of the five orders, the capital of which is a vase elegantly covered with an abacus, and surrounded by two tiers of leaves, one above the other, from among which stalks spring out, terminating at their summits in small volutes at the external angles and centres of the abacus.

CORINTHIANS, ko-rin'*the*-anz, *s.* The name of two books in the New Testament, addressed by St. Paul to the church at Corinth.

CORIOCELLA, ko-re-o-sel'la, *s.* A genus of Mollusca, with a thin flexible and membranous univalve shell.—Family, Haliotidæ.

CORIS, ko'ris, *s.* (meaning unknown.) A genus of plants: Order, Primulaceæ.

CORISPERMUM, ko-re-sper'mum, *s.* (*koris*, a bug or tick, and *sperma*, a seed, Gr.) Tick seed, a genus of annual plants: Order, Chenopodaceæ.

CORIUDO, kor-e-u'do, *s.* The common Turtle, a genus of reptiles belonging to the family Chelonidæ, the Testudo mydas of Linnæus. It is distinguished by its greenish-coloured plates, which are thirteen in number. It is found from six to seven feet long, and weighs from seven to eight cwt. EA, krus-ta'she-a, } *s.* (*crusta*, a hard EANS, krus-ta'she-anz, } covering, Lat.) of the animal kingdom, consisting of arti- animals with articulated feet, respiring as of branchiæ, protected in some by the of a shell, and external in others, but that enclosed in special cavities of the body, ich receive air from openings in the surface skin. The Crustacea are apterous or de- f wings, are furnished with compound eyes, rarely with ocelli, and usually with four e; with the exception of the Pœcilopoda, ve three pair of jaws, the two superior ones, ted by the name of mandibles, included; foot-jaws, the last four of which, how- many species, become true feet: they are d with ten feet, properly so called, all of re terminated by a single small nail. The as in insects, presents a labrum and a li- t no lower lip, properly so called, or com- to that of the latter. Their envelope is y calcareous and solid; they change their veral times, and usually preserve their e form and natural activity. They are rous and aquatic. Cuvier divides the ea into two sections, the Malacostraca and omostraca.—Which see.

EOLOGY, krus-ta-se-ol'o-je, *s.* (*crusta*, a hard covering, Lat. and *logos*, a discourse, The description of Crustaceous animals.

EOUS, krus-ta'shus, *a.* Pertaining to ea; having a soft articulated shell.

EOUSNESS, krus-ta'shus-nes, *s.* The qua- aving jointed shells.

OGICAL, krus-ta-lod'je-kal, *a.* Relating alogy.

OGIST, krus-tal'o-jist, *s.* One versed in nce of Crustaceous animals.

OGY, krus-tal'o-je, *s.* Same as Crustaceo- Which see.

ED, krus'ta-ted, *a.* Covered with a crust.

ION, krus-ta'shun, *s.* An adherent cover- incrustation.

CRUSTILY, krus'te-le, *ad.* Peevishly; snappishly; harshly.

CRUSTINESS, krus'te-nes, *s.* The quality of being crusty; peevishness; moroseness.

CRUSTULA, krus'tu-la, *s.* (dim. of *crusta*, a shell, Lat.) In Pathology, an effusion of blood under the tunica conjunctiva, from a bruise or other cause.

CRUSTY, krus'te, *a.* Covered with a crust; like a crust; of the nature of a crust; peevish; snappish; morose.

CRUT, krut, *s.* The rough part of oak bark.

CRUTCH, krutsh, *s.* (*cricc*, Sax. *croccia*, Ital.) A support used by cripples; the term is used in the following passage for old age;

> Beauty doth varnish age, as if new born,
> And gives the *crutch* the cradle's infancy.—*Shaks.*

CRYOPHORUS, kri-of'fo-rus, *s.* (*kryos*, cold or ice, and *phoreo*, I bear, Gr.) An instrument for showing the relation between evaporation at low temperatures and the production of cold.

CRYOSOPHYLA, kri-o-sof'e-la, *s.* (*kryos*, and *phileo*, I love, Gr.) A genus of plants: Order, Palmaceæ.

CRYPHÆA, kri-fe'a, *s.* (*kryphaios*, secret, or concealed, Gr.) A genus of Moss-plants: Order, Bryaceæ.

CRYPHIA, kri'fe-a, *s.* (*kryphaios*, hidden, Gr. in allusion to the enclosed corollas.) A genus of plants, consisting of shrubs, natives of New Holland: Order, Lamiaceæ.

CRYPHIACANTHUS, krif-e-a-kan'*th*us, *s.* (*kryphaios*, and *akunthos*, a spine, Gr.) A genus of plants: Order, Acanthaceæ.

CRYPHIOSPERMUM, krif-e-o-sper'mum, *s.* (*kryphaios*, and *sperma*, a seed, Gr.) A genus of Composite plants: Suborder, Tubulifloræ.

CRYPSIRINA, krip-se-ri'na, *s.* (*kryptos*, concealed, and *seiren*, a siren, Gr.) A genus of birds belonging to the subfamily Glaucopinæ, or Wattle-crows.

CRYPSIS, krip'sis, *s.* (*krypto*, I conceal, Gr. the heads of the flowers being concealed in the sheaths of the leaves.) A genus of plants: Order, Graminaceæ.

CRYPT, kript, *s.* (*crypta*, Lat. from *krypto*, Gr.) The under or hidden part of a building; also, that part of churches and abbeys appropriated below to the monuments of deceased persons and the interment of the dead. *Crypt porticus*, subterranean or dark passages and galleries in the ancient Roman villas, frequently used as cool sitting-rooms.

CRYPTA, krip'ta, *s.* (Latin.) In Botany, a name given to the small round receptacles for secretion in the leaves of some plants, as in the orange and myrtle.

CRYPTADIA, krip-ta'de-a, *s.* (*kryptadios*, concealed, Gr.) A genus of Composite plants: Suborder, Tubulifloræ.

CRYPTÆ, krip'te, *s.* (*krypto*, Gr.) In Anatomy, a term applied to minute rounded lenticular hollow bodies, situated in the substance of the skin and mucous membranes, and which pour out upon the surface, from a small orifice, different fluids secreted in the interior. The *Cryptæ* keep the parts in a moist and supple state, and protect them from the irritating action of the various bodies which come in contact with them.

CRYPTANDRIA, krip-tan'dre-a, *s.* (*krupto*, and *aner andros*, a male, Gr. in allusion to the stamens being hidden by the petals.) A genus of small heath-like shrubs, natives of New Holland: Order, Rhamnaceæ.

CRYPTANGUINA, krip-tan'gwin-a, *s.* (*krypto*, Gr. *anguina*, a serpent, Lat.) A genus of plants: Order, Cyperaceæ.

CRYPTANTHUS, krip-tan'*th*us, *s.* (*krupto*, and *anthos*, a flower, Gr.) A genus of plants: Order, Bromeliaceæ.

CRYPTARRHENA, krip-ta-re'na, *s.* (*krypto*, and *arren*, a male, Gr. in reference to the hooded apex of the column which covers up the anther.) A pretty little stemless plant, with distichous leaves and neat yellow flowers: Order, Orchidaceæ.

CRYPTERONIA, krip-te-ro'ne-a, *s.* (*krypto*, and *pteron*, a wing, Gr. in allusion to the seeds being terminated by a narrow wing.) A genus of plants, consisting of a tall tree, a native of Java: Order, Celastraceæ.

CRYPTIC, krip'tik, } *a.* Hidden; secret; oc-
CRYPTICAL, krip'te-kal, } cult.

CRYPTICALLY, krip'te-kal-le, *ad.* Secretly; occultly.

CRYPTICUS, krip'te-kus, *s.* (*kryptikos*, able to conceal, Gr.) A genus of birds belonging to the Trogonidæ, or Trogon family: Tribe, Fissirostres; also, a genus of Coleopterous insects: Famil soma.

CRYPTIDÆ, krip'te-de, *s.* A family of H terous insects, in which the abdomen i petiolated, and the ovipositor exserted, an as long as the body.

CRYPTOCALYX, krip-to-ka'leks, *s.* (*krypt* ceal, and *kalyx*, calyx, Gr.) A genus o Order, Verbenaceæ.

CRYPTOCARPON, krip-to-kăr'pon, *s.* (*kry* *karpos*, Gr.) A genus of Moss-plants Bryaceæ.

CRYPTOCARPUS, krip-to-kăr'pus, *s.* (*kry* *karpos*, a seed, Gr.) A genus of plants Chenopodiaceæ.

CRYPTOCARYA, krip-to-ka're-a, *s.* (*kry* *karyon*, a nut, Gr.) A genus of plants Lauraceæ.

CRYPTOCEPHALUS, krip-to-sef'a-lus, *s.* and *kephale*, the head, Gr.) A genus of terous insects: Family, Chrysomelidæ.

CRYPTOCERUS, krip-tos'e-rus, *s.* (*krypto*, a a horn, Gr.) A genus of Hymenopteron of the section Heterogyna: Family, Acul

CRYPTOCONCHUS, krip-to-kong'kus, *s.* (*kr* *kogchle*, a shell, Gr. *conchus*, Lat.) A na by some conchologists to such of the c have their shelly plates entirely conceale investing border. The plates of the s moderate, and entirely covered with the s of the zone, each plate having two la tubular pores, the anterior one has fou Cyclobranchia.

CRYPTOCORYNE, krip-to-kor'e-ne, *s.* (*kry* *koryne*, a club, Gr.) A genus of plants Araceæ.

CRYPTOCORYNEÆ, krip-to-ko-rin'e-e, *s.* *coryne*, one of the genera.) A family of the natural order Araceæ, in which the are distinct from the pistils, which are se ing whorled round the base of the spa there combined into a many-celled ovary.

CRYPTODISCUS, krip-to-dis'kus, *s.* (*kry* *diskos*, a quoit, Gr.) A genus of Fung Ascomycetes.

CRYPTOGAMIA, krip-to-ga'me-a, *s.* (*kry* *gamia*, marriage, Gr. from the organs of cation being concealed.) The name giv Linnæan arrangement to the Cellulares tural system.—See Acotyledoneæ.

CRYPTOGAMIAN, krip-to-ga'me-an, } *a.*
CRYPTOGAMIC, krip-to-gam'ik, } to
CRYPTOGAMOUS, krip-tog'a-mus, } th
Cryptogamia.

CRYPTOGAMIST, krip-tog'a-mist, *s.* versed in cryptogamic botany.

CRYPTOGLOTTIS, krip-to-glot'tis, *s.* (*kry* *glotta*, the tongue, Gr.) A genus of pla der, Orchidaceæ.

CRYPTOGRAMMA, krip-to-gram'ma, *s.* (*kr* *gramma*, a letter or mark, Gr.) A Ferns: Order, Polypodiaceæ.

CRYPTOGRAPHER, krip-tog'gra-fur, *s.* (*kr* *grapho*, I write, Gr.) One who writes characters.

CRYPTOGRAPHICAL, krip-to-graf'fe-kal, *a* ten in secret characters.

CRYPTOGRAPHY, krip-tog'gra-fe, *s.* Th writing secret characters; ciphers; secre ters.

EPIS, krip-to-le'pes, *s.* (*krypto*, I hide, and scale, Gr. in reference to the scales in the the corolla.) A genus of East Indian shrubs: Order, Apocynaceæ.

OGY, krip-tol'o-je, *s.* (*krypto*, and *logos*, a e, Gr.) Enigmatical language.

OPHA, krip-tol'o-fa, *s.* (*krypto*, and *lophos*, Gr.) A genus of birds belonging to the ily Muscicapinæ, or Fly-catchers.

ERIA, krip-to-me're-a, *s.* (*krypto*, and a portion, Gr.) A genus of Pine-trees: Cupresseæ.

YCETES, krip-to-mi'se-tes, *s.* (*krypto*, and a mushroom, Gr.) A genus of small Fungi, n willow branches: Tribe, Ascomycetes.

EMIA, krip-to-ne'me-a, *s.* (*krypto*, and a thread, Gr.) A genus of Sea-weeds: Ceramaceæ.

YX, krip'to-niks, *s.* (*krypto*, and *onyx*, a Gr.) A genus of birds of the Grouse or ge kind, so named from the hinder toe being a claw. The head is conspicuously crested: , Tetraonidæ.

ETALUM, krip-to-pe'ta-lum, *s.* (*krypto*, and , a petal, Gr. the petals being minute and d in the calyx.) A genus of annual plants, of Chili: Order, Saxifragaceæ.

HAGOUS, krip-tof'a-gus, *s.* (*krypto*, and I eat, Gr.) A genus of minute Coleopter- ects found in fungi and on flowers: some live in damp cellars: Family, Engidæ.

HRAGMIUM, *s.* (*krypto*, and *phragma*, a Gr.) A genus of plants: Order, Acan- .

ODA, krip-top'o-da, *s.* (*krypto*, and *pous*, t, Gr.) A section of the Brachyurous, or ailed Crustacea, remarkable for a vaulted ion of the posterior extremities of their nder which their feet, except the two an- laws, can be completely retracted and con- .

ROCTA, krip-to-prok'ta, *s.* A genus of ittle quadrupeds, natives of Madagascar, something like the appearance of a cat. nnet considers it belongs to the family Vi- .

PUS, krip'to-pus, *s.* (*krypto*, and *pous*, the r.) A genus of plants: Order, Orchidaceæ.

RHYNCHIDES, krip-to-ring'ke-des, *s.* (*cryp- chus*, one of the genera.) A family of terous insects, containing above twenty ge- The insects of this family have characters mon with Cryptorhynchus, the antennæ of are short and twelve-jointed; the funiculas jointed, the first joint rather larger than the the club oval, or oblong-oval; rostrum mo- and rather arched; thorax broader than and furnished with tufts on the anterior elytra ovate, covering the abdomen; scu- distinct; legs moderate, and often armed spine beneath. Upwards of ninety species genera are natives of Britain.

RHYNCHUS, krip-to-ring'kus, *s.* (*krypto*, in, the snout, Gr.) A genus of Coleopter- sects.—See Cryptorhynchides.

SPERMUM, krip-to-sper'mum, *s.* (*krypto*, erma, a seed, Gr. from the seed, or rather d vessel, being hidden in the involucrum.) A of tropical weeds: Order, Valerianaceæ.

SPHÆRIA, krip-tos-fe're-a, *s.* (*krypto*, and *sphairo*, a sphere, Gr.) A genus of Fungi: Sub-order, Gasteromycetes.

CRYPTOSTEGIA, krip-to-ste'je-a, *s.* (*krypto*, and *stego*, I cover, Gr. in reference to the scales in the throat covering the anthers.) A genus of plants, with opposite leaves, and large showy purple flowers, natives of the East Indies: Order, Asclepiadeæ.

CRYPTOSTEMMA, krip-to-stem'ma, *s.* (*krypto*, and *stemma*, a crown, Gr. the scaly crown of the grains being involved in wool.) A genus of tender annuals, natives of the Cape of Good Hope: Order, Compositæ.

CRYPTOSTYLIS, krip-tos'te-lis, *s.* (*krypto*, and *stylos*, a style, Gr.) A genus of plants: Order, Orchidaceæ.

CRYPTOTÆNIA, krip-to-te'ne-a, *s.* (*krypto*, and *teinia*, vitta, Gr. from the vittæ of the mericarps being hidden by a pericarp.) A genus of plants, consisting of erect herbs with white flowers: Order, Umbellaceæ.

CRYPTOTHECA, krip-to-*the*'ka, *s.* (*krypto*, and *theca*, a cover, Gr. from the capsule being hidden by the calyx.) A genus of plants, consisting of suffruticose branched herbs, with minute axillary flowers, natives of Java: Order, Lythraceæ.

CRYPTURUS, krip-tu'rus, *s.* (*krypto*, and *oura*, a tail, Gr. from the tail feathers being concealed and confounded with the upper covers.) A genus of birds of the Grouse kind, natives of tropical America: Family, Tetraonidæ.

CRYPTUS, krip'tus, *s.* A genus of Hymenopterous insects: Tribe, Ichneumonidæ.

CRYSTAL, kris'tal, *s.* (*krystallos*, Gr. *crystallus*, Lat. probably from *kryos*, ice, and *sello*, I set, Gr.) A body formed in the processes of consolidation into a symmetrical figure, through the agency of chemical affinity, and the peculiar form of the molecules of which it is composed; glass used in the manufacture of drinking-vessels, chandeliers, &c. *Rock-crystal*, colourless transparent quartz.

CRYSTALFORM, kris'tal-fawrm, *a.* Having the form of crystal.

CRYSTALLINE, or CRYSTALINE, kris'ta-lin, or kris'-ta-line, *a.* Consisting of crystal; bright; clear; pellucid; transparent. *Crystalline heavens*, in ancient Astronomy, two orbs supposed between the *primum mobile*, or first power, and the firmament, in the Ptolemaic system. *Crystalline humour of the eye*, an extremely white transparent firm substance, formed like a glass lens, to converge rays of light, situated behind the iris, in the vitreous humour of the eye.

CRYSTALLIZABLE, kris-tal-li'za-bl, *a.* That may be crystallized; that may be formed into crystals.

CRYSTALLIZATION, kris-tal-li-za'shun, *s.* The act by which the particles of gaseous and liquid bodies, during conversion into solids, attach themselves in a certain order, so as to form symmetrical bodies or crystals. Every perfect crystal is bounded by plane surfaces, which are called its faces; the straight line formed by the intersection of two faces, is called an edge; the meeting of three or more edges in a point, forms a solid angle. Crystals are simple or compound: a simple form has all its faces equal and similar to each other; while a compound form of crystal is bounded by at least two different classes of faces.

CRYSTALLIZE, kris'tal-lize, *v. a.* To cause to concrete in crystals;—*v. n.* to be converted into a

crystal; to unite as the separate particles of a substance; to concrete.

CRYSTALLOGRAPHER, kris-tal-log'gra-fur, *s.* (*crystal*, and *grapho*, I write, Gr.) One who describes crystals, or the mode of their formation.

CRYSTALLOGRAPHIC, kris-tal-lo-graf'ik, } CRYSTALLOGRAPHICAL, kris-tal-lo-graf'fe-kal, } *a.* Relating to crystallography.

CRYSTALLOGRAPHICALLY, kris-tal-lo-graf'fe-kal-le, *ad.* In the manner of crystallography.

CRYSTALLOGRAPHY, kris-tal-log'gra-fe, *s.* The doctrine or science of crystallization.

NOTE.—The above words are usually spelled with a double *l*, in conformity with the Greek and Latin; but Webster spells them with only one *l*: either way may be considered as correct.

CRYSTALWORTS, kris'tal-wurts, *s.* A name given by Lindley to his natural order Ricciaceæ.—Which see.

CTENACANTHUS, ten-a-kan'*th*us, *s.* (*ktenion*, and *akanthos*, a spine, Gr.) A genus of fossil fishes of the Placoid order of Agassiz, found in the mountain limestone and old red sandstone formations.

CTENIPUS, te'ne-pus, *s.* (*kteis*, a comb, and *pous*, a foot, Gr.) A genus of Coleopterous insects: Family, Carabidæ.

CTENISTES, te-nis'tes, *s.* (*ktenistes*, one who combs hair, Gr.) A genus of Coleopterous insects: Family, Pselaphii.

CTENIUM, ten'e-um, *s.* (*ktenion*, a little comb, Gr.) A genus of plants: Order, Graminaceæ.

CTENOBRANCHIATA, ten-o-brang'ke-ay-ta, *s.* (*ktenion*, and *bryagchia*, gills, Gr.) A name given by some naturalists to the Pectinobranchiata of Cuvier; applied to those gasteropods which have pectinated branchiæ.

CTENODACTYLA, ten-o-dak'te-la, *s.* (*ktenion*, and *daktylos*, a finger, Gr.) A genus of Coleopterous insects: Family, Carabidæ.

CTENODES, ten'o-des, *s.* (*ktenion*, a little comb, Gr.) A genus of Coleopterous insects: Family, Cerambycidæ.

CTENODUS, ten'o-dus, *s.* (*ktenion*, and *odous*, a tooth, Gr.) A genus of fossil fishes from the carboniferous formation; also, a genus of Algæ: Order, Ceramiaceæ.

CTENOID, te'noyd, *a.* (*kteis*, or *ktenion*, a comb, and *eidos*, resemblance, Gr.) Comb-shaped; having the appearance of a comb; applied by Professor Agassiz to those fishes, the scales of which, like those of the perch, are pectinated on their posterior margin.

CTENOIDEA, te-noy'de-a, } CTENOIDEANS, te-noy'de-anz, } *s.* (*kteis*, a comb, and *eidos*, resemblance, Gr.) An order of fishes, according to the arrangement of Agassiz. They are so named from the posterior margin of the scales resembling the teeth of a comb, as in those of the perch. Fishes of this order do not appear to have existed previous to the cretaceous period.

CTENOIDEAN, te-noy'de-an, *a.* Belonging to the third order of fishes, according to the arrangement of Agassiz.

CTENOLEPIS, ten-o-le'pis, *s.* (*ktenion*, and *lepis*, a scale, Gr.) A genus of Ctenoid fishes from the Oolite formation.

CTENOMERIA, ten-o-me're-a, *s.* (*ktenion*, and *meris*, a part, Gr.) A genus of plants: Order, Euphorbiaceæ.

CTENOPHORA, te-nof'o-ra, *s.* (*ktenion*, and *phoro*, I carry, Gr.) A genus of Dipterous insects: Family, Nemoscera.

CTENOPUS, ten'o-pus, *s.* (*ktenion*, and *pous*, a foot, Gr.) A genus of Coleopterous insects: Family, Trachilides.

CTENOSTOMA, te-nos'to-ma, *s.* (*ktenion*, and *stoma*, the mouth, Gr.) A genus of Coleopterous insects: Family, Carabidæ.

CUB, kub, *s.* The young of certain animals; a young boy or girl, in a contemptuous sense; a stall for cattle; applied in the following lines to the young of a whale:

> Two mighty whales, which swelling seas had tost,

CUBATORY, ku'ba-tur-e, *a.* Recumbent; lying down.

CUBATURE, ku'ba-ture, *s.* The finding exactly the solid contents of a body.

CUBE, kube, *s.* (*kubos*, Gr. *cubas*, Lat.) In Geometry, a regular solid body, with six equal sides, each of which is a square; that is, a surface bounded by four lines equal to each other, and having four right angles. In Arithmetic, the product of a number multiplied into itself, and that product multiplied by the same number; as, $4 \times 4 = 16 \times 4 = 64$, the cube of four. *Cube-root*, the number or quantity which, multiplied by itself, and then into the product, produces the cube; 4, in the preceding example being the cube root of 64. *Cube ore*, hexahedral olivenite, or arseniate of iron, a mineral of a green colour.

CUBEB.—See Cubeba.

CUBEBA, ku-be'ba, *s.* (*cubabah*, Arab.) A genus of plants, the berries of which are called Cubebs, the Piper cubeba of Linnæus. The dried berries are of an ash-brown colour, generally wrinkled, and resembling pepper. They form a pungent warm spice, with an agreeable smell, and are used in Bengal and Java as a cure for the venereal disease.

CUBEBINE, ku'be-bine, *s.* A vegetable principle found in the seeds of Piper cubeba. It is neutral, crystallizable, and tasteless. Its formula is C^{34}, H^{17}, O^{10}.

CUBIC, ku'bik, } CUBICAL, ku'be-kal, } *a.* Having the form or properties of a cube, or that may be contained within a cube. *Cubic number*, in Arithmetic, a number produced by multiplying a number into itself twice; thus, 27 is a cubic number—because, 3 multiplied by 3, and the product afterwards by 3, makes 27.

CUBICALLY, ku'be-kal-le, *ad.* In a cubical method.

CUBICALNESS, ku'be-kal-nes, *s.* The state or quality of being cubical.

CUBIC EQUATION, ku'bik e-kwa'shun, *s.* In Algebra, that equation in which the unknown quantity rises to the third or cubic degree of power.

CUBICULAR, ku-bik'u-lar, *a.* (*cubiculum*, Lat.) Belonging to a chamber.

CUBICULARY, ku-bik'u-la-re, *a.* Fitted for the posture of lying down.

CUBIFORM, ku'be-fawrm, *a.* Having the form of a cube.

CUBITAL, ku'be-tal, *a.* Containing the length or measure of a cubit.

CUBITAL, ku'be-tal, *a.* (*cubitus*, the forearm, Lat.) Belonging to the forearm; *cubital artery*, the ulnar artery; *cubital nerve*, the ulnar nerve.

CUBITED, ku'be-ted, *a.* Having the measure of a cubit.

CUBITUS, ku'be-tus, *s.* In Anatomy, the forearm; *os cubiti*, the large bone of the forearm. The term is said to be derived from *cubo*, I lie down, it being customary to lean upon that part of the body in the recumbent posture which the ancients observed at meals.

CUBOCTAHEDRAL, ku-bok-ta-he'dral, *a.* Presenting the two forms of a cube and an octahedron.

CUBODODECAHEDRAL, ku-bo-do-dek-a-he'dral, *a.* Presenting the two forms of a cube and a dodecahedron.

CUBOID, ku'boyd, } *a.* (*kubos*, a cube, and
CUBOIDAL, ku-boy'dal, } *eidos*, resemblance, Gr.) Having the form of a cube, or differing little from it.

CUBOIDES, ku-boy'des, *s.* (*cubos*, a cube, and *eidos*, resemblance, Gr.) A genus of the Acalepha: Order, Hydrostatica.

CUCKING-STOOL.—See Castigatory.

CUCKOLD, kuk'kuld, *s.* (*cuculus*, Lat.) One whose wife is false to his bed;—*v. a.* to corrupt a man's wife; to rob a man of his wife's fidelity; to wrong a husband by unchastity.

To penetrate with an edged instrument; to divide any continuity by a sharp edge; to hew; to carve; to make or form by sculpture; to form anything by cutting; to divide by passing through; to pierce by any uneasy sensation; to divide as a pack of cards; to intersect; to cross, as one line cuts another at right angles; to castrate; to avoid or disown a person; *to cut a caper*, to dance or perform antics; *to cut down*, to fell; to hew down; to excel; to overpower; *to cut off*, to withhold; to rescind; to separate from the other parts by cutting; to destroy; to extirpate; to put to death untimely; to separate; to take away; to intercept; to hinder from union or return; to put an end to; to obviate; to preclude; to interrupt; to silence; to apostrophize; to abbreviate; *to cut out*, to shape; to form; to scheme; to contrive: to debar; to excel; to outdo; *to cut short*, to hinder from proceeding by a sudden interruption; to abridge; to lessen; *to cut up*, to cut into convenient pieces; to eradicate;—*v. n.* to make way by dividing; to divide by passing through; to perform the operation of lithotomy; to interfere, as a horse that *cuts*; *to cut in*, to divide, or turn a card for determining who are to play; a part prepared for use; a metaphor from hewn timber;

> Sets of phrases, *cut* and dry,
> Evermore thy tongue supply.—*Swift.*

cut and come again, implying that having *cut* as much as you pleased, you may come again; signifying plenty, no lack;—*s.* the action of a sharp or edged instrument; the blow of an axe or sword; the impression or separation of continuity, made by an edge or sharp instrument; a wound made by cutting; a channel made by art; a part cut off from the rest; a small particle; a shred; a lot made by cutting a stick; a near passage, by which some angle is cut off; a picture, cut or carved upon wood or metal, and impressed from it; the stamp on which a picture is carved, and by which it is impressed; the act of dividing a pack of cards; fashion; form; shape; manner of cutting into shape; a fool; a horse; a gelding;—(obsolete in the three last senses); *cut and long tail*, a proverbial expression for men of all kinds, borrowed from dogs.

> Come, *cut and long tail*; for there be
> Six bachelors as bold as he.—*Ben Jonson.*

CUTANEOUS, ku-ta'ne-us, *a.* (from *cutis*, the skin, Lat.) Relating to the skin.

CUTE, kute, *a.* Clever; sharp.

CUTEREBRA, ku-ter'e-bra, *s.* A genus of Dipterous insects: Family, Œstridæ.

CUTICLE, ku'te-kl, *s.* (*cuticula*, Lat.) In Anatomy, the epidermis, or scarf skin, the delicate and transparent membrane, which, destitute of nerves and blood-vessels, invests the whole surface of the skin, with the exception of the parts occupied by the nails. In Botany, the thin, and generally colourless, pellicle which covers the exterior of plants, and which is easily detached from the vegetable structure.

CUTICULAR, ku-tik'u-lar, *a.* Relating to the cuticle or external coat of the skin.

CUTIS, ku'tis, *s.* (Latin.) In Anatomy, the skin, dermis, or true skin, as distinguished from the cuticle, or scarf skin. It lies immediately under the corpus muscosum, and gives a covering to the whole body. It is of a fibrous texture, and is abundantly supplied with nerves and blood-vessels.

CUTLASS, kut'las, *s.* (*coutelas*, Fr.) A broad curving sword, used by seamen in boarding a vessel.

CUTLER, kut'lur, *s.* (*coutelier*, Fr.) One whose occupation is to make knives and other cutting instruments.

CUTLERIA, kut-le're-a, *s.* (in honour of a person of the name of Cutler.) A genus of Algæ, of the tribe Dictyotidæ: Order, Fucaceæ.

CUTLERY, kut'lur-e, *s.* The business of making knives, edge tools, &c.

CUTLET, kut'let, *s.* (*cotelette*, Fr.) A small piece of meat for cooking.

CUTPURSE, kut'purs, *s.* One who steals by the method of cutting purses; a thief; a robber. This term owes its origin to the ancient practice of persons who carried purses wearing them attached to their girdles: *cutpurses* were more severely punished than common thieves by the Roman and Athenian laws.

CUTTER, kut'tur, *s.* An agent or instrument that cuts anything; a fore tooth that cuts, as distinguished from a grinder; a person who shapes or cuts cloth for clothes; an officer of the exchequer whose business is to provide wood for the tallies; a small vessel with a single mast and a straight running bowsprit, that can be run on the deck occasionally; also, a small vessel used by ships of war; a ruffian; a bravo; a destroyer.—Obsolete in the last three senses.

CUT-THROAT, kut'*th*rote, *s.* A ruffian; a murderer;—*a.* cruel; barbarous; inhuman.

CUTTING, kut'ting, *s.* A piece cut off; a chop; incision; a division or separation. *Cutting*, in Gardening, a portion of a plant from which a new individual is propagated when placed in the earth. In Farriery, a term applied to the action of a horse when he strikes the inner and lower part of the fetlock joint with his hoof while travelling; not with the edge of the shoe, as smiths generally suppose;—an excavation made through land to conduct a road through it on a lower level than that of the surrounding land;—*a.* wounding or affecting the feelings; piquant; sharp; satirical.

CUTTINGLY, kut'ting-le, *ad.* In a cutting manner.

CUTTLE. } —See Sepia.
CUTTLE-FISH. }

CUTTLE-BONE, kut'tl-bone, *s.* The dorsal plate of the cuttle-fish, Sepia officinalis, formerly used as an absorbent, and sold in the shops as such.

CUT-TOOTHED, kut'toothd, *s.* In Botany, cut and toothed at the same time.

CUTWATER, kut'waw-tur, *s.* The foremost part of a ship's prow, formed of an assemblage of several pieces of timber, to render it broad at the upper part, where it projects forward from the stem, to open the column of water as the ship sails along; also, the lower portion of a pier separating two arches of a bridge crossing a river.

CUTWORK, kut'wurk, *s.* Embroidery.—Obsolete.

> Then his band
> May be disorder'd, and transform'd from lace
> To *cutwork*.—*Beau. & Flet.*

CUVETTE, ku-vet', *s.* An instrument used in extracting a cataract.

CUVIERIA, ku-ve're-a, *s.* (in honour of M. F. Cuvier, the distinguished zoologist.) A genus of plants, natives of Sierra Leone: Order, Cinchonaceæ.

CUVIERIA, ku-ve're-a, *s.* A genus of radiated animals with a cylindrical body, the head of a rich crimson, and furnished with ten tentacula. The Holothuria phantapus of Linnæus: Family, Fistulidæ.

CYAMILIDE, si-am'e-lide, *s.* Insoluble Cyanuric acid. Probable formula, $C^2O^2 + NH = 43.39$.

CYAMOPSIS, si-a-mop'sis, *s.* (*kyamos*, a bean, and *opsis*, resemblance, Gr. from its resembling the bean.) A genus of plants: Order, Fabaceæ.

CYAMUS, si'a-mus, *s.* A genus of Malacostracan Crustaceans: Order, Læmodipoda.

CYANÆA, si-a-ne'a, *s.* A genus of the Acephala, in which the body is hemispherical, the mouth surrounded with arms, and the margin of the body with tentacula.

CYANANTHUS, si-a-nan'*th*us, *s.* (*kyanos*, blue, and *anthos*, a flower, Gr.) A genus of plants: Order, Polemoniaceæ.

CYANATE, si'a-nate, *s.* A salt formed from the combination of cyanite acid with a salifiable base.

CYANEA, si-a'ne-a, *s.* (*kyanos*, blue, Gr. the colour of the flowers.) A genus of plants, natives of the Sandwich Islands: Order, Lobeliaceæ.

[The following compound terms occur in describing different species in Natural History:—*Cyanocillis*, blue-necked; *cyanicornis*, having blue antennæ or horns; *cyanicterus*, blue and yellow; *cyanipes*, blue-legged; *cyanirostris*, blue-beaked; *cyanocaryus*, blue-seeded; *cyanocephalus*, blue-headed; *cyanocollis*, blue-throated; *cyanogastra*, blue-bellied; *cyanogynus*, having blue styles; *cyanomelas*, blue and black; *cyanolæmatis*, covered with blue pustules; *cyanopus*, blue-footed; *cyanopygra*, blue and rose-coloured; *cyanorostris*, blue-billed; *cyanotis*, blue-eared; *cyanurus*, blue-tailed; *cyanoventris*, blue-bellied.]

CYANELLA, si-a-nel'la, *s.* (*kyanos*, Gr.) A genus of plants: Order, Liliaceæ.

CYANIA, si-a'ne-a. } —See Cyanopathy.
CYANOSIS, si-a-no'sis. }

CYANIC ACID, si-an'ik as'sid, *s.* An acid formed of 26 equiv. of cyanogen + 8 of oxygen = 34.

CYANIDE, si'a-nide, *s.* A compound of cyanic acid with a salifiable base. *Cyanide of Ammonia*, in bright crystaline plates, and poisonous: formula, $NH^4Cy = 44.54$. *Cyanide of Cobalt*, a whitish-brown precipitate: formula, $KCy = 65.54$. *Cyanide of Iron*, a grey insoluble powder: formula, $FeCy = 54.39$. *Cyanide of Iron*: formula, $FeCy + Fe^2Cy^3 + 4$ aqua. *Sesquicyanite of Iron*, unknown in a pure state: formula, $Fe^2Cy^3 = 137.17$. *Bicyanide of Mercury*, crystalized in colourless transparent masses, in regular four or six-sided prisms; highly poisonous: formula, $HgCy^2 = 254.78$. *Percyanide of Gold*: formula, $AuCy^3 = 278.17$. *Cyanide of Palladium*: formula, $PdCy = 79.69$. *Cyanide of Silver*: formula, $AgCy = 134.39$. *Cyanide of Zinc*, a brilliant white tasteless powder: formula, $ZnCy = 58.69$.

CYANILIC ACID, si-a-nil'ik as'sid, *s.* An acid obtained in the form of a white powder, by long-continued boiling of mellon in diluted nitric acid. It has the same composition as the crystaline cyanuric acid.

CYANITE, si'an-ite, } *s.* (*kyanos*, sky-blue colour, Gr.)
KYANITE, ki'an-ite, } A mineral of a grey-blue or

blueish-green. It occurs regularly crystallized; also, massive and disseminated; texture foliated; laminæ long; fragments splintery. It is composed of alumina, 64.30; silica, 34.33; with a trace of iron, and a small portion of lime.

CYANOGEN, si-an'o-jen, *s.* (*kyanos*, blue, and *gignomai*, I am produced, Gr. because it is an essential ingredient of Prussian blue.) A substance which unites as a compound radical with oxygen, hydrogen, and most of the other non-metallic elements; and also with the metals. It is composed of 12 equivalents of carbon and 14 of nitrogen: its formula is C^2N; its symbol, Cy; equivalent = 26. Cyanogen is a gas of a strong and peculiar odour, resembling that of rubbed peach leaves. It is obtained by heating cyanuret of mercury under a pressure of three or four atmospheres, when it becomes a limpid liquid. It is highly poisonous, and burns in contact with air with a rich purple flame; with hydrogen it produces hydrocyanic or prussic acid; and with the metals, cyanurets or cyanides: with oxygen it forms cyanic acid, CyO; hydrated cyanic acid, CyO + HO; fulmic acid, Cy^2O^2; cyanuric acid, Cy^3O^3; hydrated cyanuric acid, Cy^3O^3 + 3HO.

CYANOMETER, si-a-nom'e-tur, *s.* (*kyanos*, and *metron*, a measure, Gr.) An instrument invented by Saussure for ascertaining the deepness of the blue tint of the atmosphere. It is formed of a band of thick paper or pasteboard, divided into fifty-one parts, each of which is painted of a different shade of blue, decreasing gradually from the deepest to the lightest blue. It is held in the hand, the observer noting at the time which of the blues on the zone corresponds with the tint of the sky,—the number of the tint, reckoned from the lights, marks the degree of intensity of the blue of the atmosphere at the time.

CYANOPATHY, si-a-nop'a-*thy*, *s.* (*kyanos*, blue, and *pathos*, disease, Gr.) The Blue disease, called likewise *Cyanosis*, an affection in which the whole surface of the body exhibits a blue or purple colour, generally resulting from a communication between the aortic and pulmonary cavities of the heart, or from some obstacle to the circulation existing in the former.

CYANOSERIS, si-a-nos'e-ris, *s.* (*kyanos*, Gr.) A genus of Composite plants: Suborder, Labiatifloræ.

CYANOSPERMUM, si-an-o-sper'mum, *s.* (*kyanos*, and *sperma*, a seed, Gr.) A genus of Leguminous plants: Suborder, Papilionaceæ.

CYANOTIS, si-a-no'tes, *s.* (*kyanos*, and *otos*, the ear, Gr.) A genus of plants: Order, Commelynaceæ. Also, a genus of birds of the Grouse kind, natives of Brazil: Family, Tetraonidæ.

CYANOTYPE, si-an'o-tipe, *s.* A modification of phytography.

CYANTHUS, si-an'*thus*, *s.* (*kyne*, a helmet, and *anthos*, a flower, Gr.) A genus of Humming-birds: Family, Trochilidæ.

CYANURATE, si-an'u-rate, *s.* A salt formed with cyanuric acid and a salifiable base. *Cyanurate of Ammonia*, in white brilliant prisms, composed of 1 equiv. of hydrated cyanuric acid, 1 of ammonia, and 1 of water. *Cyanurate of Potassa*, in white acicular crystals: formula, 2HO + KO + Cy^3O^3. *Cyanurate of Silver*, a white precipitate: formula, 3AgO + Cy^3 + O^3.

CYANURIC ACID, si-an'u-rik as'sid, *s.* An acid in the form of oblique, rhombic, colourless, inodorous prisms. It is a tribasic: the formula of its hydrate is Cy^3O^3 + 3HO = 130.17.

CYANURUS, si-an'u-rus, *s.* (*kyanos*, and *oura*, the tail, Gr.) A genus of birds belonging to the Garrulinæ, or Jays: Family, Corvidæ.

CYAR, si'ar, *s.* (*kyar*, the eye of a needle, Gr.) In Anatomy, the internal auditory foramen.

CYATHEA, si-a'*the*-a, *s.* (*kyathos*, a cup, Gr.) A genus of Ferns: Order, Polypodiaceæ.

CYATHEÆ, si-a'*the*-e, *s.* (*cyathea*, one of the genera.) A family of plants of the order Polypodiaceæ, distinguished by the spore-cases having a vertical ring, usually sessile, on a more or less elevated receptacle, and the spores being three-cornered or three-lobed.

CYATHIFORM, si-*ath*'e-fawrm, *a.* (*cyathus*, a cup, and *forma*, a shape, Lat.) In the form of a cup; cup-shaped.

CYATHISCUS, si-a-*this*'kus, *s.* (*kyathos*, a cup, Gr.) A probe, with a hollow at the end of it, to remove wax, &c., from the ear.

CYATHOCLINE, si-a-*thok*'le-ne, *s.* (*kyathos*, a cup, and *kline*, a couch, Gr.) A genus of Composite plants: Suborder, Tubulifloræ.

CYATHOCOMA, si-a-*thok*'o-ma, *s.* (*kyathos*, and *kome*, foliage, Gr.) A genus of plants: Order, Cyperaceæ.

CYATHOCRINITES, si-a-*tho*-kre-ni'tes, *s.* (*cyathus*, a cup, and *crinon*, a lily, Lat.) A genus of fossil Crinoideans from the carboniferous limestone, in which the pelvis is formed of five plates, with five costals; the fingers of a single series of joints; column not enlarged; articulating surface of the columnar joints radiated; axillary side-arms round, and placed irregularly.

CYATHODES, si-a-*tho*'des, *s.* (*kyathos*, a cup, and *odous*, a tooth, Gr. in reference to the disk, which is cup-shaped and five-toothed.) A genus of plants with funnel-shaped flowers, natives of Van Dieman's Land: Order, Epacridaceæ.

CYATHODIUM, si-a-*tho*'de-um, *s.* (same as Cyathodes.) A genus of plants: Order, Marchantiaceæ.

CYATHOPHYLLOUS, si-a-*tho*-fil'lus, *a.* (*kyathos*, a cup, and *phyllon*, a leaf, Gr.) Having cup-shaped leaves.

CYATHUS, si'a-*thus*, *s.* (*kyathos*, Gr.) A drinking cup; an ancient Roman liquid measure, equal to the twelfth part of a sextarius, or about two ounces of water or wine; also, a solid measure, equal to two drachms. In modern Medical prescription, the term *cyathus* means a wine glass, which is estimated to contain *f.* ℥ iss; also, a genus of Fungi: Tribe, Gasteromycetes.

CYBELE, si-be'le, *s.* (*kybele*, Gr.) In Mythology, a name given originally by the Phrygians to the goddess of the earth. Her worship was afterwards introduced among the Greeks, who confounded her with their Rhea, as the Latins, at a later period, with their Ops. Her rites were celebrated with frantic gestures, howlings, clashing of cymbals, &c. The priests of Cybele were known by the different names of Corybantes, Galli, Curetes, &c.

CYBIANTHUS, sib-e-an'*thus*, *s.* (*kybos*, a square, and *anthos*, a flower, Gr. in reference to the square form of the corollas.) A genus of small trees, natives of Brazil: Order, Myrsinaceæ.

CYBIUM, sib'e-um, *s.* (*kybion*, Gr.) A genus of fishes, in which the body is rather elongated, the

scales small and of equal size; the teeth sharp, large, and compressed; the mouth large, and opening beyond the eye: Family, Scomberidæ.

CYCADEÆ, si-ka'de-e, } *s.* (*cycas*, one of
CYCADEACEÆ, si-ka-de-a'se-e, } the genera.) A natural order of the class Gymospermæ, or Gymnogens of Lindley, consisting of trees or shrubs with a simple continuous stem, parallel-veined pinnate leaves, and antheriferous cone scales; and in their general aspect approaching the palms. In their structure they form, or are rather allied to, the Ferns on the one hand, and the Firs on the other, than to the Palms. They are natives of the tropics, and temperate parts of America and Asia.

CYCADITES, si-ka'de-tes, *s.* A name given to certain fossil species of the Cycadaceæ.

Our fossil *cycadites* are closely allied, by many remarkable characters of structure, to existing Cycadeæ.—*Dr. Buckland.*

CYCAS, si'kas, *s.* (*kykas* of Theophrastus.) A genus of plants: Type of the order Cycadaceæ.

CYCHLA, sik'la, *s.* A genus of fishes, in which the mouth is large, the under jaw longest, dorsal fin slightly emarginate and naked, and the teeth very small: Subfamily, Labrinæ.

CYCLAMEN, si'kla-men, *s.* (*kyklos*, a circle, Gr. on account of the numerous coils of the fruit stalks.) A genus of plants, with bulbous roots and beautiful flowers: Order, Primulaceæ.

CYCLAMINE, si'kla-min, *s.* A non-azotized vegetable principle found in the root of the plant Cyclamen Europæum. It crystalizes in fine white needles, of a burning acrid taste, and possessed of emetic and purgative properties.

CYCLANTHACEÆ.—See Pandanaceæ.

CYCLANTHEÆ, si-klan'*the*-e, *s.* (*cyclanthus*, one of the genera.) A family of plants of the natural order Pandanaceæ, in which the flowers are usually furnished with a calyx, and the leaves flabellate or pinnate.

CYCLANTHERA, si-klan-*the*'ra, *s.* (*kyklos*, and *anthera*, an anther, Gr.) A genus of plants: Order, Cucurbitaceæ.

CYCLANTHUS, si-klan'*thus*, *s.* (*kyklos*, and *anthos*, a flower, Gr.) A genus of plants: Order, Pandanaceæ.

CYCLARTHRUS, si-klär'*thrus*, *s.* (*kyklos*, a circle, and *arthros*, a joint, Gr.) A genus of fossil fishes, from the Lias of Lyme Regis.

CYCLAS, si'klays, *s.* (*kyklos*, a circle, Gr.) A genus of Mollusca, type of the subfamily Cyclinæ. The shell is thin, transversely ovate, equilateral; cardinal teeth small; lateral teeth $\frac{2}{4}$, long and compressed; the ligament external: Family, Tellinidæ.

CYCLE, si'kl, *s.* (*kyklos*, a circle, Gr.) In Chronology, a certain period or series of years, which regularly proceed from the first to the last, and then return again to the first, and circulate perpetually. *Cycle of the sun*, a revolution of twenty-eight years, in which time the days of the month return again to the same days of the week, and the sun's place to the same signs and degrees of the ecliptic on the same month and days. *Cycle of the moon*, commonly called the golden number, a revolution of nineteen years, in which time the conjunctions, opposition, and other aspects of the moon, are within an hour and a half of being the same as they were on the same days of the month nineteen years before. *Cycle of indiction*, a period of fifteen years, in use among the ancient Romans, commencing from the third year before Christ; an imaginary orb or circle in the heavens.

CYCLIC, si'klik, } *a.* Pertaining to a circle.
CYCLICAL, si'kle-kal, }

CYCLINÆ, si'klin-e, *s.* A subfamily of the Tellinidæ, the animal generally fluviatile, and the shell covered by an epidermis.

CYCLOBOTHRA, si-klo-*both*'ra, *s.* (*kyklos*, and *bothros*, a small excavation or pit, Gr.) A genus of plants: Order, Liliaceæ.

CYCLOBRANCHIA, si-klo-brang'ke-a, } *s.* (*kyklos*,
CYCLOBRANCHIANS, si-klo-brang'ke-anz, } *los*, and
CYCLOBRANCHIATA, si-klo-brang-ke-a'ta, } *branchia*, gills, Gr.) An order of Mollusca, in which the organs of respiration are branchial, or by gills in the form of foliated branches placed symmetrically near the vent, which is situated near the mesial line of the posterior part of the body; the skin is naked, and more or less tuberculated. The Cyclobranchians of Cuvier form the eighth order of his Gasteropods, and contain the genera Patilla and Chiton.

CYCLOCÆLUS, si-klo-se'lus, *s.* (*cyclocèle*, Fr. from *kyklos*, and *koilia*, the intestines, Gr.) A term used by Ehrenberg for those Infusoria which have their intestines disposed in a circular form.

CYCLOCANTHA, si-klo-kan'*tha*, *s.* (*kyklos*, and *akanthos*, a spine, Gr.) A genus of Mollusca belonging to the Senectinæ, or Snake-shells, in which the shell is subdepressed, trochiform, and imperforate; the mouth slightly oblique; lips united: Family, Trochinæ.

CYCLOCOTYLE, si-klok-o-te'le, *s.* (*kyklos*, and *kotyle*, a leaf, Gr.) A genus of intestinal worms: Order, Parenchymata.

CYCLODERMA, si-klo-der'ma, *s.* (*kyklos*, and *derma*, the skin, Gr.) A genus of Fungi: Tribe, Gastero-mycetes.

CYCLOGRAPH.—See Archograph.

CYCLOID, si'kloyd, *s.* (*kyklos*, and *eidos*, form, Gr.) A curve generated by the motion of any point in the periphery of a circle, while the periphery itself revolves on a right line, till that point which touched the line at the beginning of the motion be brought back to touch it again.

CYCLOIDAL, si-kloy'dal, *a.* Relating to a cycloid.

CYCLOIDEAN, si-kloyd'e-an, *a.* Pertaining to the Cycloideans.

CYCLOIDEANS, si-kloyd'e-ans, *s.* (*kyklos*, round, *eidos*, appearance, Gr.) A name given by Agassiz to one of his four great orders of fishes, distinguished by the scales being round, as in the salmon and herring.

CYCLOLITE, si'klo-lite, *s.* (*kyklos*, and *lithos*, a stone, Gr.) A name sometimes given to corals of the genus Madrepora.

CYCLOLITES, si-klo-li'tes, *s.* (*kyklos*, and *lithos*, a stone, Gr.) A genus of fossil corals belonging to the Madrepore family.

CYCLOLOMA, si-klo-lo'ma, *s.* (*kyklos*, and *loma*, a fringe, Gr.) A genus of plants: Order, Chenopodiaceæ.

CYCLOMETRY, si-klom'e-tre, *s.* (*kyklos*, a circle, and *metron*, a measure, Gr.) The art of measuring cycles or circles.

CYCLONASSA, si-klo-nas'sa, *s.* (*kyklos*, round, Gr. and *nassa*, a cognate genus.) A genus of Mollusca, in which the shell is univalve, small, depressed, and nearly round; the inner lip vitreous, not defined; pillar broad and flattened; outer lip

lected: Subfamily, Cassinæ: Family,

-klo'pe-a, *s.* (*kyklos*, a circle, and *pous*, allusion to the replicate circle which the base or foot of the pods.) A ants, consisting of elegant, smooth, Leguminous shrubs, with sessile tri- and yellow flowers, natives of the d Hope: Suborder, Papilionaceæ.

si-klo-pe'an, } *a.* Relating to the
klo'pik, } Cyclops; vast; terri-
; savage.

si-klo-pe'de-a, } *s.* (*kyklos*, and *pai-*
si'klo-pede, } *deia*, instruction,
le of knowledge, embracing the entire arts and sciences; a book of univer-
ge.

, si-klof'o-ra, *s.* (*kyklos*, and *phora*, r.) A genus of Mollusca, belonging inæ, or common land-snails, the shell turbinate, the spire short and pointed, s very large, and the aperture entire: icidæ.

si-klop'e-um, *s.* A genus of fishes, eyes are very minute: Family, Silu-

lops, *s.* (Latin, from *kyklos*, and *ops*,) In fabulous History, the sons of d Amphitrite, said to have been above n number; Jupiter threw them into soon as they were born, but they were the intercession of Tellus, and became s of Vulcan. They were of prodigious had each only one eye, which was e middle of their foreheads: they are epresented as forging the thunderbolts and again as the first inhabitants of lwelling round Mount Etna.

æ, si-klop-ter'e-de, *s.* (*cyclopterus*, enera.) The Lump-suckers, a family ous fishes, in which the body is with- nd slimy; the pectoral fins very broad.

, si-klop'ter-is, *s.* (*kyklos*, and *pteris*, A genus of fossil Ferns, in which the f a round or oval shape: they occur in mation.

s, si-klop'ter-us, *s.* (*kyklos*, and ng or fin, Gr.) A genus of fishes, in dy is short, thick, and slimy, without having rows of thick cone-shaped tu- pe of the family Cyclopteridæ.

s, *s.* (*kyklos*, a circle, Gr.) A genus ter Gasteropodous mollusca. Also, a ntomostracans with very minute and lies.

-klo'sis, *s.* A term applied to the e vital fluids in plants.

UM, si-klo-sper'mum, *s.* (*kyklos*, a cir- *rma*, a seed, Gr.) A genus of plants: elliferæ.

, si-klos-to'ma, *s.* (*kyklos*, and *stoma*, .) A genus of Gasteropodous mollusca, e aperture of the shell is round. Also, artilaginous fishes, in which the mouth d by a large circular lip, forming a large a the lamprey.

us, si-klos'to-mus, *a.* (*kyklos*, and *sto-* h, Gr.) Having a circular mouth.

i-klo'tus, *s.* (*kyklos*, round, Gr.) A ollusca, in which the shell is nearly discoid without a pillar, the spire scarcely raised, and the tip obtuse; a small siphon is situated at the top part of the aperture.

CYCLURA, si-klu'ra, *s.* (*kyklos*, and *oura*, a tail, Gr.) A genus of reptiles, having the general form of the Iguana, with a thick tail, and the neck and back furnished with a crest of strong spines: Family, Iguanidæ.

[The following compounds connected with *cyclo*, round, are used in Natural History:—*Cyclocarpus*, round-seeded; *cyclogaster*, round-bellied; *cyclonotus*, having a circle round the back; *cyclophyllus*, round-leaved; *cyclopterus*, round-winged or finned; *cyclothelis*, having circular papillæ; *cyclospermus*, round-seeded; *cyclostomus*, round-mouthed; *cyclowra*, round-tailed.]

CYCNIUM, sik'ne-um, *s.* (probably from *kyknos*, a swan, but for what cause unknown.) A genus of rigid scabrous herbaceous plants, natives of Africa: Order, Scrophulariaceæ.

CYDER.—See Cider.

CYDONIA, si-do'ne-a, *s.* (*Cydon* in Candia.) The Quince, a genus of plants, consisting of trees and shrubs. The fruit of *C. vulgaris* is used as a marmalade: the seeds are used in medicine: Order, Rosaceæ.

CYDONIUM, si-do'ne-um, *s.* A genus of coralline Zoophytes, having a coriaceous skin, internally carneous, with numerous straight spicula perpendicular to the surface; polypi with a central opening, and an orifice at the base of the eight pinnated tentacula.

CYGNET, sig'net, *s.* (dim. of *cygnus*, a swan, Lat.) A young swan.

CYGNUS, sig'nus, *s.* (Latin.) In Ornithology, the Swan, a genus of natatoreal birds, belonging to Anatidæ, or Duck family: Subfamily, Anserinæ. The swans are large; have the bill fleshy, tumid, and naked; neck remarkably long; feet black and short. The tame swan, *C. mansuetus*, is a native of eastern Europe and Asia, and is chiefly kept as an ornament on the private lakes or other enclosed waters of the wealthy. The wild swan, *C. feros*, is not so large as the tame. It builds its nest in rushes on the margin of lakes; its eggs are usually five in number, and of an olive green colour with a white crust. In Astronomy, a constellation in the northern hemisphere, the bright stars in which, with those of Lyra and Aquila, form a remarkable triangle.

CYLIDRUS, si-lid'rus, *s.* A genus of Coleopterous insects: Family, Cleridæ.

CYLINDER, sil'in-dur, *s.* (*kylindros*, Gr.) A solid having two equal ends parallel to each other, and every plain section parallel to the ends; also a circle, and equal to them. *Cylinder of a steam-engine*, that part of a steam-engine in which the piston moves, and in which the motion of the whole is produced by the alternate admission and condensation of steam from the boiler.

CYLINDRACEOUS, se-lin-dra'shus, } *a.* Partaking
CYLINDRIC, se-lin'drik, } of the nature
CYLINDRICAL, se-lin'dre-kal, } of a cylinder.
Cylindrical vault, in Architecture, a vault on groins resting on two parallel walls; termed also a barrel, waggon-head, or cradle-vault.

CYLINDRELLA, se-lin-drel'la, *s.* (dim. of *cylinder*.) A genus of Mollusca, belonging to the subfamily Ovulinæ, in which the shell is cylindrical, narrow, and obtuse; the upper lip smooth, and no plaits on the pillar: Family, Cypræidæ.

CYLINDRICALLY, se-lin'dre-kal-le, *ad.* In the manner of a cylinder.

Cylindricity, se-lin-dris'e-te, *s.* A cylindrical form.

Cylindriform, se-lin'dre-fawrm, *a.* Having the form of a cylinder.

Cylindrodes, se-lin'dro-des, *s.* A genus of apterous cylindrical-shaped insects: Family, Phasminæ.

Cylindroid, sil'in-droyd, *s.* (*cylinder*, and *eidos*, form, Gr.) A solid body approaching to the figure of a cylinder, but differing in some respects, as having the bases elliptical, but parallel and equal.

Cylindrometic, se-lin-dro-met'ik, *a.* Belonging to a scale used in measuring cylinders.

Cylindrosporium, se-lin-dro-spo're-um, *s.* (*kylindros*, a cylinder, and *spora*, a seed, Gr.) A genus of Fungi: Tribe, Coniomycetes.

[The following combinations occur in Natural History:—*Cylindricornis*, having the horns or antennæ cylindrical; *cylindriflorus*, having the flowers of a cylindrical shape; *cylindrocarpus*, having cylinder-shaped seed; *cylindroides*, like a cylinder.]

Cylista, se-lis'ta, *s.* (*kylix*, a cup, Gr. in reference to the calyx being very large.) A genus of plants, consisting of twining Leguminous shrubs, with axillary simple racemes of yellow flowers: Tribe, Phaseoleæ.

Cylline, sil'le-ne, *s.* (*kyllos*, bent, or rolled round, Gr.) A genus of small univalve Mollusca, the shell of which is ribbed longitudinally, and subcoronated with tubercles, sometimes cancellated: Subfamily, Eburninæ.

Cyma, si'ma, } *s.* (Latin.) In Archi-
Cymatium, se-ma'she-um, } tecture, an undulating moulding, generally the upper one of a cornice.

Cymar, se-mär', *s.* A slight covering; a scarf.

Cymaria, se-ma're-a, *s.* (*cyma*, a cyme, Lat. in allusion to the flowers being disposed in cymes.) A genus of plants, consisting of shrubs with small cymose flowers: Order, Lamiaceæ.

Cymba, sim'ba, *s.* (*kymbe*, a boat, Gr.) A genus of Mollusca, in which the shell is obovate, tumid, ventricose, and of a brownish red, covered with a strong brown epidermis; pillar four-plaited: found on the African coasts.

Cymbal, sim'bal, *s.* (*cymbalum*, Lat.) A musical instrument used by the ancients, hollow, and made of brass. The modern *cymbals* are two concave metal plates, which the performer strikes together for the production of clear, sharp sounds.

Cymbaria, sim-ba're-a, *s.* (*kymbe*, a boat, Gr. in reference to the form of the fruit.) A genus of plants, with opposite leaves and large yellow flowers, usually solitary and sessile: Order, Rhinanthaceæ.

Cymbidium, sim-bid'e-um, *s.* (*kymbe*, a boat, Gr. in allusion to the form of the labellum.) A genus of plants: Order, Orchidaceæ.

Cymbiform, sim'be-fawrm, *a.* Shaped like a boat.

Cymbiola, sim-be-o'la, *s.* (*kymbos*, a boat, Gr.) A genus of Mollusca, belonging to the Volutinæ, or true Volutes, having the spire more produced, but not more than one-half of the aperture; the terminal whorls are regular and sculptured; four plaits on the pillar: Family, Volutidæ.

Cymbium, sim'be-um, *s.* (*kymbos*, Gr.) The Voluta cymbium, a species of marine Mollusca, known also by the name of the Gondola.

Cymbocarpum, sim-bo-kärp'um, *s.* (*kymbos*, and *karpos*, a seed, Gr. in allusion to the shape of the mericarps, which are hollow in front.) A genus of small annual fetid plants with white
der, Araliaceæ.

Cymbulia, sim-bu'le-a, *s.* (*kymbos*, G
of Mollusca, the shell of which is obl
per-shaped: Family, Thecosomata.

Cyme, sime, *s.* (*cyma*, Lat. *kyma*, a w
mode of inflorescence, the general
which resembles an umbel, and agre
this respect, that its common stal

taceæ.

Cymodocea, sim-o-do'se-a, *s.* (*kym*
and *dokis*, a small beam, Gr.?) A ge
dous Crustaceans: Section, Sphæron

Cymodocia, sim-o-do'she-a, *s.* A ge
line Zoophites, in which the stem is
nulated below, united above, without
partitions; cylindrical, filiform, alte
posite.

Cymoid, sim'oyd, *s.* (*kyma*, and *eidos*,
Gr.) A body having the form of a

Cymophane, sim'o-fane, *s.* (*kyma*,
phaino, I show, Gr.) The name
Chrysoberyl by Hauy.

Cymophanous, se-mof'a-nus, *a.* (*kym*
phaino, I show, Gr.) Having a w
light; opalescent.

Cymopterus, se-mop'ter-us, *s.* (*kyma*,
wing, Gr.) A genus of plants: Or
feræ.

Cymosæ, se-mo'se, *s.* The name give
to his sixty-third natural order of p
ing such as have their inflorescence
a cyme.

Cymose, sim-ose', or si'mose, *a.* Conta
in the form of a cyme.

Cynædus, se-ne'dus, *s.* (*cynædo*, a n
the ancients to one of the species.)
fishes in which the preopercnlum is
caudal fin rounded; dorsal and an
and without scales; pectoral nd
rounded; the mouth small: Family,

Cynailurus, se-nay-lu'rus, *s.* (*kyo*
ailouros, a cat, Gr.) The Huntin
which there are an African and an I
They are so named from the claws

Cynanche, se-nan'ke, *s.* (*kynanche*,
and *ancho*, I strangle, Gr.) In Nos
of diseases, comprehending several
inflammatory character, particularly
of the throat.

Cynanchum, se-nan'kum, *s.* (*kyon*, a
in reference to the poisonous effects
species.) A genus of plants, consi
or sub-shrubs, generally twining: Or
deæ, or Asclepiadaceæ.

Cynanthropy, se-nan'*th*rop-e, *s.* (
thropos, a man, Gr.) In Pathology
mania, in which the patient thinks

nto a dog, and imitates its bark and

, se-na'pe-um, *s.* An alkaloid obtained plant Æthusa Cynapium.

in'a-ra, *s.* (*kyon*, Gr. from the hard, stiff the involucrum, which resemble the teeth) The Artichoke, a genus of plants, one pecies of which, *C. scolymus*, is a well- arden esculent: Suborder, Tubulifloræ.

OUS, sin-a-ra'shus, *a.* Belonging to the nara.

MACHY, sin-árk-tom'a-ke, *s.* (*kyon*, *ark-*, and *mache*, a fight, Gr.) Bear-bait- a dog.

DIUM, sin-a-ro'de-um, *s.* (*kyon*, and a rose, Gr.) In Botany, a term applied with distinct ovaria, and hard indehiscent , enclosed in the fleshy tube of the calyx, Rose.

PHALÆ, sin-a-ro-sef'a-le, *s.* (*cynara*, choke, and *kephale*, the head, Gr.) A ich is sometimes given to plants of the e and Thistle kind.

CS, sin-e-jet'iks, *s.* The art of training ing with dogs.

'ik, *s.* (*kyon*, Gr.) A person of a snarling us disposition; a follower of Diogenes; a ope.

'ik, } *a.* Having the qualities of a sin'e-kal, } dog; brutal; snarling; sa- captious.

, sin'e-kal-le, *ad.* In a snarling or mis- manner.

ESS, sin'e-kal-nes, *s.* Moroseness; mis- disregard of the ordinary pursuits of .

sin'e-sizm, *s.* Churlishness; moroseness.

n'iks, *s.* An austere sect of Grecian phi- , who prided themselves on looking with on everything that tended to increase aggrandisement or social enjoyment: they wever, some deference to what they termed and virtue.

SM, sin'ik-spâzm, *s.* (*kyon*, a dog, and a spasm, Gr.) A convulsion, during e patient imitates the howling of dogs.

S, se-nik'*this*, *s.* (*kyon*, a dog, and *ichthys*, r.) A genus of fishes belonging to the y Serraninæ; body short and broad; head outh obliquely vertical and wide; lower numerous teeth, all of the same length: Percidæ.

se-nik'tis, *s.* A small animal of South onsidered as the connecting link between s and the dogs: hence the name.

n'ips, *s.* (Latin name of the Dog-fly.) A f insects: Type of the tribe Cynipsides, ily Cynipsidæ, or Gall-flies.

ES, se-nip'se-des, *s.* (*cynips*, one of the A tribe of Hymenopterous insects, allied hneumons. With few exceptions they are sects, having the antennæ almost always ted, and sometimes pectinated; the body bs are usually ornamented with brilliant colours; the hind legs are thickened in some and, according to Latreille, many of them e power of leaping. Like the Ichneumons, parasitical in the larva state; and, as in , some of them are destitute of wings.

HALUS, se-no-sef'a-lus, *s.* (*kyon*, and *ke-phale*, the head, Gr.) A genus of Baboons, the heads of which are shaped like the dog's. The term is restricted by Brisson to those species which have a tail. They inhabit the forests of tropical Africa.

CYNODON, sin'o-don, *s.* (*kyon*, and *odous*, a tooth, Gr.) A genus of plants; *C. dactylon*, or Dog's-tooth Grass, is a British perennial, found on the sandy shores of Cornwall: Order, Graminaceæ. Also, a genus of fishes, in which the mouth is oblique and enormously large, and both jaws armed with sharp unequal teeth; the dorsal fin is opposite to the commencement of the anal fin, which is very long; the ventral fin is extremely small; the lower jaw is longest, and the eyes are situated at the top of the muzzle: Family, Salmonidæ.

CYNODONTIUM, sin-o-don'she-um, *s.* (*kyon*, and *odous*, a tooth, Gr.) A genus of Urn-mosses: Order, Bryaceæ.

CYNOGLOSSUM, sin-o-glos'sum, *s.* (*kyon*, and *glossa*, a tongue, Gr. from the form of the leaves in most of the species.) Hound's-tongue, a genus of tall, robust, downy plants, soft to the touch: Order, Boraginaceæ.

CYNOGRAPHY, se-nog'gra-fe, *s.* (*kyon*, and *grapho*, I write, Gr.) A history of the dog.

CYNOLYSSA, sin-o-lis'sa, *s.* (*kyon*, and *lissa*, madness, Gr.) Hydrophobia, or canine madness.

CYNOMETRA, se-nom'e-tra, *s.* (*kyon*, and *metra*, a matrix, Gr. from the shape of the pods.) A genus of Leguminous plants, consisting of trees with bifoliate leaves and red flowers, rising from the main trunk of the trees: natives of Cochin-China and the East Indies.

CYNOMORIUM, sin-o-mo're-um, *s.* (*cynomorion*, chokeweed, Lat.) A genus of parasitical plants of the class Rhizogens: Order, Balanophoraceæ. A drachm of the powder of *C. coccinium* used to be given with success as a dose in dysenteries and hemorrhages.

CYNOPHORIA, sin-o-fo're-a, *s.* (*kynophoria*, Gr.) The time of gestation.

CYNOREXIA, sin-o-rek'se-a, *s.* (*kyon*, and *orexis*, appetite, Gr.) Canine appetite; insatiable hunger.

CYNORRHIZA, sin-o-ri'za, *s.* (*kyon*, and *rhiza*, a root, Gr.) A genus of umbelliferous plants: Tribe, Peucedanidæ.

CYNOSCIADIUM, sin-os-se-a'de-um, *s.* (*kyon*, *kynos*, a dog, and *skiadon*, an umbel, Gr.) A genus of umbelliferous plants, consisting of glabrous herbs, natives of America: Tribe, Seselineæ.

CYNOSURE, sin'o-sure, *s.* (*kynosoura*, dog's-tail, Gr.) In Astronomy, a constellation near the north pole, consisting of seven stars, four of which are disposed like the four wheels of a chariot, and three lengthwise representing the beam: sometimes termed the Chariot, or Charles's Wain. The ancient Phœnicians used to be guided in their voyages by this constellation, from which circumstance it has been used poetically as a point of attraction.

> Where perhaps some beauty lies,
> The *cynosure* of wondering eyes.—*Milton.*

CYNOURUS, sin-o-u'rus, *s.* (*kyon*, a dog, and *oura*, a tail, Gr.) Dog's-tail grass, a genus of plants: Order, Graminaceæ.

CYNTHIA, sin'*the*-a, *s.* In Mythology, one of the names given to Diana, as Cynthius was to Apollo, from Cynthus, a mountain in the island of Delos, on which they were said to be born. In Zoology,

a subgenus of the Ascidia; also, a genus of Coleopterous insects.

CYPERACEÆ, si-pe-ra'se-e, *s.* (*cyperus*, one of the genera.) The Sedges, a natural order of Endogenous plants, consisting of grass-like herbs growing in tufts, the stems of which are never hollow, and are generally without partitions at their nodes; they are often angular; the leaves are narrow or tapered; the flowers are imbricated solitary bracts, of which the lowermost are frequently empty, and called *glumes*. They differ from the grasses in the general angularity of the stems, in having no diaphragm at the articulations, and in their flowers being destitute of any other covering than a single bract, in the axil of which they grow, except in the genera Carex, Uncinia, and Diplacrum, where two opposite glumes are added;—calyx none; stamens hypogenous; anthers fixed by their base, entire, and two-celled; ovary one-seeded; nut crustaceous or bony; albumen mealy.

CYPERACEOUS, si-pe-ra'shus, *a.* Belonging to the order Cyperaceæ.

CYPERUS, si-pe'rus, *s.* (Latin name.) A genus of plants, type of the natural order Cyperaceæ.

CYPHELLE, si-fel'le, *s.* (*kyphos*, a tubercle, Gr.) In Botany, a tuberculous spot on the under surface of the thallus of lichens.

CYPHER.—See Cipher.

CYPHIA, sif'e-a, *s.* (*kyphos*, curved, Gr. from the gibbous nature of the stigma.) A genus of herbaceous plants with blue or red flowers, natives of the Cape of Good Hope: Order, Lobeliaceæ.

CYPHOMYIA, si-fo-me-i'a, *s.* (*kyphos*, bent, and *myia*, a fly, Gr.) A genus of Dipterous insects: Family, Notacantha.

CYPHONISM, si'fon-izm, *s.* An ancient mode of punishment or torture inflicted on criminals. It consisted in rubbing the offender with honey, and afterwards fastening him to a stake, or exposing him in a cage, to be a prey to swarms of insects.

CYPHOSIS, si-fo'sis, *s.* (*kyphos*, bent, Gr.) Curvature of the spine.

CYPHUS, si'fus, *s.* (*kyphos*, bent, Gr.) A genus of Weevils, remarkable for the richness of their metallic colouring: Family, Curculionidæ.

CYPRÆA, se-pre'a, *s.* (*Cypria*, one of the names of Venus.) The Cowry, a genus of Mollusca, type of the family Cyprædæ: one of the species, *Cypræa moneta*, is used as a coin in some parts of Africa.

CYPRÆDIA, se-pre'de-a, *s.* A genus of Mollusca, the shell of which is cypræform; the base contracted; the body whorl not flattened beneath; the shell cancellated; the aperture of equal length throughout; with a few thick teeth on the pillar; lip at the base.

CYPRÆFORM, sip're-fawrm, *a.* Having the shape of the Cypræa, or Cowry shells.

CYPRÆIDÆ, se-pre'e-de, *s.* (*cypræus*, one of the genera, Lat.) The Cowries, a family of marine Gasteropods, the full-grown shells of which are involute, highly enamelled, oval, or oblong, more or less rounded or cylindrical, with a small and embedded spire; aperture longitudinal; nearly straight-toothed, or plaited on each, with a groove or channel at each end; inner lip flattened or subconcave; outer lip involute.

CYPRÆINÆ, sip-re'in-e, *s.* A subfamily of the Cypræidæ, or Cowries, including those genera which have the inner lip striated or toothed.

CYPRÆLLA, sip-rel'la, *s.* A genus of Mollu the Cowry family, in which the shell is c form; the inner lip thickened above into a as long as the outer lip: Subfamily, Ovulin

CYPRÆOVA, si-pre-o'va, *s.* (contracted from c *ovulum*.) A genus of the Cowries, in whic teeth of the inner lip are wanting, being sented by fine raised lines on the back shell; the aperture effuse, and the top outer lip projecting much: Subfamily, Cypr

CYPRÆOVULA, sip-re-ov'u-la, *s.* (so named fr combining the characters of *cypræa* and A subgenus of the Cowries, resembling the but having the front end of the columella c with regular cross ribs, the base internall duced into an acute-toothed ridge, pear-a and of a pale-brown colour; very rare: nati the coast of the Cape of Good Hope.

CYPRESS, si'pres, *s.* The common name plants of the genus Cupressus, but more pa larly of the tree Cupressus Sempervirens, co in the Levant: Order, Pinaceæ. *Cypres pentine*, a turpentine obtained by woundin bark of the tree Pistacea terebinthus.

CYPRIA, sip're-a, *s.* (from the island of Cyprus Mythology, one of the names of Venus.

CYPRIAN, sip're-an, *a.* Relating or belonging island of Cyprus;—*s.* a term given to a prost

CYPRICARDIA, sip-re-kär'de-a, *s.* (*Cypria*, one names of Venus, and *cardia*, the heart, Lat. genus of Mollusca, the bivalve shells of whic elongated and inequilateral; the umbo rec forward; two cardinal diverging teeth beside lamellar tooth; ligament very long, scarcely jecting; abdominal impression sometimes di backwards.

CYPRINA, sip-rin'a, *s.* (*Cypria*, one of the nam Venus.) A genus of Mollusca, the bivalve of which are equivalve, inequilateral, obli cordate; umbones obliquely curved; hinge three unequal teeth, approximating at the subdivaricate above; lateral tooth distant the hinge on the anterior side, sometimes obs nymphal callosities large, arched, and termi near the umbones, with an ovate lunule; liga external: Family, Veneridæ.

CYPRINÆ, sip-rin'e, *s.* Swainson's name for a family of the Salmonidæ, including the carps.

CYPRINE, sip'rine, *s.* A mineral, a cupreous v of idocrase of a fine blue tinge, from the neigh hood of Tellenmarken, in Norway.

CYPRINIDÆ, sip-rin'e-de, *s.* A family of Mal terygious fishes, of which the carp is the ge

CYPRINODON, sip-rin'o-don, *s.* (*cyprinus*, *odous*, a tooth.) A genus of fishes: F Cyprinidæ.

CYPRINUS, sip're-nus, *s.* (dedicated to the Cy Venus.) The Carp, a genus of fishes, ty the family Cyprinidæ. The carps are distingu from their allied genera by having one long fin, a small mouth devoid of teeth, scales o size, the anal and dorsal fins large, bony, and or less serrated, and the gill rays being th number. The common carp, *C. carpio*, freq lakes, ponds, and rivers, and feeds on worm insects. A brace is said to have been kil Gatton, in England, which weighed 35 lbs their tenth year they weigh about 6 lbs.

CYPRIOT, sip're-ot, *s.* An inhabitant of Cyp

CYPRIPEDIUM, sip-re-pe'de-um, *s.* (*kypris*,

the names of Venus, and *podion*, a slipper, Gr. in reference to the elegant slipper-like form of the labellum.) A genus of plants, consisting of perennial herbs: Order, Orchidaceæ.

CYPRIS, si'pris, *s.* A genus of Entomostraca, furnished with only six feet, and having two antennæ terminated by a bundle of setæ resembling a pencil: Order, Branchiopoda.

CYPRUS, si'prus, *s.* (probably corrupted from *cypress*, as being used in mourning.) A thin, transparent black gauze.

> Lawn as white as driven snow,
> *Cyprus* black as e'er was crow.—*Shaks.*

CYPRUS POWDER, si'prus pow'dur, *s.* A cosmetic prepared by the French from the acrid Aram.

CYPSELA, sip-sel'a, *s.* (*kypsele*, a bee-hive, Gr.) In Botany, a one-seeded, one-celled indehiscent fruit, in which the integuments of the seed do not cohere with the pericarp.

CYPSELEA, sip-se'le-a, *s.* (*kypsele*, a bee-hive, Gr. in reference to the form of the capsule.) A genus of annual plants, natives of St. Domingo: Order, Portulaceæ.

CYPSELURUS, sip-se-lu'rus, *s.* (*kypsele*, a hollow, and *oura*, a tail, Gr.) A genus of flying fish, resembling Exocetus in its general structure, but having the mouth furnished with barbels, either simple or forked: Subfamily, Exocetinæ.

CYPSELUS, sip-sel'us, *s.* (*kypsellos*, or *kypselos* of Aristotle, Gr.) The Swift, a genus of Swallows: Family, Hirundinidæ.

CYRENA, si-re'na, *s.* A genus of Mollusca, in which the bivalve shell is thick, transversely ovate, and nearly equilateral; the cardinal teeth, $\frac{3}{3}$; lateral teeth short, thick, and obtuse, $\frac{2}{2}$: both marine and fluviatile.

CYRENIAN, si-re'ne-an, *a.* Pertaining to Cyrene, a Grecian colony on the northern coast of Africa; —*s.* a native of Cyrene, but more especially applied to a sect of Epicureans established at that place by Aristippus, a disciple of Socrates.

CYRILLA, si-ril'la, *s.* (in honour of Prof. Dominico Cyrilli of Naples.) A genus of plants, type of the natural order Cyrillaceæ.

CYRILLACEÆ, si-ril-la'se-e, *s.* (*cyrilla*, one of the genera.) A small natural order of Hypogynous Exogens, consisting of shrubs with evergreen leaves without stipules, and regular symmetrical flowers usually in racemes; petals five, hypogynous; stamens five or ten, hypogynous; ovary two, three, or four-celled; style short; stigma with as many lobes as there are in the ovary; fruit a drupe: natives of North America.

CYRIOLOGIC, ser-e-o-lod'jik, *a.* (*kyrios*, chief, and *logos*, a discourse, Gr.) Relating to capital letters.

CYRTANDREÆ, ser-tan'dre-e, *s.* (*cyrtandria*, one of the genera.) A tribe of plants of the order Gesneriaceæ, in which the seeds have no albumen, the fruit wholly free, capsular, and baccate, and the calyx inferior.

CYRTANDRIA, ser-tan'dre-a, *s.* (*kyrtos*, a curve, and *aner andros*, a male, Gr.) A genus of plants: Order, Gesneriaceæ.

CYRTANTHUS, ser-tan'*th*us, *s.* (*kyrtos*, curved, and *anthos*, a flower, Gr. from the tube of the flower being long and round.) A genus of plants: Order, Amaryllidaceæ.

CYRTOCARPA, ser-to-kär'pa, *s.* (*kyrtos*, gibbous, and *karpos*, fruit, Gr. in reference to five gibbosities above the fruit.) A genus of plants, consisting of a tall tree, a native of New Spain: Order, Terebinthaceæ.

CYRTOPHYLLUM, ser-to-fil'lum, *s.* (*kyrtos*, curved, and *phyllon*, a leaf, Gr. in reference to the leaves of one of the species being convex on the upper side.) A genus of plants, consisting of hardy luctescent trees with opposite leaves, and a corymbose inflorescence: Order, Loganiaceæ.

CYRTOPODIUM, ser-to-po'de-um, *s.* (*kyrtos*, a curve, and *pous*, a foot, Gr.) A genus of plants: Order, Orchidaceæ.

CYRTOSIS, ser-to'sis, *s.* (*kyrtos*, crooked, Gr.) A term used by the ancients for recurvation or crookedness of the spine.

CYRTOTROPIS, ser-tot'ro-pis, *s.* (*kyrtos*, curved, and *tropis*, a carina, Gr. in allusion to the carina of the flower, which is much curved.) A genus of tall, twining, Leguminous herbs, with loose axillary racemes of flesh-coloured flowers, and long, pendulous, many-seeded legumes: Tribe, Phaseoleæ.

CYRTUS, ser'tus, *s.* (*kyrtos*, crooked, Gr.) A genus of Dipterous insects: Family, Tanystoma.

CYSSOTIS, sis-sot'is, *s.* (*kysos*, the anus, Gr.) Inflammation of the anus.

CYST, sist, *s.* A sac containing some morbid matter.

CYSTANTHE, ses-tan'*th*e, *s.* (*kyste*, a chest or box, and *anthos*, a flower, Gr. in reference to the close hood-like flowers.) A genus of plants with pale red flowers, natives of Van Dieman's Land: Order, Epicridaceæ.

CYSTIBRANCHIANS, sis-te-brang'ke-ans, *s.* (*cystis*, and *branchia*, gills, Gr.) A family of Crustaceans, the respirating organs of which are lodged in vesicular cavities.

CYSTIC, sis'tik, *a.* Of or belonging to the bladder, as the *cystic duct*, the canal leading from the gall-bladder. *Cystic oxide*, a species of calculus found in the bladder, &c.

CYSTICAPNOS, sis-te-kap'nos, *s.* (*kystis*, a bladder, Gr. and *kapnos*, one of the Greek names for Fumitory, in allusion to its bladdery capsules.) A genus of smooth climbing herbs, with small racemose white flowers, tipped with red: Order, Fumariaceæ.

CYSTICERCUS, sis-te-ser'kus, *s.* (*kystos*, and *kerkos*, a tail, Gr.) A cystose bladder, containing an unattached and almost solitary animal.

CYSTIRRHAGIA, sis-ter-ra'je-a, *s.* (*kystis*, and *regnyo*, I burst forth, Gr.) Hemorrhage from the urinary bladder.

CYSTIS, sis'tis, *s.* (*kystis*, Gr.) In Anatomy, the bladder.

CYSTITES, sis-ti'tes, *s.* (*kystis*, the bladder, Gr.) Inflammation of the bladder.

CYSTITOME, sis-tit'o-me, *s.* (*kystis*, and *tome*, a section, Gr.) An instrument for opening the capsule of the crystaline lens.

CYSTOCELE, sis-tos'se-le, *s.* (*kystis*, and *kyle*, a tumour, Gr.) Hernia formed by the protrusion of the bladder.

CYSTOTOMIA, sis-to-to'me-a, *s.* (*kystis*, and *tome*, a section, Gr.) The operation of cutting the bladder for the extraction of a calculus.

CYSTURAPES, sis'tu-rayps, *s.* A name given by Lindley to plants of the order Cytinaceæ.

CYTHEREA, *sith*-e-re'a, *s.* (one of the names of Venus.) A genus of Mollusca, in which the shell is bivalve, generally smooth and glossy; the cardinal teeth

DAWNING, dawn'ing, *s.* Break of day; the first appearance of intellectual expansion.

DAY, day, *s.* (*dies*, Lat.) In common language, that portion of time in any place during which the sun

remains above the horizon, in which sense it is called the *artificial day*, and is opposed to night. In the computation of time, the *civil* or *mean solar day* is the time employed by the earth in revolving on its axis, 365.2425 of such revolutions constituting a mean Gregorian year. An *astronomical*, *solar*, or *apparent day*, is the time which elapses between the consecutive returns of the same terrestrial meridian to the centre of the sun. Solar days are not always of equal length: 1st, from the unequal velocity of the earth in its orbit, that velocity being greater in winter than in summer; and 2d, from the obliquity of the ecliptic, in consequence of which the sun's apparently daily motion in the plane of the earth's equator is less at the equinoxes than at the tropics. The *solar day* commences at noon. *Civil* or *mean solar day*, with most of the modern nations, commences at midnight, and consists of 24h. 3m. 56s., 55 of sidereal time; the sidereal day is 23h. 56m. 4s., 09 of a mean solar day. A *sidereal day*, the day universally adopted by astronomers in their observations, is the time that elapses between two successive culminations of the same star. The *nautical day* ends at the moment the astronomical day begins, so that nautical time, in days of the month, is always twenty-four hours in advance of astronomical time. The Babylonians commenced the day at sun-rising, the Jews at sun-setting, and the Egyptians at midnight, as do many modern nations—the British, French, Spanish, Americans, &c.;—light; sunshine; any time specified and distinguished from other time; an age—the time, in this sense, generally plural; time or season in general; life, in this sense commonly plural, as 'he never in his days broke his word;' the day of contest; the battle; an appointed or fixed time; time of commemorating an event;—*from day to day*, without certainty or continuance; *to-day*, on this day; *day by day*, daily; each day in succession; *daybreak*, the dawn, or first appearance of light in the morning; *daybook*, a daily register of mercantile transactions; *daylabourer*, one that works by the day; *daystar*, the morning star, Venus—termed also Lucifer; *day's-work*, the work of one day; also, the reckoning or account of a ship's course or distance run during twenty-four hours, or from noon to noon, according to the rules of trigonometry.—*Days of grace*, in Commerce, a customary number of days allowed for the payment of a bill after it becomes due, three days being allowed in Great Britain and America. *Days of grace*, in Law, days granted by the court for delay in an action, at the prayer of the plaintiff or defendant. *Day-rule* or *writ*, in Law, a certificate of permission which the court, in term time, gives to a prisoner to go beyond the bounds of the prison for the purpose of transacting his business, upon application to the marshal or warden, and signing a petition for that purpose. *Days in bank*, in Law, are certain days in each term when writs shall be returned to the Court of King's Bench, or when the party shall appear upon the writ served. To be dismissed, or *go without day*, is to be finally dismissed the court; a case is said to be *put without day* when the justices do not come on the day to which it was continued. *Day-were of land*, an old term for as much arable land as could be ploughed upon in one day's work, or one day's journey, as the farmers call it. *Daymare*, or *Ephialtes vigilantium*, in Pathology, a species of incubus occurring during wakefulness, and attended with that severe pressure on the chest which characterizes *nightmare*. *Daysight*, an affection of the vision, in which it is dull and confused in the dark, but clear and strong in daylight. Hens are well known to labour under this affection, and hence it is sometimes called *henblindness*: it is also termed *nyctalopia*, or *night-blindness*.

DEACON, de'kn, *s.* (*deacanos*, a servant, Gr.) One of the orders of the Christian church, to whom originally the administration of charity was committed. In the English church the name continues, but not the office, the care of the poor being committed to the poor-law officers. By the Rubric, it appears that a person in deacon's orders is empowered to read the scriptures and homilies publicly, also to catechise, and to preach when licensed to do so by the bishop; he can, in short, do all the duties of a beneficed clergyman, except consecrating the elements at the administration of the Lord's Supper, or pronouncing the blessing. Before he is qualified to do these, hold a benefice, or take any ecclesiastical promotion, he must take holy orders. In Congregational churches, deacons and deaconesses perform the same duties as in the primitive church, and attend to the secular affairs of the congregation. In Scotland, the term *deacon* is given to the president of a corporate body, and *deacon-convener* to the convener of the various corporations in a burgh.

DERNLY, dern'le, *ad.* Mournfully; anxiously.

DEROGATE, der'o-gate, *v. a.* (*derogo*, Lat.) To repeal, annul, or destroy the force and effect of some part of a law or established rule; to lessen the extent of a law, distinguished from abrogate; (seldom used in the foregoing senses;) to lessen the worth of any person or thing; to disparage;—*v. n.* to detract; to lessen by taking away a part; to act beneath one's rank, place, or birth.—Obsolete in the last sense.

Is there no derogation in't?
—— You cannot *derogate*, my lord.—*Shaks.*

DEROGATELY, der'o-gate-le, *ad.* In a manner to lessen honour or respect.

DEROGATION, der-o-ga'shun, *s.* The act of weakening or restraining a former law or contract; the act of taking away or destroying the value or effect of anything, or of limiting its extent; the act of taking something from merit, reputation, or honour; detraction; defamation

DEROGATIVE, de-rog'a-tiv, *a.* Derogatory—the term generally used.

DEROGATORILY, de-rog'a-tur-e-le, *ad.* In a detracting manner.

DEROGATORINESS, de-rog'a-tur-e-nes, *s.* The quality of being derogatory.

DEROGATORY, de-rog'a-tur-e, *a.* Detracting, or tending to lessen by taking something from; that lessens the extent, effect, or value. *Derogatory clause*, in a person's will, is a sentence or secret character inserted by the testator, of which he reserves the knowledge to himself, with a condition that no will he may make hereafter shall be valid unless this clause is inserted word for word. This is done as a precaution to guard against later wills being extorted by violence, or otherwise improperly obtained.

DEROSTOMA, der-os'to-ma, *s.* (*dere*, the neck, and *stoma*, the mouth, Gr.) A genus of Entozoa, belonging to the order Parenchymata, and family Acanthocephala.

DERRING, der'ring, *a.* Daring.—Obsolete.

All mightie men and dreadful *derring* doers.—*Spenser.*

DERRIS, der'ris, *s.* (*derris*, a skin, Gr. in reference to the skinlike consistence of the legumes.) A genus of Leguminous climbing shrubs, with impari-pinnate leaves and white flowers, natives of China and Cochin-China: Suborder, Papilionaceæ.

DERTROIDES, der-troy'des, *s.* (*dertron*, a bill, Gr.) A genus of birds belonging to the Coccothraustinæ, or Hard-bills: Family, Fringillidæ.

DERVISE, der'vis, *s.* (a Persian word, signifying poor.) An Asiatic religious fanatic, who has voluntarily renounced the luxuries and comforts of life, from a belief that poverty is the road to heaven, and that privation here is the way to secure heavenly rewards. The *Dervises*, like the monks of Christendom, are divided into many orders: some live in monasteries, and some live solitary, either as hermits or wandering mendicants. Their worship is full of fanaticism and buffoonery, and their moral character is said to be hypocritical and licentious in the extreme.

DESCANT, des'kant, *s.* (*discante*, Span.) A song or tune composed in parts; a song or tune with various modulations; a discourse; discussion; disputation; animadversion; comment, or a series of comments; the art of composing music in several parts. *Descant* is plain, figurative, and double. *Plain descant* is the groundwork of musical compositions, consisting in the orderly disposition of

concords, answering to simple counterpoint. *Figurative* or *florid descant* is that part of an air in which some discords are concerned. *Double descant* is when the parts are so contrived that the treble may be made the base, and the base the treble.

DESCANT, des-kant', *v. n.* To run a division or variety with the voice on a musical ground in true measure; to sing; to discourse; to comment; to make a variety of remarks; to animadvert freely.

DESCANTER, des-kan'tur, *s.* One who descants.

DESCANTING, des-kan'ting, *s.* Remark; conjecture.

DESCEND, de-send', *v. n.* (*descendo*, Lat.) To go downwards; to come from a higher place to a lower; to fall; to sink; to come down, in a popular sense, implying only an arrival at one place from another; to come suddenly or violently; to fall upon as from an eminence; to make an invasion; to proceed as from an original; to be derived from; to fall in order of inheritance to a successor; to extend a discourse from general to particular consideration. In Music, to fall in sound; to pass from any note to another less acute or shrill, or from a sharp to a flat;—*v. a.* to walk, move, or pass downward on a declivity.

DESCENDANT, de-sen'dant, *s.* (French.) Any person proceeding from an ancestor in any degree; issue; offspring in the line of generation.

DESCENDENT, de-sen'dent, *a.* Descending; falling; sinking; proceeding from another as an original or ancestor.

DESCENDIBILITY, de-sen-de-bil'e-te, *s.* The quality of being descendible, or capable of being transmitted from ancestors.

DESCENDIBLE, de-sen'de-bl, *a.* That may be descended or passed down; that may descend from an ancestor to an heir.

DESCENSION, de-sen'shun, *s.* (*descensio*, Lat.) The act of going downwards; falling or sinking; descent; declension; degradation. In Astronomy, *right descension* is an arch of the equinoctial, intercepted between the next equinoctial point and the intersection of the meridian, passing through the centre of the object, at its setting, in a right sphere. *Oblique descension* is an arch of the equinoctial, intercepted between the next equinoctial point and the horizon, passing through the centre of the object, at its setting, in an oblique sphere. *Descension of a sign* is an arch of the equator, which sets with such a sign or part of the zodiac, or any planet in it. *Right descension of a sign* is an arch of the equator, which descends with the sign below the horizon of a right sphere, or the time the sign is setting in a right sphere.

DESCENSIONAL, de-sen'shun-al, *a.* Relating to descent.

DESCENSIVE, de-sen'siv, *a.* Descending; having power to descend.

DESCENSORIUM, de-sen-so're-um, *s.* A chemical furnace.

DESCENT, de-sent', *s.* (*descente*, Fr.) The act of passing from a higher to a lower place; progress downwards; obliquity; inclination; lowest place; fall from a higher state; degradation; invasion; hostile entrance into a kingdom or state; transmission of anything by succession and inheritance; the state of proceeding from an original or progenitor; birth; extraction; process of lineage; offspring; those proceeding in the line of generation; a single degree in the scale of genealogy; a rank in the scale of subordination. In Music, a passing from a note or sound to a more grave or less acute. In Mechanics, the motion of a body towards the centre of the earth occasioned by the attraction of gravity. The laws of descent are—1. Bodies in an unresisting medium have a uniformly accelerated velocity. 2. When the action of gravity is uniform, the space passed over in a given time is exactly one-half that which would be passed over in the same time by the velocity acquired at the end of the descent continued uniformly. 3. The spaces passed over in different times are proportioned to the squares of the velocities or the squares of the times. 4. The time of the oblique descent of a body down any chord of a circle, drawn from the highest or lowest point of the circle, is equal to the time through the diameter of the circle. 5. The time of descent through all arcs of the same cycle is equal. 6. A heavy body falling to the earth by its own gravity is found to descend through 16 feet in the first second, 32½ in the second second, and in the third, and so on according to the second. *Descent*, in Heraldry, expresses the coming down of anything from above, as a lion *en descent* has his head towards the base points, and his tail towards one of the corners of the chief, as if he were leaping down from some high place.

DIAPENSIA, di-a-pen'se-a, *s.* (the ancient Greek name of the plant Sanicle.) A genus of plants, consisting of small tufted American herbs, with salver-shaped corollas and alternate leaves: Order, Diapensiaceæ.

DIAPENSIACEÆ, di-a-pen-se-a'se-e, *s.* (*diapensia*, one of the genera, Gr.) A natural order of perigynous Exogens, belonging to the Gential alliance of Lindley. It consists of prostrate under-shrubs, with densely-imbricated leaves and solitary terminal flowers; the calyx consists of five sepals, forming a broken whorl; corolla monopetalous and regular; five stamens, the filaments rising from the margin of the sinus of the corolla; anthers two-celled; ovary superior and three-celled: natives of the north of Europe and North America.

DIAPENTE, di-a-pen'te, *s.* (*dia*, and *pente*, five, Gr.) A musical term, signifying the interval of a fifth.

DIAPER, di'a-pur, *s.* (*Ypres*, in Flanders, where first manufactured, whence d'Yepres, corrupted into *diaper*.) A kind of ornamented linen used for table-cloths and towels;—*v. a.* to variegate; to diversify; to draw flowers on cloth.

DIAPERIDÆ, di-a-per'e-de, *s.* A tribe of Coleopterous insects.

DIAPERIS, de-ap'e-ris, *s.* (*dis*, and *apereido*, I fix firmly, Gr.?) A genus of Coleopterous insects: Family, Taxicornes.

DIAPHANED, di'a-faynd, *a.* (*dia*, through, and *phaino*, I show, Gr.) Transparent.—Little used.

DIAPHANEITY, di-a-fa-ne'e-te, *s.* In Physics, the property of affording passage to the rays of light; transparency.

DIAPHANIC, di-a-fan'ik, *a.* Having power to transmit rays of light, as glass; pellucid; transparent; clear.

DIAPHANOUS, di-a-fa'nus, *a.* Transparent.

DIAPHONICS, di-a-fon'iks, *s.* (*dia*, and *phone*, a sound, Gr.) The doctrine of refracted sounds.

DIAPHORA, di-af'o-ra, *s.* (*diaphoros*, various, Gr.) A genus of plants: Order, Cyperaceæ.

DIAPHORESIS, di-a-fo-re'sis, *s.* (*diaphoresis*, dispersion, Gr.) Augmentated perspiration or elimination of the humours of the body through the pores of the skin.

DIAPHORETIC, di-a-fo-ret'ik, *a.* (*diaphoreo*, I carry through, Gr.) Sodorific, causing perspiration, or rather the discharge of humours through the skin in an imperceptible manner; having the power to increase perspiration.

DIAPHORUS, di-af'o-rus, *s.* A genus of Dipterous insects: Family, Sanystoma.

DIAPHRAGM, di'a-fram, *s.* (*diaphragma*, Gr.) The midriff, or large circular muscular organ situated between the thorax or chest and the abdomen, forming a moveable partition between these two cavities. Its most important office is connected with the function of respiration, being the principal agent both in enlarging the cavity of the thorax in inspiration and extending it in expiration, by virtue of the power it possesses, in common with the other muscles, of alternate contraction and relaxation. It is the antagonist of the abdominal muscles in inspiration, but it act them in vomiting, in the discharge of the c of the bowels and of the urinary bladder, assisting the expulsion of the fœtus in part It is imperfectly developed in birds, and d exist in the lower animals. The term is a plied to the straight calcareous plate which the cavity of certain shells into two parts.

DIAPHRAGMATIC, di-a-fra-mat'ik, *a.* Pl pertaining to the diaphragm.

DIAPHRAGMATITIS, di-a-frag-ma-ti'tis, *s.* I mation of the diaphragm, or of its peritonea

DIAPHTHORA, di-af'*tho*-ra, *s.* (*diaphtheira*, rupt, Gr.) In Pathology, the corruption part.

DIAPHYSIS, di-a-fe'sis, *s.* (Greek.) Inte the state of growing between. In Anat term applied to the body, or central por the long bones. By some botanists it is designate the *nodi* of the grasses, and by more correctly, the interstices or portions culms between the nodes.

ns or monstrosities, characterized by a longi-
division or fissure of the part; as, *Diastemato-*
f the vagina; *diastematocephalia*, of the brain;
stocaulia, of the trunk of the body; *diastemato-*
of the lip; *diastematocrania*, of the skull; *dia-*
ystia, of the bladder; *diastematogastria*, of the
of the belly; *diastematoglossia*, of the tongue;
gnathia, of the jaws; *diastematometria*, of the
diastematopyelia, of the pelvis; *diastematorachia*,
pine; *diastematorhenia*, of the nose; *diastemato-*
, of the uvula; *diastematosternia*, of the ster-
diastematria, of the intestinal canal; *diastema-*
he mesial line of the body.

E, di-as'to-le, *s.* (*diastello*, I separate, Gr.)
ilatation of the heart and arteries. In
nar, the extension of a syllable, or a figure
ich a syllable naturally short is made long.

ORA, di-as-top'o-ra, *s.* (*diastisso*, I separate
nts, and *poros*, a pore, Gr.) A genus of
nes, in which the cells are rather tubular,
ounded openings disposed irregularly in ver-
ows on one face of a lamelliform, irregular,
riously disposed polypiaria: Subclass, Poly-
Membranaceæ.

DIASTREMMA, di-as-trem'ma, } *s.* (*diastropho*, I
DIASTROPHE, di-as'tro-fe, } turn aside, Gr.)
A distortion in any part of the body.

DIASTRODOX, di-as'tro-doks, *s.* (*dia*, and *astron*, a star, and *doxa*, glory, Gr.) The name given to a machine for displaying the glory of the starry firmament.

DIASTYLE, di'as-tile, *s.* (*dia*, and *stylos*, a column, Gr.) In Architecture, that mode of intercolumniation in the arrangement of pillars, where the space between the columns consists of three, or, according to others, of four diameters.

DIASTYLLIS, di-as-til'lis, *s.* A genus of Decapod Crustaceans of the crab kind, found on the coasts of Florida and Georgia.

DIATERETICUS, di-a-ter-et'e-kus, *s.* (*diatereo*, I preserve, Gr.) A medicine which preserves health and prevents disease.

DIATESSARON, di-a-tes'sa-ron, *s.* (*dia*, and *tessara*, four, Gr.) In Greek Music, the interval of a third.

DIATHERMAL, di-a-*ther*'mal, } *a.* (*dia*, and
DIATHERMATOUS, di-a-*ther*'ma-tus, } *therme*, heat, Gr.) A term applied to such transparent bodies which suffer the radiation of heat to pass through them, as in the case of rock salt, &c.

DIATHESES, di-a-*the*'sis, *s.* (*diatithemi*, I depose, Gr.) In Pathology, a certain state of constitution by which a person is predisposed to particular diseases.

DIATOMACEÆ, di-a-to-ma'se-e, *s.* (*diatoma*, one of the genera.) An order of minute Algæ, consisting of crystaline fragmentary bodies, generally bounded by right lines—rarely included in curve lines—flat, stiff, and brittle, usually nestling in slime, uniting into various forms, and then separating again. 'They seem to form the extreme limits of the vegetable and animal kingdoms. Their regular form, and the power of separating into distinct particles, which most of them have, are almost as much the attributes of the mineral as of the animal or vegetable kingdom. Agardh includes them among plants; Kützing asserts that their life is as much animal as vegetable.'—*Lindley*.

DIATOMOUS, di'a-to-mus, *a.* (*dia*, and *temno*, I cleave.) In Mineralogy, having crystals with one distinct diagonal cleavage.

DIATONI, di-at'o-ni, *s.* (*dia*, and *tonos*, an extension, Gr.) In ancient Architecture, a term applied when the angle stones of a wall, wrought with two faces and stretching beyond the stones both above and below, make a good bend or tie to the work.

DIATRIBE, di'a-tribe, *s.* (Greek.) A continued discourse or disputation.

DIATRIBIST, di-at'ro-bist, *s.* One who prolongs his discourse or discussion.

DIAVOLETTI, di-a-vol-let'te, *s.* An Italian name for lozenges made of cocoa and the most pungent aromatics, to excite venereal desire.

DIAZENETIC, di-a-ze-net'ik, *a.* (*diazeygnymi*, I separate, Gr.) In ancient Greek Music, a term applied to the tone disjoining two fourths, one on each side, and which, when joined to either the one or the other, made a fifth.

DIAZOMA, di-a-zo'ma, *s.* (*dia*, and *zoma*, a cincture, Gr.) In ancient Architecture, a term used for the landing and resting places which encircled the amphitheatre, at different heights, like so many bands. In Zoology, a genus of the Acidia, in which the species dispose themselves circularly or in rays, often sufficiently regularly disposed round a centre, so as to form one or more stelliform systems, imbedded in a horizontal gelatinous mass.

DIAZOSTER, di-a-zos'tur, *s.* (Greek.) The twelfth lumber vertebra, so termed from its corresponding to the waistband of the human figure or dress.

DIBBLE, dib'bl, *s.* A pointed instrument for making holes with in the ground, in the process of planting;—*v. n.* in Angling, to nibble;—*v. a.* to plant with a dibble.

DIBBLER, dib'blur, *s.* One who makes holes in the ground to receive seed.

DIBOLIA, dib-o'le-a, *s.* A genus of Coleopterous insects, in which the greater part of the head is sunk in the thorax and the posterior tibiæ, terminated by a forked spine: Family, Cyclica.

DIBOTHRI, dib-*oth*'ri, } *s.* (*dis*, twice, and
DIBOTHRIANS, dib-*oth*'re-anz, } *bothrion*, a pit, Gr.) A division of the Entozoa, including those tapeworms of the family Bothriocephala which have not more than two pits or fossæ on the head.

DIBOTHRYORHYNCHUS, di-b*oth*-re-o-ring'kus, *s.* (*dis*, *bothros*, a pit, and *rhynchos*, a snout, Gr.) A genus of Entozoa, in which the summit of the head is furnished with two little trunks or tentacula, bristled with hooks.

DIBRANCHIA, di-brang'ke-a, *s.* (*dis*, two, and *branchia*, gills, Gr.) A name given by Latreille to a class of the Cirripedes, comprehending such as have their respiratory organs in two leaf-like expansions.

DIBRANCHIATA, di-brang'ke-ay-ta, } *s.* An order
DIBRANCHIATES, di-brang'ke-ayts, } of the Cephalopods, including such as are furnished with two gills, have three distinct hearts, an apparatus for secreting and discharging an inky fluid, with never more than ten arms set with acetabulæ.

DIBSTONE, dib'stone, *s.* A little stone which children throw at another stone.

DICACITY, de-kas'e-te, *s.* (*dicacitas*, Lat.) Pertness; much talk, as prating.—Seldom used.

As every one had something to say to Ferry, so Ferry had something to say to every one; and this gave a sort of petulant *dicacity* to his repartees.—*Graves.*

DICÆLUS, di-se'lus, *s.* A genus of Coleopterous insects: Family, Carabidæ.

DICÆUM, di-se'um, *s.* A genus of birds belonging to the family Cinnyridæ, or Sun-birds, natives of the Indian and Australian islands.

DICALYX, di-kal'iks, *s.* (*dis*, double, and *kalyx*, a calyx, Gr. in reference to the calyx being calyculated by bracteas, which assume the appearance of an outer calyx.) A genus of plants, consisting of trees, natives of Java and Cochin-China: Order, Pomaceæ.

DICARYUM, di-ka're-um, *s.* (*dis*, double, and *karyon*, a nut, Gr. from the drupe containing two nuts.) A genus of South American trees, with opposite leaves and terminal pannicles, or axillary racemes of flowers: Order, Strychnaceæ.

DICAST, di'kast, *s.* (*dikase*, Gr.) In ancient Greece, an office answering nearly to our juryman.

DICASTERIUM, di-kas-te're-um, *s.* (*dike*, justice, Gr.) In ancient Architecture, the name of a tribunal in the city of Athens.

DICE, dise, *s. plu.* of Die. Also a game with dice —*v. n.* to play a game with dice.

DICE-BOX, dise'box, *s.* A box from which dice are thrown in gaming.

DICE-COAL, dise'kole, *s.* A local name for a kind of coal.

DICEPHALOUS, di-sef'a-lus, *a.* (*dis*, twice, and *kephale*, a head, Gr.) Having two heads to one body.

DICER, di'sur, *s.* A player at dice.

DICERA, dis'e-ra, *s.* (*dis*, double, and *keras*, a horn, Gr. in allusion to the anthers being terminated by two bristles.) A genus of plants, consisting of shrubs and trees with laurel-like leaves: Order, Tiliaceæ.

DICERANDRIA, dis-er-an'dre-a, *s.* (*dis*, *keras*, and *andros*, a male, from the anthers being two-horned, each of the cells being spurred at the base.) A genus of Labiate plants: Order, Lamiaceæ.

DICERAS, dis'e-ras, *s.* (*dis*, and *keras*, a horn, Gr.) A genus of fossil shells, found in the lower green sand and upper oolite, and thus named from possessing two prominent spiral umbones, which have the appearance of two twisted horns.

DICERATA, dis-e-ra'ta, } *s.* (*dis*, and *keras*,
DICERATES, dis'e-rayts, } Gr.) A name given by Blainville to a family of Mollusca, comprehending such gasteropods as have the head furnished with two tentacula.

DICERMA, dis-er'ma, *s.* (*dis*, twice, and *derma*, a prop, Gr. in reference to the calyx being supported by two bracteas.) A genus of Leguminous plants, consisting of shrubs with trifoliate leaves and purple or yellow flowers: Suborder, Papilionaceæ.

DICEROS, dis'e-ros, *s.* (*dis*, and *keras*, a horn, Gr.) A genus of Lizards of the Chamelionidæ, or Chameleon family. It is distinguished by the frontal male being produced into two compressed cylindrical horns.

DICH, ditsh, *v. a.* This word seems corrupted from *dit*, for *do it*.—Obsolete.

Rich men sin and I eat root;
Much good *dich* thy good heart, Apemantus!

DICHÆTÆ, di-ke'te, *s.* A subdivision of the Dipterous insects, consisting of two families, the Hippoboscidæ and the Pupipara, the first of which are distinguished by the sucking-tube being contained within the proboscis, and the terminal joint of the antennæ being usually patelliform. Both families have two setæ to the proboscis.

DICHELES, di-ke'les, *s.* (*dis*, and *cheilos*, a lip, Gr.) A genus of Coleopterous insects: Family, Scarabæicornes.

DICHELESTIUM, di-ke-les'te-um, *s.* (*dis*, and *chelestium*, a lip, Gr.) A genus of Pæcilopodous Crustacea, with narrow elongated bodies, slightly dilated before, and composed of seven segments: Suborder, Siphonostoma.

DICHILUS, dik-i'lus, *s.* (*dis*, twice, and *chilos*, a lip, Gr. in reference to the calyx being two-lipped.) A genus of Leguminous subshrubs, natives of the Cape of Good Hope: Suborder, Papilionaceæ.

DICHOBUNE, dik'o-bune, *s.* A genus of fossil quadrupeds, differing from the Anoplotheria and Xiphodons in having two small and distinct toes on each foot, at the side of the two principal ones. They occur in tertiary rocks, near Paris.

DICHONDRA, dik-on'dra, *s.* (*dis*, and *chondros*, a grain, Gr. in reference to its double capsule.) A genus of creeping downy herbs: Order, Convolvulaceæ.

DICHORIZANDRA, dik-o-re-zan'dra, *s.* (*dis*, *choris*, separately, and *aner andros*, a male, in reference to the separation of the two anthers upon which the character of the genus depends.) A genus of plants: Order, Commelynaceæ.

DICHOSPORIUM, dik-o-spo're-um, *s.* (*dicha*, double, and *spora*, a seed, Gr.) A genus of Fungi: Order, Gasteromycetes.

DICHOTOMARIA, dik-o-to-ma're-a, *s.* (*dichotomos*, divided into two parts, Gr.) A genus of membraneous Corallines, originating in a short simple stem, and terminating in compressed dichotomous ramifications, rounded at the extremity: Family, Corallineæ.

DICHOTOMIZE, dik-ot'o-mize, *v. n.* To separate into pairs.

DICHOTOMOUS, dik-ot'o-mus, *a.* (*dichotomos*, Gr.) Occurring in pairs, as the veins of some ferns and the nervures in the wings of certain insects; repeatedly bifurcated.

DICHOTOMY, dik-ot'o-me, *s.* An artificial arrangement of natural objects into pairs. In Botany, branching by constant forking, as when the stem or vein of a plant divides into two branches, each branch dividing into two others, and so on.

DICHROISM, dik'ro-izm, *s.* (*dis*, *chroma*, colour, Gr.) In Optics, the property of appearing under two distinct colours, according to the direction in which light is transmitted through a body, as in the muriate of palladium, which appears of a deep red colour along the axis, and of a lively green when viewed in a transverse direction.

DICING-HOUSE, dise'ing-hows, *s.* A house where dice is played; a gaming-house.

DICKENS, dik'ens, (derivation uncertain.) An adverbial exclamation used by some of our old writers, synonymous with the *devil*.

> Where had you this pretty weathercock?
> ——I cannot tell what the *dickens* his name is my husband had him of.—*Shaks.*

DICKER, dik'kur, *s.* (probably from *deka*, ten, Gr.) In old authors, the number or quantity of ten, particularly ten hides or skins; sometimes applied to other things, as a *dicker* of gloves, &c.

DICKSONIA, dik-so'ne-a, *s.* (in honour of Mr. James Dickson.) A genus of Ferns: Order, Polypodaceæ.

DICLIDANTHERA, dik-le-dan-*the*'ra, *s.* (*diklis*, double doors, and *anthera*, an anther, Gr. in reference to the anthers dehiscing by two valves.) A genus of plants, consisting of small shrubs or trees, with hardwood and elongated, often pendulous, branches; thick petiolate leaves, and racemose bracteate flowers with cream-coloured corollas, which become purplish on drying—natives of Brazil: Order, Ebenaceæ.

DICLINOUS, dik'le-nus, *a.* In Botany, applied to a plant which has its sexes in distinct flowers.—Obsolete.

DICLIPTERA, dik-lip'te-ra, *s.* (*dis*, and *kleio*, I shut, Gr. from the fruit being composed of two valves.) A genus of plants: Order, Acanthaceæ.

DICOCCOUS, di-kok'kus, *a.* (*dis*, and *kokkos*, a berry, Gr.) Two-grained; consisting of two cohering grains or cells, with one seed in each.

DICOLOPHUS, di-kol'o-fus, *s.* (*dicha*, separately, and *lophos*, a crest, Gr.) A genus of Wading-birds, in which the crown of the head is furnished with a tuft of feathers which spreads in two directions—hence the name.

DICORPHE, di-kawr'fe, *s.* (*dis*, and *korphe*, a vertex, Gr. in reference to the two horns on the top of the fruit.) A genus of plants, natives of Madagascar: Order, Hamamelidaceæ.

DICOTYLEDON, di-ko-te-le'dun, *s.* (*dis*, and *kotyledon*, a seed-leaf, or lobe, Gr.) A plant which has cotyledons or seminal leaves.

DICOTYLEDONEÆ, di-ko-te-le-do'ne-e, } *s.* (*dis*, two,
DICOTYLEDONIA, di-ko-te-le-do'ne-a, } and *koty-*
DICOTYLEDONS, di-ko-te-le'duns, } *ledon*, a seed-leaf, or lobe, Gr.) Exogens, one of the names given by botanists to the first grand division of the vegetable kingdom; so termed from the embryo having two opposite cotyledons, or, when more, disposed in a whorl; the stem is increased by external layers, with an evident distinction between bark and wood; the leaves are traversed by branch veins, and the parts of the flower very commonly disposed in a quinary number. The plumule is situated in the centre of the point of junction of the cotyledons; the inferior end of the embryo is elongated into a radicle, and does not contain any secondary radicle in its substance.—See Exogens and Botany.

DICOTYLEDONOUS, di-ko-te-le'do-nus, *a.* Having two seed-leaves.

DICOTYLES, di-kot'e-les, *s.* The Peccaries, a genus of hogs which have the grinder and incisor teeth very similar to the domesticated hogs, but their canines are like those of ordinary quadrupeds, and do not project from the mouth. They have no tail, and are without an external toe on the hinder feet. In their mode of living they resemble the common pig.

DICRÆUS, dik're-us, *a.* (*dikroos*, double-headed, Gr.) Bifid; cloven.

DICRANIA, di-kra'ne-a, *s.* (*dikranos*, having two prongs, Gr.) A genus of Coleopterous insects, natives of Brazil: Family, Lamellicornes.

DICRANOCERUS, dik-ra-nos'e-rus, *s.* (*dikranos*, forked, and *keras*, a horn, Gr.) A genus of quadrupeds belonging to the Antelope family, in which the horns are greatly compressed, rough, with an anterior process, and the point uncinating backwards, placed upon the orbits, and impending over the eyes; tail very short; structure cervine; facial line convex.

DICRANOURA, dik-ra-now'ra, *s.* (*dikranos*, having two prongs, and *oura*, a tail, Gr. from the posterior of the caterpillar being forked.) A genus of Lepidopterous insects: Family, Nocturna.

DICROIT, } dik'royt, *s.* A mineral of a blue colour
DICROITE, } and shining lustre. It is likewise called *iolite*. It is the prismatic quartz of Mohs. It occurs in granite and gneiss, and consists of silica 50, alumina 30, magnesia 11, oxide of iron 5, with a trace of manganese.

DICROMATIC, di-kro-mat'ik, *a.* (*dis*, and *chroma*, colour, Gr.) Having two colours; producing two colours.

DICROTIC, di-krot'ik, *a.* (*dis*, and *kroyo*, I strike, Gr.) In Pathology, applied to a pulse which, when felt, conveys the sensation of a double pulsation.

DICRURINÆ, dik-ru're-ne, *s.* (*dicrurus*, one of the genera.) The Drongo Shrikes, a subfamily of

birds. They are fly-catchers, having the bill much compressed, and the mouth furnished with very stiff long bristles.

DICRURUS, dik-ru'rus, *s.* (*dis*, and *oura*, a tail, Gr. from its forked tail.) A genus of birds, type of the Dicrurinæ, or Drongo Shrikes.

DILUVIAL, de-lu've-al, } *a.* (*diluvialis*, Lat.) Be-
DILUVIAN, de-lu've-an, } longing to the deluge;

produced by the deluge. The superficial deposits of clay, gravel, and sand, sometimes containing shells and bones of land mammalia, which lie far from their original sites on hills, and in other situations, to which no forces of water now in action could transport them, have attracted much of the attention of geologists, but as yet no satisfactory solution of the phenomena has been given. 'Violent floods passing over the land, streams flowing formerly at levels and in lines now impossible, the literal action of the sea during the time of the uplifting of the land, glacier movements and the floating of icebergs over the surface while it was yet covered by the ocean, have all been strongly proposed for adoption, but the phenomena are very complicated, and seem to require many partial solutions, involving change of level of sea and land as the fundamental condition.'—*Pen. Cyc.*

Diluvialist, de-lu've-al-ist, *s.* One who attributes certain effects, as the dispersion of the erratic boulders, to the action of the deluge.

Diluviate, de-lu've-ate, *v. n.* To run as a flood.

Diluvium, dil-u've-um, *s.* (Latin, a flood.) In Geology, a term given to the clay, sand, and boulder deposits, which occupy the surface or underlie alluvial strata in this and other countries. It lives in herds, and is often hunted by the Tartars for its flesh.

E.

E, the second vowel, and the fifth letter of the English alphabet. Its long and natural sound in English coincides with the sound of *i* in the Italian and French languages, and is formed by a narrower opening of the glottis than that of *a*. It has a long sound, as in *here*, *mere*, *me*, &c.; and a short sound, as in *met*, *men*; and the sound of *a* open or long, in *there*, *prey*, *vein*. As a final letter, it is generally quiescent; but it serves to lengthen the sound of the preceding vowel, or at least to indicate that the preceding vowel is to have its long sound, as in *mane*, *cane*, *plume*, which, without the final *e*, would be pronounced *man*, *can*, *plum*. After *c* and *g*, the final *e* serves to indicate that *c* is to be pronounced as *s*, and *g* as *j*. In a numerous class of words, except a few

from the Greek, the final *e* is silent. In words ending in *ive*, as *active;* in *ile*, as *futile;* in *ine*, as in *sanguine, examine;* in *ite*, as in *definite;* e is generally silent. As a numeral, E stands for 250. In the Calendar, it is the fifth of the dominical letters; as an abbreviation, it stands for East, as in charts; E. by S., east by south. On medals and ancient coins, it stands for the name of any city, the name of which begins with this letter.

EACH, eetsh, *a.* (*eik*, Scot.) Every one of any number separately considered or treated.

ECHENEIS, ek-e-ne'is, *s.* The Remora fish; a genus of fishes with elongated bodies, remarkable for having a flattened disk placed upon their head, composed of a certain number of transverse cartilaginous laminæ, which point backward, and are dentated or spiny on the posterior edge, and moveable, so that by creating a vacuum between them, or by hooking on to various bodies, such as ships, rocks, or other fishes, they are enabled to attach themselves firmly thereto. One of the species inhabits the Mediterranean: Family, Discoboli.

ECHEVERIA, ay-she-ve're-a, *s.* (in honour of M. Echeveri, author of the drawings in Flora Mexicana.) A genus of plants, consisting of fleshy Mexican shrubs, with sessile, scarlet, or yellow flowers: Order, Crassulaceæ.

ECHEVIN, aysh'ving, *s.* A name given under the old French monarchy to the municipal magistrates of various cities and towns.

ECHIDNA, e-kid'na, *s.* (*echinos*, a hedgehog, Gr.) The Porcupine Ant-eaters, a genus of spiny quadrupeds, natives of Australia: the muzzle is elongated, the mouth small, the tongue extensible. It has no teeth, but the mouth is furnished with several rows of small spines, directed backwards; the body covered with short stiff spines; claws long and strong; the tail very short: Order, Edentata.

ECHIMYS, e-kim'is, *s.* (*echinos*, and *mys*, a rat, Gr.) The Spiny rats; a genus of rats, having strong spines mixed with the hair on the back: Order, Rodentia.

ECHINACANTHUS, ek-e-na-kan'thus, *s.* (*echinos*, a hedgehog, and *acantha*, a spine, Gr.) A genus of plants: Order, Acanthaceæ.

ECHINACEA, ek-e-na'se-a, *s.* (*echinos*, a hedgehog, Gr.) A genus of Composite plants: Suborder, Tubuliflorœ.

ECHINARACHNIUS, ek-e-na-rak'ne-us, *s.* (*echinos*, and *arachne*, a spider, Gr.) A genus of the Echinidæ; body subconic—five avenues of pores; circumference angular; base flat; mouth central.

ECHINARIA, ek-e-na're-a, *s.* (*echinos*, a hedgehog, Gr.) A genus of Grasses, natives of the south of Europe: Order, Graminaceæ.

ECHINATE, e-ki'nate, } *a.* (*echinus*, a hedge-
ECHINATED, e-ki'nay-ted, } hog, Lat.) Set with prickles; prickly, like a hedgehog; having sharp points; bristled.

ECHINELLA, ek-e-nel'la, *s.* (dim. of echinos, a hedgehog, Gr. from the bristly appearance presented by its radiant particles.) A genus of Algæ: Ordr, Diatomaceæ.

ECHINIDÆ, e-kin'e-de, *s.* A family of radiated animals, comprehending those known under the name of sea-urchins, sea-eggs, &c. In these animals the body is oval or circular and regular, sustained by a solid shell, which is calcareous, and composed of polygonal plates, disposed in radiated order in twenty rows, which are equal, or alternately equal.

ECHINIDAN, e-kin'e-dan, *s.* A fossil belonging to the class Echinodermata.

ECHINITE, e-ki'nite, *s.* A fossil Echinus.

ECHINOBOTRYS, ek-e-no-bot'ris, *s.* (*echinos*, and *botrys*, a bunch of grapes, Gr.) A genus of Fungi: Order or tribe, Coniomycetes.

ECHINOCACTUS, ek-e-no-kak'tus, *s.* (*echinos*, a hedgehog, and *kaktos*, a cactus, Gr.) Hedgehog Thistle, a genus of plants, beset with spines like a hedgehog: Order, Cactaceæ.

ECHINOCARPUS, ek-e-no-kär'pus, *s.* (*echinos*, a hedgehog, and *karpos*, a fruit, Gr. in allusion to the prickly capsules.) A genus of plants, consisting of a tall tree, called Sigun in Java: Order, Bixaceæ.

ECHINOCOCCUS, ek-e-no-kok'kus, *s.* (*echinos*, and *kokkos*, a kernel, Gr.) A genus of intestinal Hydatids, one species of which, *E. hominis*, occasionally infests the human body.

ECHINOCHLOA, ek-e-no-klo'a, *s.* (*echinos*, and *chloa*, grass, in reference to the prickly nature of the heads of the flowers.) A genus of plants: Order, Graminaceæ.

ECHINOCLYPEUS, ek-e-no-kle'pe-us, *s.* (*echinos*, a hedgehog or sea-urchin, and *clypeus*, a shield, Lat.) A fossil genus of the Echinidæ, in which the body is depressed or conical, circular or inclining to oval; the mouth subcentral, a little more anterior; vent entirely above.

ECHINOCORYS, ek-e-nok'o-ris, *s.* A genus of the Echinidæ; body oval, vaulted; mouth transverse; vent nearly towards the opposite margin. Found fossil in the Chalk and Oolite formations.

ECHINOCYAMUS, ek-e-no-si'a-mus, *s.* (*echinos*, and *kyamos*, a bean, Gr.) A genus of the Echinidæ,

in which the body is depressed and oval; the buccal opening subcentral, regular, with five teeth, as in Clypeaster; the vent below, between the mouth and border.

ECHINOCYSTIS, ek-e-no-sis'tis, *s.* (*echinos*, and *kystis*, a bladder, Gr.) A genus of plants: Order, Cucurbitaceæ.

ECHINODERMATA, ek-e-no-der'ma-ta, } *s.* (*echinos*,
ECHINODERMS, ek'e-no-derms, } and *derma*, the skin, Gr.) A name given by Cuvier to a class of the Radiata. The animals are invested with a well-organized skin, frequently supported by a sort of skeleton, and armed with points, or moveable and articulated spines, and have an internal cavity, in which there is a distinct and floating viscera. The class is divided into two orders, those furnished with feet or with vesicular organs, so called from their performing similar functions. The first order constitutes the Pedicellata, and embrace the star-fishes, the sea-urchins, the Holothuriæ, &c. The second order, Apoda, are without the vesicular feet of the other, and are allied to the Holothuriæ.

ECHINODISCUS, ek-e-no-dis'kus, *s.* (*echinos*, and *diskos*, a disk, Gr.) A genus of Leguminous plants: Suborder, Papilionaceæ. Also, a genus of Echinidæ, in which the body is rounded, depressed, and rather five-lobed; the mouth in the middle; the vent central.

ECHINOLÆNA, ek-e-no-le'na, *s.* (*echinus*, a hedgehog, and *læna*, a cloak, Lat.) A genus of plants: Order, Graminaceæ.

ECHINOLAMPAS, ek-e-no-lam'pas, *s.* (*echinos*, and *lampas*, a torch, Gr.) A genus of the Echinidæ, in which the mouth is subcentral, and without teeth; the vent marginal; the body oval or circular, and depressed.

ECHINOMERIA, ek-e-no-me're-a, *s.* (*echinos*, and *meris*, a part, Gr.) A genus of Composite plants: Suborder, Tubulifloræ.

ECHINOMETRA, ek-e-no-me'tra, *s.* (*echinos*, and *metron*, a measure, Gr.) A genus of Echinidæ, in which the body is thick, solid, and transversely oval; the mouth with five sharp teeth; the vent exactly opposite the mouth.

ECHINOMYIA, ek-e-no-mi'ya, *s.* (*echinos*, and *myia*, a fly, Gr.) A genus of Dipterous insects: Family, Athericera.

ECHINONEUS, ek-e-no'ne-us, *s.* (*echinos*, Gr.) A genus of the Echinidæ, in which the mouth is in the middle of the base, and the vent between the mouth and the margin, or near the latter, but underneath.

ECHINOPHORA, ek-e-nof'o-ra, *s.* (*echinos*, and *phero*, I bear, Gr. in allusion to the strong stiff spines of the involucrum.) A genus of umbelliferous perennial herbs: Tribe, Smyrneæ.

ECHINOPS, e-ki'nops, *s.* (*ekinos*, and *ops*, likeness, Gr. in allusion to its prickly heads.) The Globe Thistle, a genus of Composite plants: Suborder, Tubulifloræ.

ECHINOPSILON, ek-e-nop'se-lon, *s.* (*echinos*, and *psilon*, naked, Gr.) A genus of plants: Order, Chenopodaceæ.

ECHINOPSIS, ek-e-nop'sis, *s.* (*echinos*, and *opsis*, resemblance, Gr.) A genus of plants: Order, Cactaceæ.

ECHINOPTERIS, ek-e-nop'ter-is, *s.* (*echinos*, and *pteris*, a fern, Gr.) A genus of plants: Order, Malpighiaceæ.

ECHINORHYNCHUS, ek-e-no-ring'kus, *s.* (*echinos*, and *rhynchos*, a snout, Gr.) A genus of intestinal worms: Family, Acanthocephala.

ECHINOSPERMUM, ek-e-no-sper'mum, *s.* (*echinos*, and *sperma*, a seed, Gr. in allusion to the seeds or nuts being echinated.) A genus of plants, consisting of scabrous, annual, or biennial-branched erect plants, with small blue flowers, allied to Myosotis, or Forget-me-not: Order, Boraginaceæ.

ECHINUS, e-ki'nus, *s.* (*echinos*, a hedgehog, Gr.) Sea-urchins, a genus of the Echinodermata, which have the body invested by a shell, or calcareous crust, composed of angular pieces, which join each other exactly, and are perforated by innumerable holes, for the transmission of the membranous feet, disposed in several very regular ranges. The true Echini have the anus opposite the mouth. In Architecture, the same as the ovola, or quarter round; but the moulding is only properly so called when carved with eggs and anchors. In Botany, a genus of plants: Order, Euphorbiaceæ.

ECHIOCHILON, e-ke-o-ki'lon, *s.* (from *echion*, the plant bugloss, and *cheilos*, a lip, Gr. in reference to the bilabiate limb of the corolla, and its affinity to bugloss.) A genus of plants: Order, Boraginaceæ.

ECHIS, ek'is, *s.* (*echis*, a viper, Gr.) A genus of poisonous snakes, with small scales on the head, and having single subcaudal plates: Family, Crotalidæ.

ECHITES, e-ki'tis, *s.* (*echis*, a serpent, Gr. from its deleterious qualities, or twining habit.) A genus of plants, with showy white, yellow, or purple flowers: Order, Apocynaceæ.

ECHIUM, e'ke-um, *s.* (*echis*, a viper, Gr. from its having been supposed able to cure the bite of a serpent, or from having the appearance of a serpent's head.) Bugloss, a genus of rough, shrubby, or herbaceous plants, with violet-coloured or white flowers: Order, Boraginaceæ.

EISEL, e'sil, *s* (Saxon.) Vinegar.—Obsolete.

> Like a willing patient, I will drink
> Potions of *eysel*, 'gainst my strong infection.—
> *Shaks.*

EISTEDDFOD, e-sted'fod, *s.* (from *eistedd*, to sit, Welsh.) A name given in former times to the meetings of the Welsh bards. The judges for the distribution of the prizes were appointed by the Welsh princes, and, after the Conquest, by the English kings—the last appointment was issued in 1568; but they are partly revived by the Gwynnedigion and Cambrian Society, which meet annually for adjudging prizes for poetical recitations and performances on the harp.

EITHER, e'thur, *a.* or *pro.* (*æyther*, Sax.) One or another of any number; one of two; each; every one separately considered. This word, when applied to sentences or propositions, is termed a distributive or a conjunction. It precedes the first of two or more alternatives, and is answered by *or* before the second or succeeding alternatives.

EJACULATE, e-jak'u-late, *v. a.* (*ejacular*, Lat.) To throw out; to cast; to shoot; to dart.—Seldom used except to express the utterance of a short prayer or exclamation.

EJACULATION, e-jak-u-la'shun, *s.* The act of throwing or darting out with a sudden force and rapid flight;—(the foregoing sense is nearly obsolete;)—the uttering of a short prayer, or an ardent exclamation.

EJACULATOR, e-jak-u-la'tur, *s.* In Anatomy, an epithet applied to ducts which pass from the vesiculæ seminales, across the prostate gland and anterior parts of the veru montanum, and to two muscles connected with the urethra.

EJACULATORY, e-jak'u-la-tur-e, *a.* Suddenly darted out; uttered in short sentences; sudden; hasty; casting; throwing out.

EJECT, e-jekt', *v. a.* (*ejicio*, *ejectum*, Lat.) To throw out; to cast forth; to thrust out, as from a place enclosed or confined; to discharge through the natural passages or emunctories; to evacuate; to throw out or expel from an office; to dismiss from an office; to turn out; to dispossess of land or estate; to drive away; to expel; to dismiss with hatred; to cast away; to reject; to banish.

EJECTA, e-jek'ta, *s.* In old Law, a woman ravished, deflowered, or cast forth from virtuous society. *Ejectus*, a whoremonger.—*Blount.*

EJECTION, e-jek'shun, *s.* (*ejectio*, Lat.) The act of casting out; expulsion; dismission from office; dispossession; a turning out from possession by force or authority; evacuation; vomiting; rejection. In Physiology, the act of expulsion of the fæces, urine, and bronchial secretions. *Ejectione custodiæ*, a writ which anciently lay against any one who ejected the guardian from any land during the minority of the heir.

EJECTMENT, e-jekt'ment, *s.* Expulsion; a dispossession. In Law, a possessory action, by which a lessee for years, when ousted of his farm, may recover his term and damages. It is real in respect of the lands, but personal in respect of the damages. It is now the common method of trying the title to lands or tenements.

EJECTOR, e-jek'tur, *s.* One who ejects or dispossesses another of his land.

EJULATION, ed-ju-la'shun, *s.* (*ejulatio*, Lat.) Outcry; a wailing; a loud cry, expressive of grief or pain; mourning; lamentation.—Seldom used.

> With dismal groans
> And *ejulation*, in the pangs of death,
> Some call for aid.—*Philips.*

EKE, eke, *v. a.* (*eacan*, Sax.) To increase; to enlarge; to add to; to supply what is wanted; to enlarge by addition; to lengthen; to prolong;—*ad.* also; likewise; in addition.—Nearly obsolete as an adverb.

> 'Twill be prodigious hard to prove
> That this is *eke* the throne of love.—*Prior.*

EKEBERGIA, eke-ber'je-a, *s.* (in honour of Captain C. G. Ekeberg.) A genus of plants, with impari-pinnate leaves and white flowers: Order, Meliaceæ.

EKEBERGITE, eke-ber'jite, *s.* (in honour of M. Ekeberg, who termed it *sodalite*.) A mineral which occurs in compact or finely fibrous masses of a greenish, greyish, or brownish colour, and occasionally in thin laminæ; transparent; lustre vitreous or resinous. It consists of soda, 5.25; silica, 46; alumina, 28.75; lime, 13.50; protoxide of iron, 0.75; water, 2.25: sp. gr. 2.74.

EKING, e'king, *s.* Increase or addition.

ELA, e'la, *s.* In Music, the name formerly given to the highest note in the scale of Guido.

ELABORATE, e-lab'o-rate, *v. a.* (*elaboro*, Lat.) To produce with labour; to heighten and improve by successive endeavours or operations;—*a.* (*elaboratus*, Lat.) finished with great diligence; performed with great labour; studied; executed with exactness.

ELABORATELY, e-lab'o-rate-le, *ad.* With great labour or study; with nice regard to exactness.

ELABORATENESS, e-lab'o-rate-nes, *s.* The quality of being elaborate, or wrought with great labour.

ELABORATION, e-lab-o-ra'shun, *s.* Improvement by successive operations. In Physics, the various changes which substances undergo in the act of assimilation, from the action of the living organs, previously to their becoming subservient to the purposes of nutrition.

ELACATE, e-la'ka-te, *s.* A genus of fishes, in which the body is lengthened and slender; the mouth wide, with the under jaw longer than the upper; pectoral and caudal fins large: Subfamily, Centronotinæ.

ELÆAGNACEÆ, el-e-ag-na'se-e, *s.* (*elæagnus*, one

of the genera.) A natural order of Exogenous plants, consisting of trees or shrubs, usually covered with a leprous scurf; leaves alternate or opposite, and without stipules; flowers axillary, in catkins or panicles, sometimes fragrant; sepals two or four, sometimes united in a cap; stamens three, four, or eight, sessile; anthers two-celled; calyx free, tubular, with a fleshy disk; ovary free, simple, one-celled; ovule solitary and antropal; stigma simple, subulate, and glandular; fruit crustaceous.

ELÆAGNUS, el-e-ag'nus, *s.* (*elaia*, an olive, Gr. the trees having a striking resemblance to that of the olive.) A genus of plants: Type of the order Elæagnaceæ.

ELÆOCARPUS, el-e-o-kär'pus, *s.* (*elaia*, an olive, and *karpos*, fruit, Gr. from the nut being furnished with rugosities, which make it resemble the seed of the olive.) A genus of plants, consisting of trees with small fragrant flowers. The fruit is eatable, and the rugose stones are manufactured into necklaces: Order, Tiliaceæ.

ELÆODENDRON, el-e-o-den'dron, *s.* (*elaia*, and *dendron*, a tree, Gr.: the fruit is like that of the olive, and the seeds oily.) A genus of trees or shrubs, with smooth laurel-like leaves, and axillary panicles of greenish-white or yellowish-green flowers: Order, Celastraceæ.

ELÆODIC ACID, e-le-od'ik as'sid, *s.* A compound produced during the saponification of castor-oil.

ELÆOSACCHARUM, e-le-o-sak'a-rum, *s.* (*elaion*, oil, and *sacharon*, sugar, Gr.) An old term for a mixture of an essential oil with sugar.

ELÆOSELINUM, el-e-o-se-li'num, *s.* (*elaia*, an olive-tree, and *selinon*, parsley, Gr.) A genus of perennial Umbelliferous herbs with yellow flowers, constituting in Lindley's arrangement, with the genus Margotia, the family or tribe Elæoselinidæ.

ELÆOTERIUM, el-e-o-te're-um, *s.* (*elaion*, oil, Gr.) In ancient Architecture, an apartment in the ancient baths, in which the bathers anointed themselves.

ELAIDATE, e-la'e-date, *s.* A salt formed by the elaidic acid with a base.

ELAIDEN, e-la'e-din, *s.* (*elaion*, oil, Gr.) In Chemistry, a fatty matter produced by the action of nitric acid upon castor and certain other oils.

ELAIDIC ACID, e-la'id-ik as'sid, *s.* An acid, the result of the action of nitrate of mercury, and more especially of nitrous acid upon oleic acid.

ELAIDINE, e-la'e-din, *s.* A name given by Boudet to a substance resembling stearine, which results from the action of hyponitric acid upon olive, almond, and other oils.

ELAIN, e-la'in, *s.* That portion of fat or oil which remains in a liquid state when pressed out of hog's-lard or other solid fats; the oily principle of solid fats.

ELAIOMETER, e-lay-om'e-tur, *s.* (*elaion*, oil, and *metron*, a measure, Gr.) An instrument used for discovering adulteration in olive-oil.

ELAISS, el-a'is, *s.* (*elaia*, an olive, Gr.) The Oily Palm, a genus of plants: Order, Palmaceæ.

ELALDEHYDE, el-al'de-hide, *s.* A chemical product obtained when pure aldehyde is kept long, and loses its solubility in water. Its formula is C^{12}, H^{12}, O^{6}.

ELAMPING, e-lamp'ing, *a.* Shining.—Obsolete.

> As when the cheerful sun, *elamping* wide,
> Glads all the world.—*G. Fletcher.*

ELANCE, e-lans', *v. a.* (*elancer*, Fr.) To throw or shoot; to hurl; to dart.

ELAND.—See Bosephalus.

ELANOSAURES.—See Enalosaurians.

ELANUS, e-la'nus, *s.* (*elans*, sudden motion, Fr.) A genus of birds of the kite kind: Family, Falconidæ.

ELAOLITE, e-la'o-lite, *s.* (*elaion*, oil, and *lithos*, a stone, Gr.) A mineral of a dark-green, blueish-grey, or brick-red colour; translucent; resinous in lustre; often opalescent when cut. It consists of silica, 46.50; alumina, 30.25; lime, 0.75; potash, 4.73 to 18.00; soda, 0 to 16.88; oxide of iron, 1.00; water, 2; sp. gr. 2.54—2.62; H = 5.5—6.0.

ELAPHINE, el'a-fin, *a.* Pertaining to the stag; belonging to the genus Elaphus.

ELAPHRIUM, e-la'fre-um, *s.* (*elaphros*, contemptible, Gr. from the trees possessing no beauty, and the wood no value.) A genus of plants, with insignificant whitish-green or yellowish flowers: Order, Burseriaceæ.

ELAPHRUS, el'a-frus, *s.* A genus of Coleopterous insects: Family, Carabidæ.

ELAPHUS, el'a-fus, *s.* (*elaphos*, a stag, Gr.) The True Stags, a genus of ruminating animals of the deer kind, remarkable for the males possessing canine teeth; the horns are produced into three antlers, exclusive of the crown: Family, Cervidæ.

ELAPIDATION, e-lap-e-da'shun, *s.* (*elapidatio*, Lat.) The removal or clearing away of stones from a place.

ELAPS, e'laps, *s.* (Latin.) A genus of serpents, in which the head is narrow, the dorsal scales equal, the tail conical, and the subcaudal plates double.

ELAPSE, e-laps', *v. n.* (*elapsus*, Lat.) To slide away; to slip or glide away; to pass away silently, as time.

ELAPSINÆ, e-lap'se-ne, *s.* (*elaps*, one of the genera.) A subfamily of serpents, distinguished by wanting the power of dilating the jaws, which can hardly separate behind, in consequence of the shortness of their tympanic and mastoidian bones: Family, Coluberidæ.

ELAQUEATE, e-lak'kwe-ate, *v. a.* (*laqueus*, Lat.) To disentangle.

ELAQUEATION, e-lak-kwe-a'shun, *s.* (*elaqueo*, I unfold or set free from snares, Lat.) The act of setting free.

ELASMA, e-las'ma, *s.* (Greek.) A lamina or plate; a clyster-pipe.

ELASMOSE.—See Tellurium.

ELASMOTHERIUM, e-las-mo-*the're*-um, *s.* (*elasmos*, a plate, and *therion*, a wild beast, Gr.) In Palæzoology, a genus of extinct Pachyderms, characterized by the laminated structure of the teeth, and by being intermediate between the elephant and the horse.

ELASTIC, e-las'tik, } *a.* (*elastique*, Fr. *elastico*,
ELASTICAL, e-las'te-kal, } Span.) Having the power of returning to the form from which it is distorted or withheld; springing back; having the inherent property of recovering its former figure, after any external pressure, which has altered that figure, is removed; rebounding; flying back. *Elastic curve*, in Mechanics, the figure assumed by an elastic plate or laminæ, one end of which is fixed horizontally in a vertical plane, and the other loaded with a weight which, by its gravity, has a tendency to bend the plate.

ELASTICALLY, e-las'te-kal-le, *ad.* In an elastic manner; by an elastic power; with a spring.

ELASTIC GUM.—See Caoutchouc.

ELASTICITY, e-las-tis'e-te, *s.* The inherent property in bodies by which they recover their former figure or state, after external pressure, tension, or distortion.

ELASTOMA, e-las'to-ma, *s.* (*elastes*, and *stoma*, a mouth, Gr.) A genus of fishes in which the body is fusiform; mouth and teeth as in Serranus; eyes very large; caudal fin deeply forked: Family, Percidæ.

ELATE, e-late', *a.* (*elatus*, Lat.) Raised; elevated in mind; flushed as with success; lofty; haughty; —*v. a.* to raise or swell up the mind or spirits; to elevate with success; to puff up; to make proud; to exalt; to heighten.—Unusual in the last two senses.

> Or truth divinely breaking on his mind,
> *Elates* his being, and unfolds his power.—
> *Thomson.*

ELATE, e'la-te, *s.* (one of the names given by the Greeks to the membrane which envelopes the female flowers of the date.) A genus of plants: Order, Palmaceæ.

ELATEDLY, e-la'ted-le, *ad.* In a conceited manner, arising from success.

ELATER, e-la'tur, *s.* (*elater*, an impeller, Gr. in allusion to an elastic spine or spring which projects from the hinder extremity of the breast, by which the insect is enabled to spring up when it falls upon its back, and replace itself on its legs.) A genus of Coleopterous insects: Family, Elateridæ.

ELATERIDÆ, e-la-ter'e-de, *s.* (*elater*, one of the genera.) A family of Coleopterous insects, belonging to the section Sternoxi.

ELATERINE, e-lat'e-rin, *s.* The active principle of elaterium; the inspissated juice of the fruit of Monordica elaterium.

ELATERIOSPERMUM, e-la-te-re-o-sper'mum, *s.* (*elater*, an impeller, and *sperma*, a seed, Gr.) A genus of plants: Order, Euphorbiaceæ.

ELATERITE, e-lat'e-rite, *s.* Elastic mineral pitch, a brown massive variety of bitumen.

ELATERIUM, e-la-te're-um, *s.* (*elater*, an impeller, Gr. in reference to the elastic seed-vessels.) The Squirting Cucumber, a genus of plants, chiefly natives of Mexico: Order, Cucurbitaceæ. *Extract of elaterium*, when the Squirting Cucumber is gathered before it ripens, and the juice is gently expressed, a green sediment is deposited which is collected and dried: one-eighth of a grain operates as a drastic purge.

ELATEROMETER, e-la-ter-om'e-tur, *s.* (*elater*, and *metron*, a measure, Gr.) In Physics, an instrument for measuring the degree of diversity or rarefaction of air contained in the receiver of an air-pump.

ELATERY, el'a-tur-e, *s.* (*elater*, Gr.) Acting force, or elasticity.—Unusual.

ELATHERIA, e-la-*the*'re-a, *s.* A name sometimes given to the Cascarilla bark.

ELATINACEÆ, e-lat-e-na'se-e, *s.* (*elatine*, one of the genera.) The Water-peppers, a small natural order of Exogens, consisting of little annual plants growing in marshy places, with fistular creeping roots. The leaves are opposite, with stipules between the petioles; the flowers are polypetalous; sepals three or five; petals same number as the sepals; stamens hypogenous, and twice the number of the petals; ovary with three or five cells; fruit three or five-celled.

ELATINE, e-lat'ine, *s.* (*elate*, a fir, Gr. its fine leaves having been compared to those of a fir-tree.) Water-wort, a genus of singular water plants, with insignificant flesh-coloured flowers: Order, Elatinaceæ.

ELATION, e-la'shun, *s.* An inflation or elevation of mind proceeding from self-approbation; self-esteem, vanity, or pride, resulting from success; haughtiness; pride of prosperity.

ELATOBRANCHIA.—See Lamellibranchia.

ELATOR, e-la'tur, *s.* He or that which elates.

ELAXATE, e-laks'ate, *v. n.* (*elaxo*, Lat.) To loose; to widen.

ELAXATION, e-laks-a'shun, *s.* (*elaxatio*, Lat.) The act of loosing or untying.

ELBOW, el'bo, *s.* (*elnboga* or *elneboga*, Sax.) The outer angle made by the bend of the arm; any flexure or angle; the obtuse angle of a wall, building, or road; *to be at the angle*, is to be very near; to be by the side; to be at hand;—*v. a.* to push with the elbow; to push or drive to a distance; to encroach on;—*v. n.* to jut into an angle; to project; to bend. In Anatomy, the juncture of the cubitus and radius, or the outer angle made by the bend of the arm.

ELBOW-CHAIR, el'bo-tshare, *s.* A chair with arms to support the elbows; an arm-chair.

ELBOW-ROOM, el'bo-room, *s.* Room to extend the elbows on each side; perfect freedom from confinement; ample room for motion or action.

ELCESAITES, el-se-sa'tes, *s.* An ancient sect of heretics, named after their leader Elcesai. They worshipped but one God, observed the Jewish Sabbath, and rejected almost all the books of Moses, the prophets, and the writings of St. Paul. They made their appearance in the reign of Trajan.

ELD, eld, *s.* (*eld* or *æld*, Sax.) Old age; decrepitude; old people; persons worn out with age.—Obsolete.

> They count him of the green-hair'd *eld*.—*Chapman.*

ELDER, el'dur, *s.* The common English name of the trees and shrubs of the genus Ebulus.

ELDER, el'dur, *a.* (*ealder*, Sax.) The comparative degree of *eld*, now written *old*.—See Old. Older; senior; having lived a longer time; born, produced, or formed before something else; prior in origin; proceeding in the date of a commission; —*s.* one who is older than another or others; an ancestor; a person advanced in life, and who, on account of his age, experience, and wisdom, is selected for office. Among the Jews, *elders* were persons considerable for age, experience, and wisdom, as the seventy men associated with Moses in the government of the people: of the same class were those who afterwards held the first rank in the synagogue as presidents. In the first Christian churches, *elders* were persons who enjoyed offices or ecclesiastical functions; and the term includes apostles, pastors, presbyters, bishops, or overseers —hence the first councils of the Christians were called *presbyteria*, or *councils of elders*. In the Presbyterian churches, *elders* are officers who, with the ministers and deacons, compose the sessions of the kirk, and have authority to take cognizance of matters of religion and discipline.

ELDERLY, el'dur-le, *a.* Somewhat old; advanced beyond middle age; bordering on old age.

ELDERSHIP, el'dur-ship, *s.* Seniority; the state of being older; the office of an elder; presbytery; order of elders.

ELDEST, el'dest, *a.* (*ealdest*, Sax.) Superlative of *eld*, old. Oldest; most advanced in age; that was born before others.

ELDING, el'ding, *s.* (*ælan*, Sax.) Fuel.—A local term.

EL DORADA, el do-ra'da, *s.* (Spanish, the golden region.) A fabulous region, far surpassing all others yet discovered, formerly imagined to exist in the interior of South America.

ELEATIC, el-e-at'ik, *a.* An epithet applied to the philosophy of Xenophanes of Elea, the object of which was to confine the thoughts of its disciples to ideas of God, or the Being, as it is in itself. Instead of fixing their attention on external nature, they considered time, space, and change as mere illusions generated by the deceiving senses, and incapable of scientific explanation.

ELECAMPANE, el-e-kăm'pane, *s.* (from the officinal name *Enula campana.*) Inula helenium, one of the largest British herbaceous, composite herbs: Suborder, Tubuliflorœ.

ELECT, e-lekt', *v. a.* (*electus*, Lat.) To pick out; to select from among two or more; that which is preferred; to select or take for an office or employment; to choose from among a number; to select or manifest preference by vote or designation. In Theology, to designate, choose, or select as an object of mercy or favour; to choose; to prefer; to determine in favour of;—*a.* chosen; taken by preference from among two or more; chosen, but not inaugurated, consecrated, or invested with office. In Theology, chosen as an object of mercy; chosen, selected, or designated to eternal life; predestinated in the divine counsels;—*s.* one chosen or set apart. In Theology, applied to a person, or persons, chosen or designated by God to salvation—being predestinated to glory as the end, and to sanctification as the means; or to a nation or body set apart as a peculiar church and people.

ELECTANT, e-lek'tant, *s.* One who has the power of choosing.—Obsolete.

ELECTICISM.—See Eclecticism.

ELECTION, e-lek'shun, *s.* (*electio*, Lat.) The act of choosing; choice; the act of selecting one or more from others; the act of choosing a person to fill an office or employment by any manifestation of preference, as by ballot, uplifted hands, or *viva voce;* voluntary preference; free-will; liberty to act or not; power of choosing or selecting; discernment; discrimination; distinction; the ceremony of a public choice; the day of a public choice of officers; those who are elected. In Theology, divine choice; predetermination of God, by which persons are distinguished as objects of mercy, become subjects of grace, are sanctified, and prepared for heaven.

ELECTIONEER, e-lek-shun-eer', *v. a.* To make interest for a candidate at an election; to use arts for securing the election of a candidate.

ELECTIONEERER, e-lek-shun-eer'ur, *s.* One employed in securing votes, and otherwise using influence for the election of a candidate.

ELECTIONEERING, e-lek-shun-eer'ing, *s.* The arts or practices used in securing the election of a candidate for an office.

ELECTIVE, e-lek'tiv, *a.* Dependent on choice; bestowed or passing by election; relating to or consisting in choice or right of choosing; exerting the power of choice; selecting for combination, as an *elective attraction* or *affinity;* a tendency in bodies to unite with certain kinds of matter in preference to others.

ELECTIVELY, e-lek'tiv-le, *ad.* By choice; with preference of one to another.

ELECTOR, e-lek'tur, *s.* One who elects, or one who has the right of choice; a person who has, by law or constitution, the right of voting for an officer. In Germany, a title of certain princes who formerly elected the emperor.

ELECTORAL, e-lek'to-ral, *a.* Relating to election or electors.

ELECTORALITY.—See Electorate.

ELECTORATE, e-lek'to-rate, *s.* The dignity or territory of an elector in the German empire.

ELECTRA, e-lek'tra, *s.* A genus of Corallines, in which each articulation is composed of several cells, arranged in a ring: Family, Cellularii.

ELECTRE.—See Electron.

ELECTRESS, e-lek'tres, *s.* The wife or widow of an elector in the German empire.

ELECTRIC, e-lek'trik, *s.* (*elektron*, amber, Gr.) Any body or substance capable of exhibiting electricity by means of friction or otherwise, and of resisting the passage of it from one body to another. *Electric fishes*, fishes which, when touched, produce an electric shock; the most remarkable of which are the Torpedo gymnotus, and Silurus or Malapterurus electricus.

ELECTRIC, e-lek'trik, } *a.* (*electrique*, Fr.)
ELECTRICAL, e-lek'tre-kal, } Containing electricity, or capable of exhibiting it when excited by friction; in general, relating to electricity; derived from or produced by electricity; communicating a shock like electricity.

ELECTRICALLY, e-lek'tre-kal-le, *ad.* In the manner of electricity, or by means of it.

ELECTRICIAN, e-lek-trish'an, *s.* One who studies electricity, and investigates its properties by observation and experiments; one versed in the science of electricity.

ELECTRICITY, e-lek-tris'e-te, *s.* A name given to a series of phenomena presented by certain substances, either naturally, or when excited by friction, consisting in the evolution of an extremely subtile fluid, which seems to be diffused through most bodies. It derives its name from the Greek word *elektron* (amber), which, when rubbed, has the property of attracting bodies. The name is given to the fluid as well as to the complicated phenomena which it presents.

ELECTRIFIABLE, e-lek'tre-fi-a-bl, *a.* Capable of receiving electricity, or of being charged with it; that may become electric; capable of receiving and transmitting the electrical fluid.

ELECTRIFICATION, e-lek-tre-fe-ka'shun, *s.* The act of electrifying, or state of being charged with electricity.

ELECTRIFY, e-lek'tre-fi, *v. a.* To communicate electricity to; to charge with electricity; to cause electricity to pass through; to affect by electricity; to give an electric shock to; to excite suddenly; to give a sudden shock;—*v. n.* to become electric.

ELECTRINE, e-lek'trin, *a.* (*electrum*, Lat.) Belonging to amber.

ELECTRIZATION, e-lek-tre-za'shun, *s.* The act of electrizing.

ELECTRIZE, e-lek'trize, *v. a.* (*electriser*, Fr.) To electrify.

ELECTRO, e-lek'tro, *a.* In Composition, a word affixed to others, denoting their connection with electricity, as—*Electro-chemistry*, that portion of chemical science which treats of the agency of electricity and galvanism in the production of chemical phenomena. *Electro-dynamics*, the phenomena of electricity of motion. *Electro-magnetic*, designating what pertains to magnetism, as connected with electricity, or affected by it. *Electro-magnetism*, the agency of electricity and galvanism in communicating magnetic properties. *Electro-metallurgy*, the application of electricity and galvanism to the operations of gilding, plating, &c. *Electro-motion*, passage of the electric fluid from one body to another. *Electro-motive*, producing electro-motion. *Electro-negative*, possessing the property of being repelled by bodies negatively electrified, and attracted by those positively electrified. *Electro-polar*, applied to conductors, one end of which is positive, and the other negative. *Electro-positive*, the opposite of electro-negative. *Electro-puncturation*, the operation of inserting two or more needles in a part or organ affected, and then touching them with the wires from the poles of a galvanic machine. *Electro-silure.*—See Malapterurus.

ELECTRODE, e-lek'trode, *s.* (*elektron*, and *odos*, away, Gr.) A name given by Prof. Faraday to a surface by which electricity passes in and out of other media.

NOTE.—Besides the term *Electrode*, Prof. Faraday has lately introduced the following in connection with the same subject:—*Anode*, (from *ana*, up,) the point or surface at which electricity enters; and *cathode*, (*kata*, down,) the point out of which electricity passes. The elements of an electrolyzed body are termed *ions*—that which goes to the anode, *anion*—and that which passes to the cathode, *cation*; thus, if water be electrolyzed, oxygen and hydrogen are *ions*, the former an *anion*, the latter a *cation*.

ELECTROLYTE, e-lek'tro-lite, *s.* (*elektron*, and *lyo*, I set free, Gr.) A substance susceptible of direct decomposition by the action of the electric current.

ELECTROLYZE, e-lek'tro-lize, *v. a.* (*elektron*, and *lyo*, Gr.) To decompose a compound substance by the direct action of galvanism.

ELECTROMETER, e-lek-trom'e-tur, *s.* (*electrum*, Lat. and *metron*, a measure, Gr.) An instrument for measuring the quantity or intensity of electricity, or its quality; or an instrument for discharging it from a jar.

ELECTROMETRICAL, e-lek-tro-met'tre-kal, *a.* Pertaining to an electrometer; made by an electrometer.

ELECTROMOTOR, e-lek-tro-mo'tur, *s.* (*electrum*, and *motor*, Lat.) A mover of the electric fluid; an instrument or apparatus so called.

ELECTRON, e-lek'tron, *s.* (Greek.) Amber.—See Electrum.

ELECTROPHORUS, e-lek-trof'o-rus, *s.* (*elektron*, and *phero*, I carry, Gr.) An instrument, consisting of a flat cake of resin, having a plate of brass, with a glass handle placed upon it. The resin is rendered negatively electrical by friction, and the brass-plate becomes electro-polar by induction. The brass-plate, if touched by the finger whilst lying upon the resin, and lifted off by its glass handle, gives a spark of positive electricity. The instrument is used as a convenient substitute for the electric machine, particularly in inflaming a jet of hydrogen gas in Volta's inflammable air-lamp.

ELECTROSCOPE, e-lek'tro-skope, *s.* (*elektron*, and *skopeo*, I view, Gr.) An instrument by which electrical attraction and repulsion is rendered apparent, as in the gold-leaf electrometer.

ELECTROTINT, e-lek'tro-tint, *s.* A method of etching by galvanism, in which a paint or pigment is used, possessing the properties of working freely, lying on without spreading, and resisting the action of sulphate of copper: a composition of white wax, lard, lamp-black, olive-oil, and turpentine, is said to answer the purpose well. The plate used is of some mixed metal, presenting a white surface, such as German silver. The artist sketches his design on the dull white surface by means of brushes and composition. All the parts which are white in the impression, are left uncovered by the paint. When the picture is finished, it is coated with black-lead, and exposed to the electro-coppering process, by which a plate is produced for working in the copperplate press, having the lines of the device marked in intaglio, or sunken.—*Pen. Cyc.*

ELECTROTYPE, e-lek'tro-tipe, *s.* The art of executing fac-simile medals by electricity. *Electro-plating*, a process by which a pattern, cast in alloy or white metal, composed of copper, nickel, and zinc, hard, white, and fusible only at a high temperature, after being properly chased and prepared, and dipped in a vessel containing a solution of phosphorus, is transferred to a tank or trough, and subjected to galvanic agency. In the tank is a chemical solution of silver; and the wires of a galvanic battery are so arranged that the current, in completing its circuit, must necessarily pass through the solution. The result is, the solution is decomposed, and a fine film of metallic silver is deposited on the surfaces of the articles suspended in the trough.—For further information, see *Sup. Pen. Cyc.*

ELECTRUM, e-lek'trum, *s.* (Latin, from *elektron*, Gr.) Argentiferous gold ore, a variety of gold ore of a pale brass colour. According to Pliny, the electrum of the ancients was a mixture of gold and silver; also, amber.

ELECTUARY, e-lek'tu-ar-e, *s.* (*electuarium*, Lat.) In Pharmacy, a powder mixed up with sirup, &c., so as to be of the consistency of honey.

ELEDONA, e-led'o-na, *s.* A genus of Coleopterous insects: Family, Taxicornes.

ELEDONE, e-led'o-ne, *s.* (Greek.) A genus of Cephalopods, distinguished by having a single row of suckers on each arm.

ELEEMOSYNARY, el-e-moz'e-na-re, *a.* (*elemosyne*, Gr.) Given in charity; given or appropriated to support the poor; relating to charitable donations; intended for the distribution of alms, or for the use and management of donations, whether for the subsistence of the poor, or for the support and promotion of learning;—*s.* one who subsists on alms or charity. *Eleemosynary corporations*, corporations constituted for the perpetual distribution of free alms, or the bounty of their founder, to such persons as he has directed.

ELEGANCE, el'e-gans, } *s.* (*elegantia*, Lat.) The
ELEGANCY, el'e-gan-se, } beauty of propriety, not of greatness: beauty rather soothing than striking; beauty without grandeur; in a general sense, that which pleases by its symmetry, purity, or beauty; applied to manners or behaviour, it de-

notes that fine polish, politeness, or grace, the result of a good education, and an association with well-bred company; applied to speaking, it is propriety of diction and utterance, and the gracefulness of action or gesture. In Composition, it consists in correct, appropriate, and rich expressions, or well-chosen words, arranged in a happy manner. In Architecture, the due symmetry and distribution of the parts of an edifice.

ELEGANT, el'e-gant, *a.* (*elegans*, Lat.) Polished; neat; pure; rich in expression; pleasing to good taste; graceful; refined; polite; uttering or delivering elegant language with propriety and grace; symmetrical; regular; well-formed in its parts, proportions, and distribution; nice; sensible to beauty; discriminating beauty from deformity or imperfection; beautiful in form and colours; pleasing; rich; costly and ornamental.

ELEGANTLY, el'e-gant-le, *ad.* In a manner to please; with elegance; with beauty; with pleasing propriety; with due symmetry; with well-formed and duly proportioned parts; richly; with rich or handsome materials well disposed.

ELEGIA, el-e'je-a, *s.* (*elegos*, lamentation, Gr. from the sad and mourning colour of the plants.) A genus of cord-leaf plants: Order, Restiaceæ.

ELEGIAC, el-e-ji'ak, *a.* (*elegia*, Lat.) Belonging to elegy; plaintive; expressing sorrow or lamentation; used in elegies;—*s.* elegiac verse.

ELEGIACAL, el-e-ji'a-kal, *a.* Belonging to an elegy.

ELEGIAST, el-e-ji'ast, } *s.* A writer of elegies.
ELEGIST, el'e-jist, }

ELEGIT, el'e-jit, *s.* In Law, a writ of execution which lies for a person who has recovered debt or damages; or upon recognizance in any court, against a defendant that is not able to satisfy the same in his goods, directed to the sheriff, commanding him to make delivery of a moiety of the party's land and all his goods, except beasts of the plough, the creditor holding the moiety of the land until satisfaction be obtained, during which he is termed tenant by *elegit*.

ELEGY, el'e-je, *s.* (*elegia*, Lat.) A plaintive poem, or a funeral song; a poem or a song expressive of sorrow and lamentation; a short poem without points or affected elegancies.

ELEIOTIS, el-e-i-o'tis, *s.* (*eleios*, a dormouse, and *ous*, *otos*, an ear, Gr.) A genus of Leguminous plants: Suborder, Papilionaceæ.

ELEMENT, el'e-ment, *s.* (*elementum*, Lat.) The first or constituent principle, or minutest part of anything; an ingredient; a constituent part of any composition; in a chemical sense, an atom; the minutest particle of a substance; that which cannot be divided by chemical analysis, and therefore considered as a simple substance, as oxygen, hydrogen, nitrogen, &c.: in the plural, the first rules or principles of an art or science; in a popular sense, fire, air, earth, and water are called the four elements, as it was formerly supposed that these constitute the four simple bodies of which the world is composed; the substance which forms the natural or most suitable habitation of an animal; the proper state or sphere of anything; the state of things suited to one's temper or habits; the matter or substances which compose the world; the outline or sketch, as the *elements* of a plan; moving cause or principle; that which excites action; *element*, in the singular, is sometimes used for the air;—*v. a.* to compound of elements or first principles; to constitute; to make as a first principle. —Seldom or never used as a verb.

His very soul was *elemented* of nothing but sadness.—*Walton.*

ELEMENTAL, el-e-men'tal, *a.* Pertaining to elements; produced by some of the four supposed elements, as *elemental* war; produced by elements; arising from first principles.

ELEMENTALITY, el-e-men-tal'e-te, *s.* Composition of principles or ingredients.

ELEMENTALLY, el-e-men'tal-le, *ad.* According to elements; literally.

ELEMENTARITY, el-e-men-tar'e-te, } *s.* The
ELEMENTARINESS, el-e-men'tar-e-nes, } state of being elementary; the simplicity of nature; uncompounded state.

ELEMENTARY, el-e-men'ta-re, *a.* Primary; simple; uncompounded; uncombined; having only one principle or constituent part; initial; rudimental; containing, teaching, or discussing first principles, rules, or rudiments; treating of elements; collecting, digesting, or explaining principles. *Elementary substances:* There are fifty-five simple or elementary substances at present known; that is, substances which, under any conditions yet applied to them, are found to be incapable of further analysis, and are therefore called simple or elementary substances. Five of these exist in a separate state as gases—namely, oxygen, hydrogen, chlorine, nitrogen, and fluorine; the last, however, of these has not yet been obtained in a separate state, and is only known to be a distinct substance from the qualities of the compounds it forms with other matter. Seven are non-metallic solids and liquids —namely, sulphur, phosphorus, selenium, boron, carbon, bromine, and iodine; of these, the two last, bromine and iodine, are either gaseous, liquid, or solid, according to the temperature. Sulphur, phosporous, selenium, boron, and carbon are solids, but differ from the remaining forty-one in being non-conductors of electricity. Of the remainder, thirteen are metallic or metalloid bodies, uniting with oxygen to form the earths and alkalies —namely, sodium, aluminum, magnesium, calcium, lithium, potassium, glucinum, barium, silicum, thorinum, strontium, yttrium, zirconium. Twenty-nine are what are commonly called metals; of these, five—namely, iron, tin, cadmium, zinc, and manganese—decompose water at a red heat; the others do not decompose water—namely, arsenic, antimony, copper, molybdenum, uranium, telurium, chromium, cerium, nickel, vanadium, cobalt, lead, tungstenum, titanium, mercury, columbium, bismuth, osmium, silver, palladium, rhodium, platinum, gold, iridium. To the class of metals an addition has recently been made by the discovery of *lantane*, which makes the fifty-fifth elementary body.

ELEMI, el'e-mi, *s.* The resinous exudation of the plant Amyris eleminifera. The compound *elemi ointment* of the pharmacopœia, is a preparation of this substance.

ELENCH, e-lengk', *s.* (*elenchus*, Lat.) A vicious or fallacious argument, which is apt to deceive under the appearance of truth; a sophism.—(Seldom used.)

All your *elenchs* in logic come within the compass of juggling.—*Selden.*

In Antiquity, a kind of earring set with pearls.

ICAL, e-leng'ke-kal, *a.* Relating to an

ICALLY, e-leng'ke-kal-le, *ad.* By means of nch.—Obsolete.

TICAL, e-lengk'te-kal, *a.* Serving to con-—Obsolete.

TUS, e-leng'kus, *s.* (Latin.) In Rhetoric, a m. In Antiquity, an earring set with pearls. ology, a genus of Mollusca, in which the shell oth; the spire considerably lengthened; body comparatively smaller; the base of the pillar a slight angle or an obsolete tooth; the re very brilliant; Family, Trochidæ.

'HORUS, e-len-of'o-rus, *s.* (*elene*, a lamp, and I carry, Gr.) A genus of Coleopterous in-belonging to the section Heteromera: Family, toma.

LARIS, el-e-ok'a-ris, *s.* (Meaning not given r. Brown, the author of the term.) A genus nts: Order, Cyperaceæ.

IS, e-le-ot'ris, *s.* A genus of fishes: Fa-Gobidæ.

ANT, el'e-fant, *s.* (*elephas*, Gr.) The popu-me of the quadrupeds of the genus Elephas. ich see. *Order of the white elephant*, a very t Danish order of knighthood, restricted to knights, besides the members of the royal r. *Elephant beetle*, a large species of the pterous insects belonging to the genus Scara-

ANT-APPLE.—See Feronia.

ANTIASIS, el-e-fan-ti'a-sis, *s.* A disease affects the legs and feet, so as to occasion ng, with roughness and scales upon the skin, gets thick, unctuous, and insensible; the ometimes attains an enormous size, which ccasioned it to be compared to the foot of ephant—hence the name.

ANTINE, el-e-fan'tin, *a.* Relating to the nt; huge; resembling an elephant, or per-white like ivory. In ancient Rome, an ap-ion given to certain books in which the ns registered the transactions of the senate, trates, emperors, and generals; so called, per-from being made of ivory.

ANTOID, el-e-fan'toyd, *s.* (*elephas*, and *eidos*, ss, Gr.) A thing which has the form of an nt.

ANTOIDAL, el-e-fan-toy'dal, *a.* Having the f an elephant.

ANTOPUS, el-e-fan'to-pus, *s.* (*elephas*, an nt, and *pous*, a foot, Gr. in reference to the l leaves bearing some resemblance to the foot elephant.) Elephant's-foot, a genus of her-us composite plants: Suborder, Tubulifloræ.

ANT PAPER, el'e-fant pa'pur, *s.* Drawing —size, twenty-eight inches by twenty-three.

ANT'S-FOOT.—See Elephantopus.

AS, el'e-fas, *s.* (*elephas*, an elephant, Gr. from semblance of the upper lip of the corolla to oboscis of that animal.) A genus of plants, ting of erect, annual, hairy-branched plants, pposite serrated leaves, and yellow flowers mes or spikes: Order, Rhinanthaceæ. Also, ephant, a genus of proboscidean Pachyderms, the largest of all living terrestrial mammalia. ants are furnished with a proboscis; they ithout canines or incisors, but have two large tusks implanted in the incisive bone. There are two species extant—*E. Indicus* and *E. Africanus*, and one extinct, all of which differ in the form of the teeth.—See Mammoth.

ELEPHASTOMA, el-e-fas'to-ma, *s.* (*elephas*, an elephant, and *stoma*, a mouth, Gr.) A genus of Coleopterous insects: Family, Lamellicornes.

ELETTARIA, e-let-ta're-a, *s.* (*ela*, Sanscrit name.) A genus of Indian plants, which yield the lesser cardamoms: Order, Zingiberaceæ.

ELEUSINIAN, e-lū-sin'e-an, *a.* (*Eleusis*, a town in Greece.) A term applied to the mystic rites anciently performed yearly, in honour of Ceres and Proserpina, at the Attic town of Eleusis.

ELEUTHEROSPERMUM, el-u-*ther*-o-sper'mum, *s.* (*eleutheros*, free, and *sperma*, a seed, Gr.) A genus of plants: Order, Apiaceæ, or Umbelliferæ.

ELEVATE, el'e-vate, *v. a.* (*elevo*, Lat.) In a general sense, to raise; to raise from a low or deep place to a higher; to exalt; to raise to a higher state or station; to improve, refine, or dignify; to raise from or above low conceptions; to raise from a low or common state; to elate with pride; to excite; to cheer; to animate; to raise from any tone to one more acute; to augment or swell; to make louder, as sound; to detract; to lessen by detraction;—(obsolete in the last two senses;)—*a.* (*elevatus*, Lat.) elevated; raised aloft.

ELEVATION, el-e-va'shun, *s.* (*elevatio*, Lat.) The act of raising or conveying from a lower or deeper place to a higher; the act of exalting in rank, degree, or condition; exaltation; an elevated state; dignity; exaltation of mind by more noble conceptions; exaltation of style; lofty expressions; words and phrases expressive of lofty conceptions; exaltation of character or manners; attention to objects above us; a raising of the mind to superior objects; an elevated place or station; elevated ground; a rising ground; a hill or mountain; a passing of the voice from any note to one more acute; also, a swelling or augmentation of voice. In Astronomy, altitude; the distance of a heavenly body above the horizon, or the arc of a vertical circle intercepted between it and the horizon. In Gunnery, the angle which the chace of a cannon or mortar, or the axis of the hollow cylinder, makes with the plane of the horizon. In Dialling, the angle which the style makes with the substyler line. In Architecture, a view or perspective of an edifice; a front view of a building or object, drawn to a scale, without regard to perspective; height above the ground. *Elevation of the host*, in Catholic countries, that part of the mass in which the priest raises the host above his head for the people to adore.

ELEVATOR, el'e-vay-tur, *s.* One who raises, lifts, or exalts. In Anatomy, a muscle which raises any part to which it is attached; a surgical instrument for raising depressed portions of the skull, formerly termed an *elevatorium* or *elevatory*. In Milling, a series of boxes fastened to a strap, and moved by a wheel, to raise grain, meal, &c., to a higher floor.

ELEVATORY, el'e-vay-tur-e, *s.* An instrument used in trepanning, for raising a depressed or fractured part of the skull;—*a.* tending to raise, or having power to elevate.

ELEVE, el-eve', *s.* (French.) One brought up or protected by another.

ELEVEN, e-lev'vn, *a.* (*ændlefene*, Sax. *elleve*, Dan.) Ten, and one added.

ELEVENTH, e-lev'vn*th*, *a.* (*ændlyfta*, Sax. *ellevte*, Dan.) The next in order to the tenth.

ELF, elf, *pl.* ELVES, *s.* (*ælf*, or *elfenne*, Sax.) A wandering spirit; a fairy; a hobgoblin; an evil spirit; a devil; a dwarf. An imaginary being, which our rude ancestors imagined to haunt groves, solitary ruins, and other sequestered spots. The elf was invested by superstition with great sprightliness and eccentricity, and not unfrequently with a disposition for working mischief;

> Every *elf*, and fairy sprite,
> Hop as light as bird from brier.—*Shaks.*

—*v. a.* to entangle hair in so intricate a manner that it cannot be unravelled—(this the vulgar have supposed to be the work of fairies in the night).

> *Elf* all my hair in knots.—*Shaks.*

ELF-ARROW, elf'ar-ro, } *s.* A name given to flints
ELF-BOLT, elf'bolte, } in the shape of arrow-heads, vulgarly supposed to be shot by fairies.

ELFIN, elf'in, *a.* Relating or pertaining to elves; —*s.* a little urchin.

ELFISH, elf'ish, *a.* Resembling elves; clad in disguise.

ELF-LOCK, elf'lok, *s.* A knot of hair supposed to be twisted by elves.

ELGIN MARBLES, el'gin măr'blz, *s.* A collection of ancient reliefs, statues, &c., which formed the decorations of the Parthenon at Athens, and are now preserved in the British Museum. They were sent to England, in 1812, by Lord Elgin, then ambassador at Constantinople, and purchased by the British Government in 1816. They are considered as the first specimens of sculpture in the world.

ELICHRYSUM, e-le-kris'um, *s.* (*elios*, the sun, and *chrysos*, gold, Gr. in allusion to the brilliant yellow colour of the flowers.) A genus of plants, natives of the Cape of Good Hope: Order, Asteraceæ, or Compositæ.

ELICIT, e-lis'sit, *v. a.* (*elicio*, Lat.) To draw out; to bring to light; to deduce by reason or argument; to strike out;—*a.* brought into act; brought from possibility into real existence,—Seldom used as an adjective.

ELICITATE, e-lis'se-tate, *v. a.* To elicit.—Obsolete.

> Thus may a skilful man hid truth *elicitate*.—*More.*

ELICITATION, e-lis-se-ta'shun, *s.* The act of eliciting; the act of drawing out.

ELIDE, e-lide', *v. a.* (*elido*, Lat.) To break or dash in pieces; to crush; (obsolete in the foregoing senses;) to cut off a syllable.

ELIEA, e-le'a, *s.* (in honour of M. Elie de Beaumont, the geologist.) A genus of shrubs, with cruciately opposite-jointed branches and leaves, and cymbose yellow flowers: Order, Hypericaceæ.

ELIGIBILITY, el-e-je-bil'e-te, *s.* Worthiness or fitness to be chosen; the state or quality of a thing which renders it preferable to another, or desirable; the state of being capable of being chosen to an office.

ELIGIBLE, el'e-je-bl, *a.* (French.) Fit to be chosen; worthy of choice; preferable; suitable; proper; desirable; legally qualified to be chosen.

ELIGIBLENESS, el'e-je-bl-nes, *s.* Fitness to be chosen in preference to another; suitableness; desirableness.

ELIGIBLY, el'e-je-ble, *ad.* In a manner to be worthy of choice; suitably.

ELIGURITION, e-lig-u-rish'un, *s.* The act of devouring.—Not used.

ELIMATE, el'e-mate, *v. n.* To polish; to cut off with a file.—Not used.

ELIMATION, e-lim-a'shun, *s.* A polishing or filing off.—Not used.

ELIMINATE, e-lim'e-nate, *v. a.* (*elimino*, Lat.) To thrust out of doors; to expel; to thrust out; to discharge or throw off; to set at liberty.

ELIMINATION, e-lim-e-na'shun, *s.* The act of expelling or throwing off; the act of discharging or secreting by the pores. In Algebra, the process of reducing a number of equations, containing certain letters, to a smaller number, in which one or more letters shall not be found.

ELINGUID, e-ling'gwid, *a.* (*elinguis*, Lat.) Not having the power of speech.

ELIQUATION, el-e-kwa'shun, *s.* (*eliquo*, Lat.) In Chemistry, the operation by which a more fusible substance is separated from one that is less so, by means of a degree of heat sufficient to melt the one and not the other.

ELISENA, el-e-se'na, *s.* A genus of plants: Order, Amaryllidaceæ.

ELISION, e-lizh'un, *s.* (*elisio*, Lat.) In Grammar, the cutting off or suppression of a vowel at the end of a word, for the sake of sound or measure, when the next word begins with a vowel, as "th' embattled plain;" division; separation.—Obsolete in the last two senses.

ELISORS, e-li'zurz, *s. pl.* In Law, two persons appointed by the court to return a jury when the sheriff and the coroners have been challenged as incompetent. In this case the elisors return the writ of *venire* directed to them, with a panel of the jurors' names.—3 *Bl. Com.* 354.

ELITE, e-leet', *s.* (French.) A choice or select body.

ELIXATE, e-lik'sate, *v. a.* (*elixo*, Lat.) To extract by boiling.

ELIXATION, e-lik-sa'shun, *s.* (*elixus*, Lat.) The act of boiling or stewing; also, concoction in the stomach; digestion. In Pharmacy, the extraction of the virtues of ingredients by boiling or stewing; lixiviation.

ELIXIR, e-lik'sur, *s.* (*elecsir*, or *elikxir*, quintessence, Arab.) In Pharmacy, a word formerly applied to many compound tinctures, made by a solution of various pharmaceutical substances in alcohol, and perfectly analogous with the modern compound alcoholic tinctures. *Elixir of love*, a substance prepared at Aboyna, in the East Indies, from the minute farina-like seeds of the plant Grammatophyllum speciosum.

NOTE.—The following are a list of the principal *elixirs*:—*E. paregoricum*, or Tinctura camphoræ composita; *E. proprietatis*, the Elixir of Nature, or Tinctura aloes composita; *E. sacrum*, Sacred Elixir, or Tinctura rhei et aloes; *E. salutis*, Elixir of Health, or Tinctura sennæ; *E. stomachicum*, Stomachic Elixir, or Tinctura gentianæ compositæ; *E. vitrioli*, Acidum sulphuricum aromaticum; *E. longevitas*, of Dr. Jernitz of Sweden, an aromatic tincture with aloes; *E. arthritic*, of Cadet de Gassicourt, a mixture of the tinctures of aloes, guaiacum, and myrrh.

ELIZABETHA, e-le-za-beth'a, *s.* A genus of Leguminous plants: Suborder, Cæsalpinieæ.

ELIZABETHIAN, e-liz-a-beth'e-an, *a.* Relating to Queen Elizabeth, or the time in which she reigned.

ELK, elk, *s.* The Cervus alces of Linnæus; a large and stately species of deer, with palmated horns.

Fossil elk, a gigantic species of fallow-deer, found fossil in Ireland and the Isle of Man—now extinct. *Elk-wood*, a name given, in Virginia, to the soft, spongy wood of the Magnolia umbrella, or Umbrella-tree.

ELKE, elk, *s.* A wild swan; also, a kind of yew, of which bows were made, mentioned in the Stat. 32, Hen. VIII., cap. 9.

ELL, el, *s.* (*elne*, Sax. *ell*, *elle*, Dan.) A measure of length now superseded in the united kingdom by the imperial yard. The English ell is three feet nine inches, or one yard and a quarter; and the Flemish ell twenty-seven inches, or three quarters of a yard.

ELLAGIC ACID, el-la'jik as'sid, *s.* An acid existing in the gall nut, along with gallic acid. These acids separate from the aqueous infusion in the state of a yellowish crystaline mass; they are then separated by boiling water, which dissolves the gallic acid, and leaves the ellagic unacted upon. Formula, H2, C42, O32 = 76.

ELLEBORIN, el-leb'bo-rin, *s.* A resin of an extremely acrid taste, obtained from the plant Helleborus hymenalis.

ELLINGE, el'linj, *a.* (*æleng*, Sax.) Cheerless; sad. —Obsolete.

ELLIOTTIA, el-le-ot'te-a, *s.* (in honour of Stephen Elliot, a North American botanist.) A genus of plants, natives of North America: Order, Cyrillaceæ.

ELLIPSE, el-lips', } *pl.* ELLIPSES, *s.* (*elleipsis*,
ELLIPSIS, el-lip'sis, } Gr.) In Geometry, a figure generated from the section of a cone by a plane cutting both sides of it, but not parallel to the base. In Grammar, defect; omission; a figure of syntax, by which one or more words are omitted.

ELLIPSOGRAPH, el-lip'so-graf, *s.* (*elleipsis*, and *grapho*, I write, Gr.) An instrument for describing ellipses.

ELLIPSOID, el-lip'soyd, *s.* (*elleipsis*, and *eidos*, form, Gr.) In Geometry, an elliptical spheroid, being the solid generated by the revolution of an ellipse about either axis.

ELLIPSOIDAL, el-lip-soy'dal, *a.* Pertaining to an ellipsoid; having the form of an ellipsoid.

ELLIPSOLITHES, el-lip-so-lith'es, *s.* (*elleipsis*, an ellipse, and *lithos*, a stone, Gr.) A name given by Sowerby to certain fossil Cephalopods found in the carboniferous limestone.

ELLIPSOSTOMATA, el-lip-sos-tom'a-ta, *s.* (*elleipsis*, and *stoma*, a mouth, Gr.) A name given by Blainville to a family of Mollusca, the shells of which have an elliptical aperture.

ELLIPTIC, el-lip'tik, } *a.* Relating to an el-
ELLIPTICAL, el-lip'te-kal, } lipsis; having the form of an ellipse; oval; defective.

ELLIPTICALLY, el-lip'te-kal-le, *ad.* According to the figure called an ellipse; defectively.

ELLIPTIC COMPASSES, el-lip'tik kum'pas-sis, *s.* A mathematical instrument for describing an ellipsis.

ELLIPTICITY, e-lip-tis'e-te, *s.* The property of being elliptical. The term is used in the theory of the figure of the earth. It means the fraction which the excess of the axis major over the axis minor of an ellipse is to the axis minor itself.

ELLIPTOID, el-lip'toyd, *s.* In Geometry, an infinite or indefinite ellipse defined by the indefinite equation; as, $ym + n = bx^m (a - x)n$, where m and n are greater than 1.

ELLISIA, el-lis'e-a, *s.* (named by Linnæus in memory of John Ellis, F.R.S., author of a Treatise on Corallines.) A genus of plants, consisting of small North American annual herbs: Order, Hydrophyllaceæ.

ELLOBOCARPUS, el-lob-o-kär'pus, *s.* (*ellobos*, enclosed in a pod, and *karpos*, fruit, Gr. in allusion to the pod-like form of the divisions of the fronds on which the sori are placed.) A genus of Ferns: Order, Polypodiaceæ.

ELM, elm, *s.* (Saxon.) The Ulmus of botanists, a forest tree; the varieties most fit for cultivation are the common elm, the witch-elm, and witch-hazel. The timber is very hard, and is particularly useful in mill-work, and in all other work exposed to wet.

ELMEN, el'men, *a.* Of or belonging to elms.

ELMINTHES, el-min'*th*is, *s.* (*elmins*, *elminthos*, Gr.) Small intestinal worms.

ELMIS, el'mis, *s.* (*elmins*, a worm, Gr.) A genus of Coleopterous insects found in water, under stones, or on the leaves of the water-lily: Family, Clavicornes.

ELMY, el'me, *a.* Abounding with elms.

ELOCATION, el-o-ka'shun, *s.* (*eloco*, Lat.) A removal from the usual place of residence; a departure from the usual method; ecstasy.

ELOCUTION, el-o-ku'shun, *s.* (*elocutio*, Lat.) Pronunciation; the utterance or delivery of words, particularly in public discourses and arguments. In Rhetoric, elegance, composition, and dignity: the first embraces the purity and perspicuity of a language; the second ranges the words in proper order; and the last adds the ornaments of tropes and figures, to give strength and dignity to the whole; speech; the power of speaking.

ELOCUTIONARY, el-o-ku'shun-a-re, *a.* Pertaining to elocution, or containing it.

ELOCUTIONIST, el-o-ku'shun-ist, *s.* One who is versed in elocution, or who treats of the subject.

ELOCUTIVE, el'o-ku-tiv, *a.* Having the power of eloquent speaking.

ELODEA, e-lo'de-a, *s.* (*elos*, a marsh, Gr.; habitation of the plants of the genus.) A genus of plants which, in their vegetation, resemble Hypericum, but have the flowers usually red: Order, Hypericaceæ.

ELODES, e-lo'des, *s.* (*elos*, a swamp or marsh, Gr.) A term applied to the sweating fever, or sweating sickness, *Sudor Anglicus*.

ELOGE, el'oje, *s.* (French.) A funeral oration; a panegyric on the dead.

ELOGIST.—See Eulogist.

ELOGIUM. }
ELOGY. } —See Eulogy.

ELOHI, } e-lo'e, *s. pl.* ELOHIM. One of the names
ELOI, } given in Scripture to the Supreme Being. The same title is sometimes given to false gods, princes, and great men.

ELOIN, e-loyn', *v. a.* (*eloigner*, Fr.) In Law, to separate and remove to a distance; to convey to a distance, and withhold from sight.

ELOINATE, e-loy'nate, *v. a.* To remove.

ELOINMENT, e-loyn'ment, *s.* Removal to a distance; distance.

ELONG, e-long', *v. a.* To put far off; to retard.—Obsolete.

> Upon the roof the bird of sorrow sate,
> *Elonging* joyful day with her sad note.—
> *G. Fletcher.*

ELONGATA, e-long-ga'ta, *a.* (Latin.) In Law, an epithet used when the sheriff, to a writ of replevin, returns that the goods are carried a long way off to places to him unknown.—3 *Bl. Com.* 148.

ELONGATE, e-long'gate, *v. a.* (*elongo*, Lat.) To lengthen; to extend; to remove farther off;—*v. n.* to depart from; to recede; to move to a greater distance; to recede apparently from the sun, as a planet in its orbit.

ELONGATION, e-long-ga'shun, *s.* The act of stretching or lengthening; the state of being extended; distance; space which separates one thing from another; departure; removal; recession; extension; continuation. In Astronomy, the digression or recess of a planet from the sun, with respect to an eye supposed to see from our earth. The term is chiefly used in speaking of Venus and Mercury; the arch of a great circle, intercepted between either of these planets and the sun, being called the *elongation* of that planet from the sun. The greatest elongation of Mercury amounts to about 28½°, and that of Venus to 47° 48′. EOPSALTRIA, e-op-sawl'tre-a, *s.* (*eos*, the morning,

and *psalter*, a harper, Gr.) A genus of Australian birds: Family, Ampelidæ.

EOSTRE, e'os-ter, *s.* In Mythology, a Saxon goddess, to whom sacrifices were offered in the month of April, called the month of Eostra—hence the name of Easter, which was retained by the Saxons after their conversion to Christianity, by applying it to the festival celebrated in commemoration of the resurrection of Jesus Christ.

EP, ep, } (*epi*, Greek.) In Composition, an affix
EPI, e'pe, } usually signifying *on* or *upon*.

EPACRIDACEÆ, ep-a-kre-da'se-e, *s.* A natural order of monopetalous Exogens, nearly allied to that of Ericaceæ, or Heaths, with the small-leaved genera of which they entirely agree in habit, and from which they are scarcely distinguishable by any character, except that their anthers are one-celled.

EPACRIS, ep'a-kris, *s.* (*epi*, upon, and *akros*, the summit, Gr. in allusion to the habitation of the species on the tops of hills.) A genus of plants, consisting of small and usually glabrous shrubs, with axillary, white, or purplish flowers, generally disposed in leafy spikes: Type of the order Epacridaceæ.

EPACT, e'pakt, *s.* (*epaktos*, additional, Gr.) In Chronology, the excess of the solar month above the lunar synodical month, and of the solar year above the lunar year of twelve synodical months. The excess of the solar year above the lunar is 11 days; or the epact of any year expresses the number of days from the last new moon of the old year, which was the beginning of the present lunar year, to the 1st of January. On the first year of the cycle of the moon, the epact is 0, because the lunar year begins with the solar. On the second, the lunar year has begun 11 days before the solar year, therefore the epact is 11. On the third, it has begun twice 11 before the solar year, therefore the epact is 22. On the fourth, it begins three times 11 days sooner than the solar year, the epact would therefore be 33; but 30 days, being a synodical month, must that year be intercalated; or that year must be reckoned to consist of 13 synodical months, and there remain 3, which is the true epact of the year; and so on to the end of the cycle, adding 11 to the epact of the last year, and always rejecting 30, gives the epact of the present year. Thus, to adjust the lunar year to the solar, through the whole of 19 years, 12 of them must consist of 12 synodical months each, and 7 of 13, by adding a month of 30 days to every year when the epact would exceed 30, and a month of 29 days to the last year of the cycle, which makes in all 209 days, *i.e.*, 19×11; so that the intercalary or embolismal years in this cycle are 4, 7, 10, 12, 15, 18, 19.—*Mit. Port. Cyc.*

EPAGOGUE, ep'a-gog, *s.* (*epagoge*, from *epago*, I induce, Gr.) In Rhetoric, a figure of speech which consists in demonstrating universal propositions by particulars.

EPALLAGE, e-pal-la'je, *s.* (*epallageo*, I grieve, Gr.) A genus of Composite plants: Suborder, Tubulifloræ.

EPALPATE, e-pal'pate, *a.* In Entomology, destitute of palpi.

EPALTES, e-pal'tes, *s.* A genus of Composite plants: Suborder, Tubulifloræ.

EPANADIPLOSIS, e-pan-a-dip-lo'sis, *s.* (Greek.) In Rhetoric, a figure of speech, when the sentence begins and ends with the same words.

gender of nouns, as *hic et hæc parens*; a parent, father or mother.

EPICERASTIC, ep-e-se-ras'tik, *a.* In Medicine, demulcent; soothing; tending to diminish the acrimony of the humours.

EPICHARIS, ep-e-ka'ris, *s.* (*epicharis*, beautiful, Gr.) A genus of plants, consisting of beautiful tall trees —natives of Java: Order, Meliaceæ.

EPICHORDIS, ep-e-kawr'dis, *s.* (Greek, from *epi*, upon, and *chorde*, the gut.) The Mesentery.

EPICHORION, ep-e-ko're-un, *s.* (*epi*, and *chorion*, the skin, Gr.) A term anciently given to the epidermis, and lately, by Chaussier, to the deciduous membrane of the fœtus.

EPICHOROSIS, ep-e-ko-ro'sis, *s.* A term given by Mason Good to the maculæ of the skin.

EPICLINOUS, ep-e-klin'us, *a.* (*epicline*, Fr. from *epi*, and *kline*, a bed, Gr.) An epithet applied by Mirabel to a nectarine of a flower, when it is placed upon the receptacle.

EPICOCCUM, ep-e-kok'kum, *s.* (*epi*, and *kokkos*, a kernel, Gr.) A genus of Fungi: Tribe, Hyphomycetes.

EPICOLIC, ep-e-kol'ik, *a.* That part of the surface of the abdomen which lies over the colon. It has been called the *epicolic region*.

EPICONDYLUS, ep-e-kon'de-lus, *s.* (*epicondyle*, Fr. from *epi*, and *kondylos*, the condyle, Gr.) A name given by Chaussier to an eminence on the outer side of the cubital extremity of the humerus. It affords attachment to the exterior lateral ligament of the humero-cubital articulation, and to a strong tendon into which several muscles of the posterior region of the fore-arm are inserted.

EPICOROLLATE, ep-e-kor'ol-late, *a.* Having an epigynous corolla.

EPICOROLLIA, ep-e-ko-rol'le-a, *s.* A name given by Jussieu to two classes of plants, comprehending such as have an epigynous corolla.

EPICRANIAL, ep-e-kra'ne-al, *a.* An epithet applied to parts situated on the skull or cranium.

EPICRANITES, ep-e-kra'ne-tes, *s.* (*epikraino*, I finish, Gr.) In ancient Architecture, a name given by the Greeks to the tiles forming the cyma or upper member of the cornice of their temples.

EPICRANIUM, ep-e-kra'ne-um, *s.* (*epi*, and *kranion*, the cranium, Gr.) In Anatomy, a term usually applied to the occipito-frontales muscle, and by some writers to the skin of the head, and by others to the whole of the soft parts which form the scalp.

EPICRASIS, ep-e-kra'sis, *s.* (*epi*, and *kerannymi*, I temper, Gr.) The cure of diseases by soothing and demulcent remedies; also, according to Hooker, a critical evacuation of bad humours from the body.

EPICRIANTHES, ep-e-kre-an'*thi*s, *s.* (*epikranon*, a crest, and *anthos*, a flower, Gr.) A genus of plants: Order, Orchidaceæ.

EPICTENIUM, ep-ik-te'ne-um, *s.* (*epi*, and *kteis*, the pubes, Gr.) The parts above and about the pubes.

EPICTETIAN, ep-ik-te'shan, *a.* Relating to Epictetus, the Grecian writer.

EPICURE, ep'e-kure, *s.* (*epicurus*, Lat.) A follower of Epicurus; a man devoted to sensual enjoyments; one who indulges in the luxuries of the table.

EPICUREAN, ep-e-ku-re'an, *a.* (*epicureus*, Lat.) Pertaining to Epicurus; luxurious; given to luxury; contributing to the luxuries of the table;—*s.* a follower of the tenets of Epicurus, a Grecian philosopher who lived from 337 to 370 B.C., and taught during the latter half of his life at Athens. In the Epicurean philosophy, search after truth is proceeded in only by means of the senses, which are considered an infallible rule of truth, and termed the first natural light of mankind; atoms, space, and gravity are laid down as the first principles of all things. The existence of a God is not denied, but it is considered as beneath his notice to interest himself in human affairs. The supreme good of man is considered to consist in pleasure, by which the highest tranquillity, not the indulgence of lustful desires, and the perfect health of the body were understood. In the grosser sense, Epicureanism consists in the indulgence of bodily gratification and debauchery.

EPICUREANISM, ep-e-ku're-an-izm, *s.* Attachment to the doctrines of Epicurus.

EPICURISM, ep'e-ku-rizm, *s.* Luxury; sensual enjoyments; indulgence in gross pleasure; voluptuousness; the doctrines of Epicurus.

EPICYCLE, ep'e-si-kl, *s.* (*epi*, and *kyklos*, a circle, Gr.) In the ancient astronomical systems, a little circle whose centre is in the circumference of a greater circle.

EPICYCLOID, ep-e-si'kloyd, *s.* In Geometry, a curve generated by the revolution of the periphery of a circle along the convex or concave side of the periphery of another circle.

EPICYCLOIDAL, ep-e-si-kloy'dal, *a.* Pertaining to the epicycloid. *Epicycloidal wheel*, a method of converting circular into alternate motion by means of two wheels, the larger of which is toothed on the inner side, and firmly fixed to a framework. The smaller wheel is exactly half the diameter of the other, and revolves about its centre. While this revolution of the smaller wheel is taking place, any point whatever on its circumference will describe a straight line, or will pass and repass through a diameter of the circle once during each revolution; and thus a piston or a rod, or other reciprocating part, may be attached to any point on the circumference of the smaller wheel.—*Dic. of Arts and Sciences.*

EPICYEMA, ep-e-si-e'ma, } *s.* (*epi*, and *kyo*, I con-
EPICYESIS, ep-e-si-e'sis, } ceive, Gr.) Superfœtation.

EPIDEMIA, ep-e-de'me-a, } *s.* (*epi*, and *demos*, the
EPIDEMIC, ep-e-dem'ik, } people, Gr.) A disease arising from a general cause, and affecting many people at the same time in the same district. *Epidemics* are ordinarily dependent on the condition of the atmosphere or food.

EPIDEMIC, ep-e-dem'ik, } *a.* (*epi*, and *demos*,
EPIDEMICAL, ep-e-dem'e-kal, } the people, Gr.) Common to many people; generally prevailing; affecting great numbers.

EPIDENDRUM, ep-e-den'drum, *s.* (*epi*, and *dendron*, a tree, Gr.) A genus of plants: Order, Orchidaceæ.

EPIDERMIC, ep-e-der'mik, } *a.* Pertaining
EPIDERMICAL, ep-e-der'me-kal, } to the cuticle; covering the skin.

EPIDERMIS, ep-e-der'mis, *s.* (*epi*, and *derma*, the skin, Gr.) The delicate and transparent membrane which invests the whole surface of the skin.

It is destitute of nerves and blood-vessels. In Zoology, the thin pellicle which covers the exterior of plants and shells.

EPIDIDYMIS, ep-e-did'e-mis, *s.* (*epi*, and *didymos*, the testes, Gr.) The small oblong vermiform body which is situated on the superior border of the testes. It consists of a tube of great length, which receives all the semniferous trunks, and forms the commencement of the *vas deferens*.

EPIDOTE, ep'e-dote, *s.* (*epidosis*, addition, Gr. from an enlargement of the base of the crystal.) A mineral. The primary crystal is an oblique rhombic prism, variously terminated, and striated longitudinally; the colour is of various shades of green, greenish-grey, brownish-yellow, and blackish-red. It consists of silica, 37; alumina, 21; lime, 15; oxide of iron, 24; oxide of manganese, 1.5.

EPIDOTIC, ep-e-dot'ik, *a.* Relating to epidote, or containing it.

EPIDROMIA, ep-e-dro'me-a, *s.* (*epi*, and *dromaios*, running, Gr.) In Pathology, the afflux of humours, and particularly of conjestion of blood, to any part of the body.

EPIGÆA, ep-e-ge'a, *s.* (*epi*, and *gaia*, the earth, Gr. in allusion to the plant creeping on the ground.) A genus of plants: Order, Ericaceæ.

EPIGÆOUS, ep-e-je'us, *a.* (*epi*, and *gaia*, the earth, Gr.) In Botany, growing close on the earth.

EPIGASTRALGIA, ep-e-gas-tral'je-a, *s.* (*epigastrion*, the epigastrium, and *algos*, pain, Gr.) Pain in the epigastric region.

EPIGASTRIC, ep-e-gas'trik, *a.* (*epigastrion*, the upper part of the belly, Gr.) Pertaining to the upper and anterior part of the abdomen.

EPIGASTRIUM, ep-e-gas'tre-um, *s.* (*epigastrion*, from *epi*, and *gaster*, the belly or stomach, Gr.) In Anatomy, the superior part of the abdominal region.

EPIGASTROCELE, ep-e-gas-tro-se'le, *s.* (*epigastrion*, and *kele*, a hernial tumor, Gr.) Hernia in the epigastric region.

EPIGIGNOMENA, ep-e-je-no-me'na, *s.* (*epigignomai*, I succeed to, Gr.) In Pathology, symptoms which supervene in the progress of a disease, and are attributable to some error committed by the patient or his attendants.

EPIGLOTTIC, ep-e-glot'tik, *a.* Pertaining to the epiglottis.

EPIGLOTTIS, ep-e-glot'tis, *s.* (Greek.) In Anatomy, a thin, flexible, elastic cartilage of the larynx above the glottis. It is fixed by its lesser and lower extremity to the superior border of the thyroid cartilage and base of the tongue, and covers the *rima glottidis*, so as to prevent the introduction of food into that tube during the act of swallowing.

EPIGONI, e-pig'o-ne, *s.* (*epi*, in the sense of *after*, and *gignomai*, I am born, Gr.) The collective appellation given to the seven Grecian princes, who conducted the first war against Thebes without success.

EPIGRAM, ep'e-gram, *s.* (*epigramma*, an inscription, Gr.) A short poem treating only of one thing, and ending with some lively, ingenious, and natural thought. Epigrams were originally inscriptions on tombs, statues, temples, triumphal arches, &c.

EPIGRAMMATIC, ep-e-gram-mat'ik, } *a.* Writ-
EPIGRAMMATICAL, ep-e-gram-mat'e-kal, } ing epigrams; dealing in epigrams; suitable to epigrams; belonging to epigrams; like an epigram; concise; pointed; poignant.

EPIGRAMMATIST, ep-e-gram'ma-tist, *s.* One who composes epigrams, or deals in them.

EPIGRAPH, ep'e-graf, *s.* (*epi*, and *graphe*, a writing, Gr.) Among Antiquaries, an inscription on a building, pointing out the time of its erection, the builders, its uses, &c.

EPIGYNANTHUS, ep-e-je-nan'*th*us, *s.* (*epi*, *gyne*, a female, and *anthos*, a flower, Gr.) A genus of aquatic plants: Order, Naïadaceæ.

EPIGYNOUS, e-pij'e-nus, *a.* (*epi*, and *gyne*, a female, or, in botany, a pistil, Gr.) Having the stamens growing to the side of either the calyx or corolla, with an ovary inferior or nearly so.

EPILEPIS, ep'e-lep-is, *s.* (*epi*, and *lepis*, a scale, Gr.) A genus of Composite plants: Suborder, Tubulifloræ.

EPILEPSY, ep'e-lep-se, *s.* (*epelepsis*, from *epilambana*, I seize upon, Gr.) In Pathology, the falling sickness, a disease connected with cerebral or cerebro-spinal origin, and attended with extreme convulsions.

EPILEPTIC, ep-e-lep'tik, *a.* Pertaining to the falling sickness; affected with epilepsy; consisting of epilepsy;—*s.* one affected with epilepsy; a medicine useful in the cure of epilepsy.

EPILEPTICAL, ep-e-lep'te-kal, *a.* Convulsed; diseased by epilepsy.

EPILOBIUM, ep-e-lo'be-um, *s.* (*epi*, and *lobos*, a pod, Gr. from the flower being seated as it were on the top of the pod.) A genus of plants, consisting of herbs with axillary flowers, purple, rose, or flesh-coloured, rarely yellow: Order, Onagraceæ.

EPILOGISM, ep'e-lo-jizm, *s.* (*epilogismos*, Gr.) Computation; enumeration.

EPILOGISTIC, ep-e-lo-jis'tik, *a.* Pertaining to epilogue; of the nature of an epilogue.

EPILOGUE, ep'e-loge, *s.* (*epilogus*, Lat.) In Oratory, a conclusion; the closing part of a discourse, in which the principal matters are recapitulated. In the Drama, a speech or poem addressed to the spectators by one of the actors, after the conclusion of the play.

EPILOGUISE, ep'e-lo-gize, } *v. n.* To pronounce an
EPILOGISE, e-pil'o-jize, } epilogue.

EPILOGUISE, ep'e-lo-gize, *v. a.* To add to in the manner of an epilogue.

EPIMACHUS, ep-e-ma'kus, *s.* (*epimachos*, exposed to assault, Gr.) A genus of birds, belonging to the Promeropidæ, or Hoopoes: Family, Trochilidæ.

EPIMEDIUM, ep-e-me'de-um, *s.* (*epi*, upon, Gr. and *Media*, said to grow in Media.) Barren-wort, a genus of plants: Order, Berberidaceæ.

EPIMETHEUS, ep-e-me'*th*e-us, *s.* In Mythology, the son of Japetus and Clymene, one of the Oceanides, who inconsiderately married Pandora, by whom he had Pyrrha, the wife of Deucalion. He had the curiosity to open the box which Pandora had brought with her, and from thence issued a train of evils, which, from that moment, never ceased to afflict the human race. Hope was the only thing that remained at the bottom of the box, and it alone continues to comfort mankind under misfortune,—so runs the fable.

EPIMONE, ep'e-mo-ne, *s.* (Greek.) In Rhetoric, a figure of speech by which one thing is magnified above measure.

EPINEPHILUS, ep-e-nef'e-lus, *s.* (*epinephelos*, cloudy, Gr.) A genus of fishes: Family, Percidæ.

EPINYCTIS, ep-e-nik'tis, *s.* (*epi*, and *nyx*, night, Gr.)

A fugaceous kind of rash, which consists of vesicles rising during the night, and disappearing in the morning. The word is also written *Epinyctides*.

EPIPACTIS, ep-e-pak'tis, *s.* (*epipaktis*, the name of a species of Hellibore, Gr.) A genus of plants: Order, Orchidaceæ.

EPIPAROXYSMUS, ep-e-pa-rok-sis'mus, *s.* (*epi*, and *paroxymos*, a paroxysm, Gr.) In Pathology, an exacerbation of disease, superadded or almost immediately following the preceding paroxysm, as when febrile paroxysm occurs with unusual frequency.

EPIPASTIC, ep-e-pas'tik, *a.* (*epi*, and *spao*, I draw, Gr.) In Materia Medica, an epithet given to remedies, which, when applied to the skin, as in the application of cantharides or mustard, produce separation of the epidermis, and effusion of lymph.

EPIPEDOMETRY, ep-e-pe-dom'e-tre, *s.* (*epi*, *pous*, a foot, and *metron*, a measure, Gr.) The mensuration of figures standing on the same base.

EPIPETALOUS, ep-e-pet'a-lus, *a.* (*epi*, and *petalon*, a petal, Gr.) An epithet applied in Botany to any organ of a plant which is seated upon, or inserted into, the corolla or petal, as the stamens of Labiate plants are.

EPIPHANY, e-pif'a-ne, *s.* (*epiphaneia*, Gr.) A Christian festival, celebrated on the sixth day of January, and the twelfth after Christmas, in commemoration of the appearance of our Saviour to the Magi or philosophers of the east, who came to adore him and bring presents.

EPIPHEGUS, ep-e-fe'gus, *s.* (*epi*, and *phegos*, beach, Gr. the plant being parasitical on the roots of beeches.) American Beech-drops, a genus of plants: Order, Orobanchaceæ.

EPIPHENOMEN, ep-e-fe-nom'e-non, *s.* (*epi*, and *phainomai*, I appear suddenly, Gr.) In Pathology, a term applied to the symptoms which occur unexpectedly in a disease, the appearance of which is not requisite to determine its character.

EPIPHONEM, e-pif'o-nem, } *s.* (*epiphonema*, ex-
EPIPHONEMA, ep-e-fo-ne'ma, } clamation, Gr.) In Oratory, an exclamation; a vehement utterance of the voice to express strong passion, in a sentence not closely connected with the general strain of the discourse, as 'Oh, cruel fate! Oh, just retribution!'

EPIPHORA, e-pif'o-ra, *s.* (Greek.) In Rhetoric, a figure of speech in which the orator inveighs vehemently. In Logic, a conclusion or consequence drawn from the assumption in a syllogism. In Medicine, an impetuous flux of the humours; the watery eye; a superabundant secretion of tears.

EPIPHRAGMA, ep-e-frag'ma, *s.* (*epi*, and *fragma*, a partition, Gr.) A transverse membrane attached to the peristome of some mosses, as in Polytrichium.

EPIPHYLLOSPERMOUS, ep'e-fil-o-sperm'us, *a.* (*epi*, *phyllon*, a leaf, and *sperma*, a seed, Gr.) In Botany, an epithet applied to such plants as bear their organs of reproduction on the back of the leaves, as in the Polypodium and other ferns.

EPIPHYLLOUS, ep'e-fil-us, *a.* (*epi*, and *phyllon*, Gr.) An epithet applied in botany to plants, or parts of plants, when inserted upon the leaf. The *epiphyllous* fungi are those which vegetate on the leaves of other plants.

EPIPHYLLUM, ep-e-fil'um, *s.* (*epi*, and *phyllon*, a leaf, Gr. in reference to the flowers rising from the flat branches, which appear like leaves.) A genus of plants, with flowers usually large and showy, and often extremely beautiful: Order, Cactaceæ.

EPIPHYSIS, e-pif'e-sis, *s.* (*epi*, and *phyo*, I grow, Gr.) In Anatomy, an excrescence separated from the body of a bone by intervening cartilage, which characterizes all the long bones and many others in early years, but disappears in age, when *epiphysis* is converted into a process.

EPIPHYTAL, ep'e-fe-tal, *a.* Pertaining to an epiphyte.

EPIPHYTE, ep'e-fite, *s.* (*epi*, and *phyton*, a plant, Gr.) A plant which grows on other plants, as many of the Fungi do, from which they are termed Epiphytæ, by certain botanists.

EPIPLEROSIS, e-pip-le-ro'sis, *s.* (*epipleroo*, I overfill, Gr.) In Pathology, overfilling; extensive distension, as of the veins or arteries with blood.

EPIPLOCE, } e-pip'lo-se, *s.* (*epiploke*, Gr.) A figure
EPIPLOCY, } in Rhetoric, by which one aggravation or striking circumstance is added in due gradation to another; as, 'He not only spared his enemies, but continued them in his employment: not only continued them, but advanced them.'

EPIPLOCELE, e-pip-lo-se'le, *s.* (*epiploon*, the omentum, and *kele*, a hernial tumor, Gr.) Hernia of the omentum.

EPIPLOIC, e-pip'lo-ik, *a.* (*epiploon*, Gr.) Relating to the caul or omentum.

EPIPLOON, e-pip'loon, *s.* (Greek, from the verb *pleo*, I float.) The omentum or caul, so called from its floating on the intestines. It passes from the diaphragm, the liver, and the spleen, invests both surfaces of the stomach, and descending beyond the curvature of that organ, in front of the packet of small intestine, is reflected upward to the arch of the colon.

NOTE.—The following combinations of *epiploon*, omentum, with *kystis*, the bladder; *oschе*, the scrotum; *kele*, hernia; *ischion*, the ischium; *meros*, the thigh; and *sarx*, flesh, occur in the works of Kraus, &c.:—*Epiplo-cystoschecele*, scrotal hernia formed by omentum and bladder; *epiplo-enteroschecele*, hernia formed by omentum and bladder; *epiplo-ischiocele*, hernia formed by omentum through the ischiatic notch; *epiplo-merocele*, femoral hernia formed by omentum; *epiplo-sarcomphalus*, umbilical hernia formed by endurated and enlarged omentum; *epiplo-schеocele*, omental hernia contained in the scrotum.

EPIPOEIA, ep-e-po-e'ya, *s.* (Greek.) In Poetry, the story, fable, or subject treated of in an epic poem.

EPIPOGIUM, ep-e-po'je-um, *s.* (*epi*, and *pogon*, a beard, Gr.) A genus of plants: Order, Orchidaceæ.

EPIPONES, ep-e-po'nes, *s.* (*epiponos*, laborious, Gr.) A genus of Hymenopterous insects: Tribe, Vespidæ.

EPIRRHEOLOGY, e-pir-re-ol'o-je, *s.* (*epirroe*, a flowing on, and *logos*, a discourse, Gr.) A treatise regarding the effects of external agents on living plants.

EPISCHESIS, e-pis-ke'sis, *s.* (Greek.) Retention or suppression of a natural evacuation, as of the urine, or of the menstrual discharge.

EPISCOPACY, e-pis'ko-pa-se, *s.* (*episcopeo*, I inspect, Gr.) Government of the church by bishops; that form of ecclesiastical government in which diocesan bishops are established, as distinct from and superior to priests or presbyters; watch; careful inspection.

EPISCOPAL, e-pis'ko-pal, *a.* Belonging to or vested in bishops or prelates; governed by bishops.

EPISCOPALIA, e-pis-ko-pa'le-a, *s.* Synodals, pentecostals, and other customary payments from the clergy to their diocesan bishops.

EPISCOPALIAN, e-pis-ko-pa'le-an, *a.* Pertaining to bishops, or government by bishops; episcopal; —*s.* one who belongs to an episcopal church, or adheres to the episcopal form of church government and discipline.

EPISCOPALIANISM, e-pis-ko-pa'le-an-ism, *s.* The system of episcopal religion, or government of the church by bishops.

EPISCOPALLY, e-pis'ko-pal-le, *ad.* By episcopal authority; in an episcopal manner.

EPISCOPATE, e-pis'ko-pate, *s.* A bishopric; the office and dignity of a bishop; the order of bishops;—*v. n.* to act as a bishop; to fill the office of a prelate.

EPISCOPICIDE, e-pis-kop'e-side, *s.* (*episcopus*, a bishop, and *cædo*, I kill, Lat.) The killing of a bishop.

EPISCOPY, e-pis'ko-pe, *s.* Survey; superintendence; search.

EPISENIUM, ep-e-se-ne'um, *s.* (*epi*, upon, and *skene*, a scene, Gr.) In ancient Architecture, the upper order of the scene in a theatre.

EPISINUS, e-pis'e-nus, *s.* (*epi*, and *sinis*, a robber, Gr.) A genus of spiders, belonging to the order Pulmonariæ, and family Araneidæ.

EPISODE, ep'e-sode, *s.* (Greek.) In Poetry, a separate incident, story, or action, introduced for the purpose of giving a greater variety to the events related in the poem; an incidental narrative or digression, separable from the main subject, but naturally arising from it.

EPISODIC, ep-e-sod'ik, } *a.* Pertaining to an
EPISODICAL, ep-e-sod'e-kal, } episode; contained in an episode or digression.

EPISODICALLY, ep-e-sod'e-kal-le, *ad.* By way of episode.

EPISOMITE, ep'e-so-mite, *s.* The native sulphate of magnesia; it occurs in crystaline fibres in old coal mines, at Hurlet, near Paisley, and Duntocher, Dumbartonshire, and in the gypsum quarries of Montmartre, near Paris.

EPISPADIAS, ep-e-spa'de-as, *s.* (*epi*, and *spao*, I draw, Gr.) That malformation 'quo utheræ orificium in superiori parte membri verilis apertum est.'

EPISPASTIC, ep-e-spas'tik, *a.* (*epispastika*, Gr.) In Pathology, drawing; attracting the humours to the skin; exciting action in the skin; blistering.

EPISPERM, ep'e-sperm, *s.* (*epi*, and *sperma*, a seed, Gr.) The external pellicle, or proper envelope of the seed of plants.

EPISTATES, e-pis'ta-tes, *s.* (Greek.) The title of the two great councils of the Athenians—namely, the Ecclesia and the Senate of Five Hundred.

EPISTERNAL, ep-e-ster'nal, *a.* (*epi*, and *sternon*, the sternum, Gr.) An epithet applied to the anterior portion of the sternum, which, in birds, sustains the fork-bone.

EPISTEPHIUM, ep-e-ste'fe-um, *s.* (*epi*, and *stephane*, a crown, Gr.) A genus of plants: Order, Orchidaceæ.

EPISTHOTONOS, e-pis-*th*ot'o-nus, *s.* (*episthen*, forward, and *teino*, I bend, Gr.) A spasmodic affection in which the body is bended forward.

EPISTILBITE, ep-e-stil'bite, *s.* (*epi*, and *stilbite*, a mineral, Gr.) A mineral occurring in maculated crystals of a white or yellowish colour. It consists of soda 1.78; silica 58.59; alumina 17.52; lime 7.56; water 14.00; sp. gr. 2.2 to 2.25. H = 4.5.—Localities: Iceland, and Faroe Islands.

EPISTLE, e-pis'sl, *s.* (*epistole*, Gr.) A writing, directed or sent, communicating intelligence to a distant person; a letter; a letter missive.

EPISTLER, e-pis'lur, *s.* A writer of epistles;—(seldom used;)—formerly, one who attended the communion table, and read the epistles.

EPISTOLARY, e-pis'to-la-re, *a.* Pertaining to epistles or letters; suitable to letters and correspondence; familiar; contained in letters; carried on by letters.

EPISTOLIC, ep-is-tol'ik, } *a.* Pertaining to
EPISTOLICAL, ep-is-tol'e-kal, } letters or epistles; designating the method of representing ideas by letters and words.

EPISTOLIZE, e-pis'to-lize, *v. n.* To write epistles or letters.

EPISTOLIZER, e-pis'to-li-zur, *s.* A writer of epistles.

EPISTOLOGRAPHIC, e-pis-to-lo-graf'ik, *a.* (*epistole*, a letter, and *grapho*, I write, Gr.) Pertaining to the writing of letters.

EPISTOLOGRAPHY, e-pis-to-log'gra-fe, *s.* The art or practice of writing letters.

EPISTROPHE, } e-pis'tro-fe, *s.* (*epistrophe*, Gr.) In
EPISTROPHY, } Rhetoric, a figure in which several successive sentences end with the same word or affirmation.

EPISTROPHEUS, e-pis-trof'e-us, *s.* (*epistrepho*, I turn round upon, Gr.) A term applied to the second cervical vertebra, the first turning on it as on a pivot.

EPISTYLA, e-pis'te-la, *s.* (*epistylion*, a pillar, Gr.) A genus of the Helicinæ, or Common Land-snails, the shell of which is very thick, conic, and obtuse; the whorls very numerous; body whorl and aperture small; outer lip thin: Family, Helicidæ.

EPISTYLE, ep'e-stile, } *s.* (*epi*, and *stylos*, a
EPISTILIUM, ep-e-stil'e-um, } column, Gr.) In ancient Architecture, a term used by the Greeks for what is now called the architrave, a massive piece of stone or wood laid immediately on the abacus of the capital of a column or pillar.

EPISTYLIUM, ep-e-stil'le-um, *s.* (*epi*, and *stylos*, a style, Gr.) A genus of plants: Order, Euphorbiaceæ.

EPISYNANCHE, e-pe-sin'ang-ke, } *s.* (*epi*, and
EPISYNANGINE, e-pe-sin-an'ge-ne, } *synanche*, inflammation of the throat, Gr.) Spasm of the pharynx.

EPITAPH, ep'e-taf, *s.* (*epi*, and *taphos*, a tomb, Gr.) An inscription on a monument, in honour or memory of the dead; a eulogy in prose or verse, composed without any intent to be engraven on a monument.

EPITAPHIAN, ep-e-taf'e-an, *a.* Pertaining to an epitaph.

EPITASIS, e-pit'a-sis, *s.* (Greek.) In Rhetoric, the consequent term of a proposition. In the ancient Drama, the progress of the plot.

EPITAXIS, ep'e-tak-sis, *s.* (*epi*, and *staxis*, a dropping, from *stazo*, I distil, Gr.) Bleeding from the nose.

EPITHALAMIUM, ep-e-*th*a-la'me-um, } *s.* (*epithala-*
EPITHALAMY, ep-e-*th*al'a-me, } *mion*, Gr.) A nuptial song or poem made in praise of the bride and bridegroom, and praying for their prosperity.

EPITHELIUM, ep-e-*th*e'le-um, *s.* (*epi*, and *thele*, the nipple, Gr.) The delicate layer which invests the

female nipple, the lips, and other parts destitute of proper epidermis.

Epithem, ep'e-*them*, *s.* (*epi*, and *tithemi*, I place, Gr.) A lotion or other topical remedy, except plasters or unguents; also, the name given by Illiger to the horny appendage which surmounts the beak of certain birds.

Epithema, ep-e-*them*'a, *s.* (*epi*, and *thema*, a root, Gr.) A genus of plants: Order, Gesneraceæ.

Epithet, ep'e-*thet*, *s.* (*epitheton*, a name added, Gr.) An adjective, expressing some real quality of the thing to which it is applied, or an attributive, expressing some quality ascribed to it;—*v. a.* to entitle; to describe by epithets.

Epithetic, ep-e-*thet*'ik, *a.* Pertaining to an epithet or epithets; abounding with epithets.

Epithinia, ep-e-*thin*'e-a, *s.* (*epi*, and *thin*, the sea-shore, Gr. from its growing among mangroves on the sea-shore.) A genus of plants, consisting of Indian shrubs with white flowers: Order, Cinchonaceæ.

Epithumetic, ep-e-*thu*-met'ik, } *a.* (*epithu-*
Epithumetical, ep-e-*thu*-met'e-kal, } *metikos*, Gr.) Inclined to lust; pertaining to the animal passions.

Epitithides, ep-e-ti*th*'e-dis, *s.* (*epitithemi*, I place upon, Gr.) The crown or upper mouldings of an entablature.

Epitome, e-pit'o-me, *s.* (*epitome*, Gr.) An
Epitomy, abridgment; a brief summary or abstract of any book or writing; a compendium.

Epitomist, e-pit'o-mist, *s.* An epitomizer.

Epitomize, e-pit'o-mize, *v. a.* To shorten or abridge, as a writing or discourse; to abstract, in a summary, the principal matters of a book; to contract in a narrower compass; to diminish; to curtail.—Seldom used in the last sense.

We have *epitomized* many particular words, to the detriment of our tongue.—*Addison.*

Epitomizer, e-pit'o-mi-zur, *s.* One who abridges; a writer of an epitome.

Epitragus, ep-e-tra'gus, *s.* (*epi*, and *tragos*, a he-goat, Gr.) A genus of Coleopterous insects: Family, Stenelytra.

Epitrite, ep'e-trite, *s.* (*epitritos*, Gr.) In Prosody, a foot consisting of three long syllables and one short one.

Epitrochlea, ep-e-trok'le-a, *s.* (*epi*, and *trochilia*, a pully, Gr.) A name given by Chaussier to a rounded protuberance on the internal side of the inferior extremity of the humerus.

Epitrope, e-pit'ro-pe, *s.* (*epitrope*, Gr.) In
Epitropy, Rhetoric, concession; a figure by which one thing is granted, with a view to obtain an advantage, as 'I concede the fact, but this admission on my part overthrows the argument you have used.'

Epizeuxis, ep-e-zuke'sis, *s.* (Greek.) In Rhetoric, a figure in which a word is repeated with vehemence, as 'You, *you*, Antony, pushed Cæsar upon the civil war.'

Epizoa, ep-e-zo'a, } *s.* A class of parasitic
Epizoans, ep-e-zo'anz, animals, which particularly infest fishes.

Epizootic, ep-e-zo-ot'ik, *a.* Pertaining to a murrain or pestilence among the lower animals; pertaining to an epizooty.

Epizooty, ep-e-zo'o-te, *s.* (*epi*, and *zoon*, an animal, Gr.) A murrain or pestilence among the lower animals.

Epoch, ep'ok, or e'pok, } *s.* (*epocha*, Lat.) In
Epocha, ep'o-ka, Chronology, a fixed point of time, from which succeeding years are numbered; a point from which computation of years begin; any fixed time or period; the period when anything begins, or is remarkably prevalent.

Epochnium, e-pok'ne-um, *s.* (*epocheo*, I am carried by water, Gr.) A genus of Fungi: Tribe, Hymenomycetes.

Epode, ep'ode, or e'pode, *s.* (Greek.) In Lyric Poetry, the third or last part of the ode; that which follows the strophe and antistrophe, the ancient ode being divided into strophe, antistrophe, and epode. The term is now used as the name of any little verse or verses that follow one or more great ones.

Epomedopteron, e-po-me-dop'te-run, *s.* (*epomadios*, the shoulders, and *pteron*, a wing, Gr.) A genus of Hymenopterous insects: Family, Scoliadæ.

Epomis, e'po-mis, *s.* (*epomaio*, I pursue, Gr.) A genus of Coleopterous insects: Family, Carabidæ.

Epopee, ep-o-pe', } *s.* (*epos*, a poem, and *poieo*, I
Epos, ep'os, make, Gr.) An epic poem; more properly, the history, action, or fable which makes the subject of an epic poem.

Eprouvette, ay-proo-vet', *s.* (French.) An apparatus consisting of a gun or mortar, suspended from a horizontal axis, for the purpose of determining the strength of gunpowder.

Epsom Salt, ep'sum sawlt, *s.* Sulphate of magnesia, formerly produced by boiling down the mineral water of Epsom, but now prepared from sea water.

Epulary, ep'u-la-re, *a.* (*epularis*, Lat.) Pertaining to a feast or banquet.

Epulation, ep-u-la'shun, *s.* (*epulatio*, Lat.) A feasting or a feast.

Epulis, e-pu'lis, *s.* (*epi*, and *oula*, the gums, Gr.) In Pathology, a small tubercle or fungous excrescence on the gum, sometimes between the teeth, which become loosened by it, occasionally becoming cancerous.

Epulose, ep'u-lose, *a.* (*epulus*, Lat.) Feasting to excess.

Epulosity, ep-u-los'e-te, *s.* (*epulositas*, Lat.) Excessive feasting.

Epulotic, ep-u-lot'ik, *a.* (*epulotikos*, Gr.) In Materia Medica, producing cicatrization of a wound or sore.

Equability, e-kwa-bil'e-te, *s.* (*æquabilitas*, Lat.) Equality in motion; continued equality, at all times, in velocity or movement; uniformity; continued equality; evenness or uniformity.

Equable, e'kwa-bl, *a.* (*æquabilis*, Lat.) Equal and uniform at all times, as motion; even; smooth; having a uniform surface or form.

Equableness, e'kwa-bl-nes, *s.* State of being equable.

Equably, e'kwa-ble, *ad.* With an equal or uniform motion; with continued uniformity.

Equal, e'kwal, *a.* (*æqualis*, Lat.) Having the same magnitude or dimensions; being of the same extent; having the same value; having the same qualities or condition; having the same degree; even; uniform; not variable; being in just proportion; impartial; neutral; not biassed; indifferent; of the same interest or concern; just; equitable; giving the same or similar rights or advantages; being on the same terms; enjoying

the same or similar benefits; adequate; having competent power, ability, or means;—*s.* one not inferior or superior to another; having the same or a similar age, rank, station, office, talents, strength, &c.;—*v. a.* to make equal; to make one thing of the same quantity, dimensions, or quality as another; to rise to the same state, rank, or estimation with another; to become equal to; to be equal to; to make equivalent to; to recompense fully; to answer in full proportion; to be of like excellence or beauty. In Botany, applied to petals and sepals when they are equal in size and shape with each other; and to the calyx in Cruciferous plants, when it is without pouches at the base.

EQUALITY, e-kwal'e-te, *s.* (*æqualitas*, Lat.) An agreement of things in dimensions, quantity, or quality; likeness; similarity in regard to two things compared; the same degree of dignity or claims; evenness; uniformity; sameness in state or continued course; plainness.

EQUALIZATION, e-kwal-e-za'shun, *s.* The act of equalizing, or state of being equalized.

EQUALIZE, e'kwal-ize, *v. a.* To make equal.

EQUALLY, e'kwal-le, *ad.* In the same degree with another; alike; in equal shares or proportions; impartially; with equal justice.

EQUALNESS, e'kwal-nes, *s.* Equality; a state of being equal; evenness; uniformity.

EQUANGULAR, e-kwang'gu-lar, *a.* (*æquus*, equal, and *angulus*, an angle, Lat.) Consisting of equal angles.

EQUANIMITY, e-kwa-nim'e-te, *s.* (*æquus*, and *animus*, mind, Lat.) Evenness of mind; that calm temper or firmness of mind which is not easily elated or depressed, which sustains prosperity without excessive joy, and adversity without violent murmurs or bitter repining.

EQUANIMOUS, e-kwan'e-mus, *a.* Of an even, composed frame of mind; of a steady temper; not easily elated or depressed.

EQUANT, e'kwant, *s.* In Astronomy, an imaginary circle, used for determining the motions of the planets.

EQUATION, e-kwa'shun, *s.* In Algebra, a proposition stating the quality of two quantities by placing the sign (=) between them. The general rule for the solution of questions producing simple equations, is to express the unknown quantities by letters, and the relations between the known and unknown, or, as they are called, the conditions, by equations, which, being resolved, give the answer. *Example*:—If the question is concerning two numbers, they may be called x and y, and the conditions from which they are to be investigated must be expressed by equations, thus: If it be required that the sum of two numbers sought be 60, that condition is thus expressed, $x+y=60$. If their difference must be 24, then $x-y=24$. If their product is to be 96, then $xy=96$. If their quotient is to be 6, then $\frac{x}{y}=6$. *Equation of a curve*, an equation expressing the nature of a curve, the relation between an abscis and a corresponding ordinate, or the relation of their fluxions. *Equation of time*, in Astronomy and Chronology, the reduction of the apparent time or motion of the sun, to equable, mean, or true time. In Astronomy, the small connections which must be added or substracted from the results of the simple law, characteristic of all the heavenly motions, are termed equations, as in the equation of time, equation of the equinoxes, equation of the centre, and annual equation. *Equation of payments*, in Arithmetic, finding the time to pay several debts at once, which are due at different dates, and bearing no interest till after the time of payment, so that no loss shall be sustained by the parties making or receiving payment.

EQUATOR, e-kwa'tur, *s.* (*Æquator*, Lat.) A great circle of the terrestrial globe, equidistant from its poles, and dividing it into two equal hemispheres; one north and the other south.

EQUATORIAL, e-kwa-to're-al, *a.* Pertaining to the equator. *Equatorial, universal, or portable observatory*, is an instrument intended to answer a number of useful purposes in practical astronomy, independent of any particular observatory.

EQUERY, ek'kwer-re, or e-kwer'e, *s.* (*ecuyer*, Fr.) An officer of princes, who has the care and management of his horses; a stable or lodge for horses.

EQUES, e'kwis, *s.* (Latin, a horseman.) The name given to the equestrian order among the Romans. The Equites constituted the second degree of nobility, succeeding the senators in point of rank; they required to be possessed of 400 sestertia before being admitted into the order. Each had a horse given and kept at the public charge; as a soldier, he was obliged to serve in the wars, and wore a ring given him by the state.—A genus of fishes, having, as in Umbrina, the snout thick, obtuse, and truncate; caudal fin round and inclined upwards; two dorsal fins, the first short and falcate, the second long; ventral as large as the pectoral; anal very short and oval; fins scaly at the base: Family, Chætodonidæ.

EQUESTRIAN, e-kwes'tre-an, *a.* (*equester*, from *equus*, a horse, Lat.) Relating to horses or horsemanship; performed with horses; being on horseback; skilled in horsemanship; representing a person on horseback; celebrated by horse races; belonging to knights. Among the ancient Romans, the equestrian order was the order of knights, *equites*, also their troopers or horsemen in the field. In civil life, the knights stood contradistinguished from the senators in the field from the infantry. —See Eques.

EQUIANGULAR, e-kwe-ang'gu-lur, *a.* (*æquus*, equal, and *angulus*, an angle, Lat.) In Geometry, consisting of, or having equal angles, applied to figures whose angles are all equal, such as a square, an equilateral triangle, a parallelogram.

EQUIBALANCE, e-kwe-bal'ans, *s.* (*æquus*, and *bilanx*, Lat.) Equal weight;—*v. n.* to have equal weight with something.

EQUICRURAL, e-kwe-kroo'ral, } *a.* (*æquus*, and *crus*,
EQUICRURE, e-kwe-kroor', } a leg, Lat.) Having legs of equal length; having equal legs, but longer than the base; isosceles.

EQUIDIFFERENT, e-kwe-dif'fer-ent, *a.* Having equal differences; arithmetically proportional. *Equidifferent numbers*, in Arithmetic, are of two kinds. 1. Continually equidifferent is when, in a series of three numbers, there is the same difference between the first and the second, as there is between the second and third—as, 3, 6, 9. And 2. Discretely equidifferent is when, in a series of four numbers or quantities, there is the same difference between the first and second as there is

een the third and fourth—such are 3, 6,).

ISTANCE, e-kwe-dis'tans, *s.* (*æquus*, and *dis-* distant, Lat.) Equal distance.

ISTANT, e-kwe-dis'tant, *a.* Being at an equal nce from some point or place.

ISTANTLY, e-kwe-dis'tant-le, *ad.* At the or an equal distance. In Botany, applied to de of vernation, or of arrangement of leaves respect to each other, in which the sides or s alternately overlap each other.

ORMITY, e-kwe-fawr'me-te, *s.* (*æquus*, and *a*, form, Lat.) Uniform equality.

ATERAL, e-kwe-lat'er-al, *a.* (*æquus*, and *late-*, Lat.) Having all the sides equal;—*s.* a exactly corresponding to others.

IBRATE, e-kwe-li'brate, *v. a.* (*æquus*, and , I poise, Lat.) To balance equally two s, sides or ends; to keep even with equal ht on each side.

IBRATION, e-kwe-li-bra'shun, *s.* Equipoise; act of keeping the balance even, or the state ing equally balanced.

IBRIOUS, e-kwe-lib're-us, *a.* Equally poised.

IBRIOUSLY, e-kwe-lib're-us-le, *ad.* In equal .

IBRIST, e-kwil'e-brist, *s.* One that balances lly.

IBRITY, e-kwe-lib're-te, *s.* (*æquilibritas*, Lat.) state of being equally balanced; equal balance oth sides; equilibrium.

IBRIUM, e-kwe-lib're-um, *s.* (Latin.) In hanics, equipoise; equality of weight; the of the two ends of a lever or balance, when are charged with equal weight, and they tain an even or level position parallel to the ion; equality of powers; equal balancing of nind between motives or reasons; a state of ference or of doubt, when the mind is sus- ed in indecision between different motives, or different forces of evidence.

ULTIPLES, e-kwe-mul'te-pls, *s.* (*æquus*, and *plico*, Lat.) Multiples in which equal num- of times are taken: thus 7 times A and 7 s B are equimultiples of A and B; a league a yard are equimultiples of a mile and a foot.

AL, e-kwi'nal, } *a.* (*equinus*, Lat.) Pertain-
E, e'kwine, } ing to a horse, or to the s Equus.

ECESSARY, e-kwe-nes'es-sa-re, *a.* Neces- or needful in the same degree.

OCTIAL, e-kwe-nok'shal, *a.* (*æquus*, and *nox*, t, Lat.) Pertaining to the equinoxes; desig- g an equal length of day and night; per- ng to the regions or climate of the equinoc- line, or equator; in or near that line; per- ng to the time when the sun enters the noctial points; *equinoctial flowers*, flowers open at a regular stated hour;—*s.* in Astro- y, a great circle of the celestial globe, whose poles the poles of the world. It is so called, be- e, whenever the sun comes to this circle, the and nights are equal all over the globe; the same with that which the sun seems escribe, at the time of the equinoxes of g and autumn. All stars directly under circle have no declination, and always rise east and set full west. The hour circles are n at right angles to it, passing through every nth degree; and the parallels to it are called parallels of declination. *Equinoctial colure*, the great circle which passes from the poles of the world through the equinoctial points. *Equinoctial dial*, a dial, the plane of which is parallel to the equator. *Equinoctial line*, same as equator. *Equinoctial points*, the two great points in which the equator and ecliptic cross each other, the one in the first point of Aries, and the other in the first point of Libra.

EQUINOCTIALLY, e-kwe-nok'shal-le, *ad.* In the direction of the equinox.

EQUINOX, e'kwe-noks, *s.* (Latin.) The time when the sun enters either of the equinoctial points, where the ecliptic intersects the equinoctial. Knowing the precise moments, and also the rate of the sun's motion in the ecliptic, it is easy to ascertain the precise point of the ecliptic in which the equator intersected it. By a series of such observations made at Alexandria, between the years 161 and 127 B.C., Hipparchus found that the point of the autumnal equinox was about six degrees to the eastward of the star called Spica Virginis. Eager to determine everything by multiplied observations, he ransacked all the Chaldean, Egyptian, and other records, to which his travels could procure him access, for observations of the same kind; but he does not mention his having found any. He found, however, some observations of Aristillus and Timochares, made about 150 years before. From these, it appeared evident that the point of the autumnal equinox was then about eight degrees east of the same star. He discusses these observations with great sagacity and rigour; and on their authority, he asserts that the equinoctial points are not fixed in the heavens, but move to the westward about a degree in 75 years. This motion is called the precession of the equinoxes, because by it the time and place of the sun's equinoctial station precedes the usual calculations. It is fully confirmed by all subsequent observations. In 1750, the autumnal equinox was observed to be 20° 21′ westward of Spica Virginis. Supposing the motion to have been uniform during this period of ages, it follows that the annual precession is about $50\frac{1}{3}''$; that is, if the celestial equator cuts the ecliptic in a particular point on any day of this year, it will, on the same day of the following year, cut it in a point $50\frac{1}{3}''$ to the west of it, and the sun will come to the equinox 20′ 23″ before he has completed his round of the heavens. Thus, the equinoctial, or tropical year, or true year of seasons, is so much shorter than the revolution of the sun or the sidereal year. The *Vernal equinox* is that intersection of the equator and the ecliptic in which the sun is when about to rise into the northern hemisphere; the *Autumnal equinox* being that in which the sun is when about to sink into the southern hemisphere.

EQUINUMERANT, e-kwe-nu'me-rant, *a.* (*æquus*, and *numerus*, number, Lat.) Having or consisting of the same number.—Seldom used.

EQUIP, e-kwip', *v. a.* (*equiper*, Fr.) To dress; to habit; to furnish with arms, or a complete suit of arms, for military service; to furnish with men, artillery, and munitions of war, as a ship; to fit for sea.

EQUIPAGE, ek'kwe-paje, *s.* The furniture of a military man, particularly arms and their appendages; the furniture of an army or body of troops.

infantry, or cavalry; the furniture of an armed ship, or the necessary preparations for a voyage; attendance; retinue, as persons, horses, carriages, &c.; carriage of state; vehicle; accoutrements; habiliments; ornamental furniture.

EQUIPAGED, ek'kwe-payjd, *a.* Furnished with equipage; attended with a splendid retinue.

EQUIPENDENCY, e-kwe-pen'den-se, *s.* (*æquus*, and *pendeo*, I hang, Lat.) The act of hanging in equipoise; not determined either way.

EQUIPMENT, e-kwip'ment, *s.* The act of equipping, or fitting for a voyage or expedition; anything that is used in equipping furniture; habiliments; warlike apparatus; necessaries for an expedition or voyage.

EQUIPOISE, e'kwe-poyz, *s.* (*æquus*, Lat. and *poids*, weight, Fr.) Equality of weight or force; equilibrium; a state in which the two ends or sides of a thing are balanced.

EQUIPOLLENCE, e-kwe-pol'lens, } *s.* (*æquus*, and
EQUIPOLLENCY, e-kwe-pol'len-se, } *pollentia*, power, Lat.) Equality of power or force. In Logic, an equivalence between two or more propositions, or when two or more propositions signify the same thing, though differently expressed.

EQUIPOLLENT, e-kwe-pol'lent, *a.* Having equal power or force; equivalent. In Logic, having equivalent signification.

EQUIPOLLENTLY, e-kwe-pol'lent-le, *ad.* With equal power.

EQUIPONDERANCE, e-kwe-pon'der-ans, *s.* (*æquus*, and *pondus*, weight, Lat.) Equality of weight; equipoise.

EQUIPONDERANT, e-kwe-pon'der-ant, *a.* Being of the same weight.

EQUIPONDERATE, e-kwe-pon'der-ate, *v. n.* (*æquus*, and *pondero*, I weigh, Lat.) To be equal in weight; to weigh as much as another thing.

EQUIPONDIOUS, e-kwe-pon'de-us, *a.* Having equal weight on both sides.

EQUIREA, ek-we're-a, *s.* (Latin.) In Antiquity, an equestrian festival instituted by Romulus, and celebrated on the 27th February, in honour of Mars.

EQUISETACEÆ, ek-we-se-ta'se-e, *s.* A natural order of Acrogens, belonging to the Muscal alliance of Lindley. The Equiseta are leafless branched plants, with a striated hollow stem, in the cuticle of which silica is secreted to the amount of nearly half their weight when dried; stomates arranged longitudinally on the cuticle; spore cases opening inwards by a longitudinal slit attached to the lower face of peltate scales, which are collected into terminal cones; spores oval, grains wrapped with a pair of highly elastic clavate elaters. The Equisetum is the only genus belonging to the order.

EQUISETIC, ek-we-set'ik, *a.* Pertaining to the Equisetum;—*s. Equisetic acid*, an acid obtained from the plant Equisetum fluviatale, in which it exists in combination with magnesia. It is obtained in small colourless radiating crystals, and is somewhat analogous to tartaric acid.

EQUISETIFORM, ek-we-se'te-fawrm, *a.* Having the form of the Equisetum; resembling the Equisetum, or Horse-tail plant.

EQUISETUM, ek-we-se'tum, *s.* (Latin.) Horse-tail, a genus of plants: Type and only genus of the natural order Equisetaceæ.

EQUISONANCE, e-kwe-so'nans, *s.* An equal sounding; a name by which the ancient Greeks distinguished the consonances of the octave and double octave.

EQUITABLE, ek'kwe-ta-bl, *a.* (French.) Equal in regard to the rights of persons; distributing equal justice; giving each his due; assigning to one or more what law or justice demands; just; impartial; having the disposition to do justice, or doing justice; held or exercised in equity, or with chancery powers.

EQUITABLENESS, ek'kwe-ta-bl-nes, *s.* The quality of being just and impartial; equity; the state of doing justice, or distributing to each according to his legal and just claims.

EQUITABLY, ek'kwe-ta-ble, *ad.* In an equitable manner; justly; impartially.

EQUITANGENTIAL, ek-kwe-tan-jen'shal, *a.* (*æquus*, and *tangent*, Lat.) In Geometry, applied to the tangent of a curve, equal to a constant line.

EQUITANT, ek'kwe-tant, *a.* (*equitans*, Lat.) In Botany, such a situation of unexpanded leaves in a leaf-bud, that they overlap each other entirely, and in a parallel manner, without any involution.

EQUITATION, ek-kwe-ta'shun, *s.* A riding on horseback.

EQUITY, ek'kwe-te, *s.* (*æquitas*, Lat.) Justice; right; impartiality; a just regard to right or claim. In practice, equity is the impartial distribution of justice, or the doing that to another which the laws of God and man, and of reason, give him a right to claim; it is the treating of a person according to justice and reason. In Jurisprudence, the correction or qualification of law when too severe or defective, or the extension of the words of the law to cases not expressed, yet coming within the reason of the law. Hence, a court of equity or chancery, is a court which corrects the operation of the literal text of the law, and supplies its defects, by reasonable construction, and by rules of proceeding and deciding, which are not admissible in a court of law. Equity, then, is the law of reason exercised by the chancellor or judge, giving remedy in cases to which the courts of law are not competent. *Equity of redemption*, in Law, the advantage allowed to a mortgager, of a reasonable time to redeem lands mortgaged, when the estate is of greater value than the sum for which it was mortgaged.

EQUIVALENCE, e-kwiv'va-lens, *s.* (*æquus*, and *valens*, strong, Lat.) Equality of value; equal value or worth; equal power or force;—*v. a.* to counterpoise; to be equal to.—Obsolete as a verb.

Whether the transgression of Eve seducing did not exceed Adam seduced, or whether the resistibility of his reason did not *equivalence* the facility of her seduction, we shall refer to schoolmen.—*Brown.*

EQUIVALENT, e-kwiv'va-lent, *a.* Equal in value or worth; equal in force, power, or effect; equal in moral force, cogency, or effect on the mind; of the same import or meaning; equal in excellence or moral worth;—*s.* that which is equal in value, weight, dignity, or force, with something else. In Chemistry, the proportion in which the various chemical bodies unite, oxygen or hydrogen being assumed as unity. Under the word CHEMICAL is given a table of equivalents, assuming hydrogen as unity. The following comprises Dr. Thomson and Berzelius's table of atomic weights or equivalents:—

THE ATOMIC WEIGHTS OF ELEMENTARY BODIES.

ENTLY, e-kwiv'va-lent-le, *ad.* In an equal

VE, e'kwe-valv, *s.* A bivalve shell, in both valves are equal in size and form;—ing the valves equal.

ACY, e-kwiv'vo-ka-se, *s.* (*æquus*, and *voco*, , Lat.) Equivocalness.—Obsolete.

AL, e-kwiv'vo-kal, *a.* (*æquus*, and *vox*, a Lat.) Being of doubtful signification; that understood in different senses; capable of le interpretation; ambiguous; doubtful; ible of different constructions; not decided; uncertain; proceeding from some unknown cause, or not from the usual cause;—*s.* a word or term of doubtful meaning, or capable of different meanings. In Logic, a word is said to be employed *equivocally*, and called an *equivocal term*, when the middle term is used in different senses in the two premises; or when a proposition is liable to be understood in various senses, according to the various meanings of one of its terms. *Equivocal generation*, a term applied to such species of generation in the animal and vegetable kingdoms, as is supposed by some to take place without seed or sexual intercourse.

EQUIVOCALLY, e-kwiv'vo-kal-le, *ad.* Ambiguously; in a doubtful sense; in terms susceptible of different senses; by uncertain birth; by equivocal generation.

EQUIVOCALNESS, e-kwiv'vo-kal-nes, *s.* Ambiguity; double meaning.

EQUIVOCATE, e-kwiv'vo-kate, *v. n.* (*equivoquer*, Fr.) To use words of a doubtful signification; to express one's opinions in terms which admit of different senses; to use ambiguous expressions;—*v. a.* to render capable of a double interpretation.

EQUIVOCATION, e-kwiv-vo-ka'shun, *s.* Ambiguity of speech; the use of words or expressions that are susceptible of a double signification.

EQUIVOCATOR, e-kwiv'vo-kay-tur, *s.* One who equivocates.

EQUIVOCATORY, e-kwiv'vo-ka-tur-e, *a.* Savouring of equivocation.

EQUIVOKE, e'kwe-voke, *s.* (*equivoque*, Fr.) An ambiguous term; a word susceptible of different significations; equivocation.—An old term, and seldom or never used.

> I know your *equivokes*;
> You're grown the better fathers of 'em o' late.—
> *Ben Jonson.*

EQUIVOROUS, e-kwiv'o-rus, *a.* (*æquus*, a horse, and *voro*, I eat, Lat.) Feeding or subsisting on horse flesh.

EQUULA, ek-u'u-la, *s.* (Latin, a filly.) A genus of fishes, in which the body is short, oval, and often diaphanous; the mouth capable of being projected in the form of a tube, but, when shut, forming an angle on the throat; scales smooth and soft, or wanting.

EQUULEUS, e-ku-ul'e-us, *s.* (Latin, a colt.) A constellation of the northern hemisphere, whose stars, according to Ptolemy and Tycho's catalogues, are four, but in Mr. Flamstead's ten. Also, a kind of rack used by the ancient Romans in extorting confessions. It was orginally practised upon slaves, but, at a later period, it was employed against the Christians. *Equuleus Pictoris*, the Painter's Horse or Easel, a constellation of Lacaille, situated close to Canopus, the principal star in the constellation Argo.

EQUUS, e'ku-us, *s.* (Latin.) The Horse, a genus of quadrupeds, placed by Cuvier in his family Solipedes, and order Pachydermata. Its distinguishing generic characteristics are the possession of six incisors, or cutting teeth, in each jaw, the crowns of which, at an early age, are marked with a fossula; and six molars throughout with a square crown, marked by laminæ of enamel which dip into them, with four crescents, and, in the upper ones, with a small disk in the inner edge. The male has also two small additional canines in the upper, and sometimes in both, which are

almost always wanting in the female. Between these canines and the first molar is an unoccupied space, which corresponds to the angle of the lips where the bit is placed, by which man alone has been able to subdue these powerful and most useful animals. The stomach is simple and moderate in size, but the intestines are long, and the cæcum enormous. The mammæ are situated between the thighs. The species are *E. caballus*, or Common horse; *E. hemionus*, or Tartary horse; it is intermediate between the horse and ass, and lives in troops in a wild state in the deserts of Central Asia; *E. asinus*, the Ass; *E. zebra*, the Zebra, marked over the whole body with elegant black and white stripes; *E. quagga*, or *quaccha*, the Quagga; *E. montana*, the Onagga or Dauw, an African species, smaller than the ass, of a brownish colour, with black stripes, alternately wider and narrower on the head, neck, and body, with the legs and tail white.

ER, the termination of many English words, is the Teutonic form of the Latin *or*, the one contracted from *wer*, the other from *vir*, a man. It denotes an agent, originally of the masculine gender, but now applied to men or things indifferently, as in *hater*, *farmer*, *heater*, *grater*. At the end of names of places, *er* signifies a man of the place, as *Londoner*, a *London man*.

ERA, e'ra, *s.* (*æra*, Lat. *ere*, Fr. *era*, Span.) In Chronology, a fixed point of time, from which any number of years is begun to be counted, as the Christian *era*. It differs from *epoch* in this—*era* is a point of time fixed by some nation or denomination of men; *epoch* is a point fixed by historians and chronologists;—a succession of years proceeding from a fixed point, or comprehended between two fixed points.

ERADIATE, e-ra'de-ate, *v. n.* (*e*, from, and *radio*, I beam, Lat.) To shoot as rays of light; to beam.

ERADIATION, e-ra-de-a'shun, *s.* Emission of rays or beams of light; emission of light or splendour.

ERADICABLE, e-rad'e-ka-bl, *a.* (*e*, from, and *radix*, a root, Lat.) That may or can be eradicated.

ERADICATE, e-rad'e-kate, *v. a.* (*eradico*, Lat.) To pull up the roots, or by the roots; to destroy anything that grows; to extirpate; to destroy thoroughly.

ERADICATION, e-rad-e-ka'shun, *s.* The act of plucking up by the roots; extirpation; excision; total destruction; the state of being plucked up by the roots.

ERADICATIVE, e-rad'e-ka-tiv, *a.* That extirpates; that cures or destroys thoroughly;—*s.* a medicine that effects a radical cure.

ERAGROSTIS, er-a-gros'tis, *s.* (*er*, the spring, and *agrostis*, herbage, Gr.) A genus of plants: Order, Graminaceæ.

ERANARCHA, er-a-năr'ka, *s.* (*eranizo*, I collect contributions, and *arche*, a magistrate, Gr.) A public officer among the ancient Greeks, whose business was to preside over and direct the alms of the poor.

ERANI, er'a-ni, *s.* (*eranoi*, Gr.) Clubs or societies which existed during the Roman empire, for charitable, convivial, commercial, or political purposes.

ERANTHEMUM, e-ran'*the*-mum, *s.* (a name applied by the ancients to their Anthemis, from *er*, the spring, and *anthos*, a flower, Gr.) A genus of plants: Order, Acanthaceæ.

ERANTHIS, e-ran'this, *s.* (*era*, the earth, and *anthos*, a flower, Gr. in reference to the bright yellow blossoms which seem to lie upon the earth.) Winter-aconite, a genus of pretty little tuberous-rooted plants, with divided leaves. The name Winter-aconite is given to it from its time of flowering, and from its leaves resembling those of the aconite: Order, Ranunculaceæ.

NOTE.—We have given G. Don's etymology of the term, but incline to think the true one is the same as is given under Eranthemum—*er*, the spring, from its flowering so early in the year.

ERASABLE, e-ra'sa-bl, *a.* (*e*, out, and *rado*, I scrape, Lat.) That may or can be erased.

ERASE, e-rase', *v. a.* To rub or scrape out, as letters or characters written, engraved, or painted; to efface; to obliterate; to expunge; to blot out; to destroy; to destroy to the foundation. In Heraldry, anything is said to be *erased* which appears forcibly torn off, leaving the edges jagged and uneven.

ERASEMENT, e-rase'ment, *s.* The act of erasing; a rubbing out; expunction; obliteration; destruction.

ERASION, e-ra'zhun, *s.* The act of erasing; obliteration.

ERASMA, e-ras'ma, *s.* (*erasmios*, lovely, Gr.) A genus of plants: Order, Bruniaceæ.

ERASTIAN, e-ras'te-un, *s.* A follower of Erastus, the leader of a religious sect, who denied the power of the church to discipline its members.

ERASTIANISM, e-ras'te-un-izm, *s.* The principles of the Erastians. This sect maintained that the pastoral office was only persuasive. The Lord's Supper, like other ordinances of the gospel, they asserted should be free to all; unworthy applicants were to be reasoned with on the impropriety of their partaking, but in no case refused or censured; the punishment of all offences being referred to the civil magistrate.

ERASURE, e-ra'zhure, *s.* The act of erasing; a scratching out; obliteration; the place where a word or letter has been erased or obliterated.

ERATA, er-a'ta, *s.* (*eratos*, lovely, Gr.) A genus of Mollusca, belonging to the Ovulinæ or Ovules, the shell of which is ovate, more or less angulated, smooth or granulated, with a dorsal scar, short spire, and larger, angulated, emarginated aperture; the pillar slightly crinated; outer lip reflected, and denticulated on the inner. It resembles Marginella, but has no folds on the pillar: Family, Cypræidæ.

ERATO, er'a-to, *s.* (*eros*, love, Gr.) In Mythology, the Muse who presided over lyric and love poetry. She is represented as crowned with roses and myrtle, and holding a lyre in her hand.

ERATOBOTRYS, er-a-to-bot'ris, *s.* (*eratos*, lovely, and *botrys*, a bunch of grapes, Gr.) A genus of plants: Order, Liliaceæ.

ERE, ayr, *ad.* (ær, Sax.) Before; sooner than;—*prep.* before.

EREBUS, e're-bus, *s.* (*erebos*, Gr.) A deity of hell, son of Chaos and Darkness. He married Night, by whom he had Light and Day. Erebus is often used by the poets to signify hell itself, and particularly that part where the souls of the virtuous dwell previous to passing into the Elysian fields. In Zoology, a genus of large Lepidopterous insects: Family, Nocturnæ.

ERECT, e-rekt', *a.* (*erectus*, Lat.) Upright, or in a perpendicular posture; directed upward; upright

and firm; bold; unshaken; raised; stretched; intent; vigorous; extended;—*v. a.* to raise and set in an upright or perpendicular direction, or nearly such; to raise as a building; to set up; to build; to set up or establish anew; to found; to form; to elevate; to exalt; to excite; to animate; to encourage; to extend; to distend; to raise a consequence from premises;—(seldom used in the last sense;)

Malebranche *erects* this proposition.—*Locke.*

To erect a perpendicular, is to set or form one line on another at right angles;—*v. n.* to raise upright;—*a.* in Botany, leaves are said to be *erect* when they form a very acute angle with the stem. The epithet is applied to petioles, flowers, pedicles, or branches, rising in an upright direction.

ERECTABLE, e-rek'ta-bl, *a.* That can be erected.

ERECTED, e-rek'ted, *a.* Aspiring; generous; noble; sublime.—Seldom used as an adjective.

Glory, the reward
That sole excites to high attempts, the flame
Of most *erected* spirits, most temper'd pure
Ethereal, who all pleasures else despise.—*Milton.*

ERECTER, e-rek'tur, *s.* One who erects; one that raises or builds.

ERECTILE TISSUE, e-rek'tile tish'u, *s.* A peculiar tissue described by Dupuytren and Rullier, which is susceptible of erection and active turgescence by an increased flow of blood. This tissue is said to be found in the corpus cavernosa of the penis and clitoris, in the corpus spongiosum utheræ, the nipples, lips, &c. The existence of this tissue is a matter of dispute, it being considered by some anatomists as merely a congeries of blood-vessels largely supplied with blood.

ERECTION, e-rek'shun, *s.* The act of raising and setting perpendicular to the plane of the horizon; a setting upright; the act of raising or building, as an edifice or fortification; the state of being raised, built, or elevated; establishment; settlement; formation; elevation; exaltation of sentiments; act of rousing; excitement; anything erected; a building of any kind; distension and extension.

ERECTIVE, e-rek'tiv, *a.* Setting upright; raising.

ERECTLY, e-rekt'le, *ad.* In an erect posture. *Erectly-spreading*, in Botany, between erect and spreading.

ERECTNESS, e-rekt'nes, *s.* Uprightness of posture or form.

ERECTOR, e-rek'tur, *s.* (*erecteur*, Fr.) In Anatomy, a term applied to the muscles, *E. penis* and *E. clitoris*; also, in Physiology, to designate an organ which, previously flaccid, swells from an accumulation of blood.

ERELONG, ayr-long', *ad.* Before a long time shall elapse; before a long time had elapsed.—Seldom used in the last sense.

The anger already began to paint revenge in many colours, *erelong* he had not only gotten pity but pardon.—*Sidney.*

EREMACAUSIS, er-e-ma-kaw'sis, *s.* (*eremos*, lonely, or tranquil, and *kausos*, burning, Gr.) In Chemistry, the gradual combination of the combustible elements of a body with the oxygen of the atmosphere, as in the change of the elements of wood into the substance called humus, the formation of acetic acid from alcohol, and the production of nitrates of the alkalies. *Eremacausis* differs from fermentation and putrefaction in its requiring the access of atmospheric air; and to its action are owing the changes in colour, consistence, &c., which vegetable juices, saw-dust, and leaves of plants undergo when exposed to the atmosphere. It requires a higher temperature than that of 32 deg. Fahrenheit to enable oxygen to combine in the manner of *eremacausis*.

EREMÆA, er-e-me'a, *s.* (*eremaios*, solitary, Gr.) A genus of plants: Order, Myrtaceæ.

EREMITAGE.—See Hermitage.

EREMITE.—See Hermit.

EREMITICAL.—See Hermitical.

EREMOCARPUS, er-e-mo-kär'pus, *s.* (*eremos*, solitary, and *karpos*, a seed, Gr.) A genus of Composite plants: Tribe, Sesselineæ.

EREMODON, er-e-mo'don, *s.* (*eremos*, solitary, and *odous*, a tooth, Gr.) A genus of moss plants: Order, Bryaceæ.

ERYTHROLEIC ACID, er-e-*th*ro-le'ik, as'sid, *s.* (*erythros*, red, Gr.) A red substance of an oily appearance contained in archil.

ERYTHROLITMINE, er-i*th*-ro-lit'mine, *s.* (*erythros*, red, Gr. and *litmus*.) In Chemistry, a red substance obtained from Litmus. It is sparingly soluble in water, but is soluble in hot alcohol. It dissolves in alkalies with a blue colour. Formula, C^{26}, H^{23}, NO^{18}.

ERYTHRONIUM.—See Vanadium.

ERYTHROPALUM, er-e-*th*ro-pa'lum, *s.* (*erythros*, and *palos*, a shaking, Gr.) A genus of Javanese climbing plants: Order, Cucurbitaceæ.

ERYTHROPHLEUM, er-e-*th*rof'le-um, *s.* (*erythros*, and *fleo*, I flow, Gr. in reference to the red juice which exudes from the tree when cut.) A genus of plants, consisting of the Gregre-tree, or Ordeal-tree, of Sierra Leone, the red juice of which is used as an ordeal by the natives, to detect the guilt or innocence of persons accused of any crime. The juice is taken in large draughts, and those who are not sufficiently strong to withstand its effects are declared guilty, and those who are, are pronounced innocent: Order, Fabaceæ.

ERYTHROPHRYS, er-e-*th*rof'ris, *s.* (*erythros*, and *ophrys*, the eyebrow, Gr.) A genus of birds belonging to the Cuculinæ, or Parasitic cuckoos: Family, Cuculidæ.

ERYTHROPOGON, er-e-*th*rop'o-gon, *s.* (*erythros*, and *pogon*, a beard, Gr.) A genus of Composite plants: Suborder, Tubuliflorœ.

ERYTHRORCHIS, er-i*th*-rawr'kis, *s.* (*erythros*, red, Gr. and *orchis*.) Red orchis, a genus of plants: Order, Orchidaceæ.

ERYTHROSPERMUM, er-e-*th*ro-sper'mum, *s.* (*erythros*, and *sperma*, a seed, Gr. in reference to the red colour of the seeds.) A genus of plants, consisting of smooth shrubs, with small greenish-yellow flowers: Order, Flacourtiaceæ.

ERYTHROSTIGMA, er-e-*th*ro-stig'ma, *s.* (*erythros*, and *stigma*, Gr. the stigmas being red.) A genus of plants: Order, Anacardiaceæ.

ERYTHROSTOMUS, er-i*th*-ros'to-mus, *s.* (*erythros*, and *stoma*, a mouth, Gr.) A genus of birds belonging to the Psittacinæ, or Parrots: Family, Psittacidæ.

ERYTHROXYLACEÆ, er-e-*th*rok-se-la'se-e, } *s.* (*ery-*
ERYTHROXYLEÆ, er-e-*th*rok-sil'e-e, } *throxylon*, the typical genus.) A natural order of hypogynous Exogens, consisting of shrubs or trees with complete and partially symmetrical flowers, which are small, and of a greenish or yellowish colour, having an imbricated calyx; petals five and hypogynous, with an appendage; stamens ten; anthers innate and two-celled; stigmas three and capitate; ovules sessile and pendulous; fruit drupaceous and one-seeded; seed angular. The species are chiefly West Indian and South American. The wood of some of the species is red, and the juice of the fruits of some of the others is of the same colour.

ERYTHROXYLON, er-e-*th*rok'se-lon, *s.* (*erythros*, and *xylon*, wood, Gr.) Redwood, a genus of plants, type of the order Erythroxylaceæ, of which, according to Lindley, it is the only genus.

ERYTHURA, er-e-*th*u'ra, *s.* (*erythros*, and *oura*, a tail, Gr.) A genus of birds belonging to the Coccothraustinæ, or Hardbills: Family, Fringillidæ.

ERYX, e'riks, *s.* In Mythology, the son of Venus and Butes. Relying on his strength, he challenged all strangers to fight with him in the combat of the Cestus. Hercules, after many had yielded to his superior dexterity, accepted his challenge and slew him. In Zoology, a genus of serpents: Family, Colubridæ.

ESSENES, } es-seenz', *s.* A sect among the Jews
HESSENES, } previous to, and during the life of Christ. They lived in communities, had all things in common, and ate at a common table; they were generally agriculturists, kept no slaves, and were abstemious, never taking food till after sunset; they abstained from wine, wore white garments, and generally led a life of celibacy; they sent offerings to the temple, but never offered sacrifices there. No one was admitted into the community without undergoing a probation of three years, and taking an oath to worship and serve God, to love and speak the truth, and not to disclose the mysteries of the fraternity. They were rigid observers of the Sabbath; they believed in the immortality of the soul, but denied the resurrection of the body; they held the Scriptures in great veneration, but considered them as mystic writings which were to be explained metaphorically; they held the doctrine of the predestination of all events. There were two sects in Egypt, the practical Essenes, whose manner of life was the same as that of the Essenes of Palestine, and the contemplative Essenes, called the Therapeutæ, or Healers. It has been supposed that the early Christians derived many of their customs and maxims from this sect; and Mr. Taylor, the editor of Calmet's Dictionary of the Bible, gives many reasons for believing that John the Baptist belonged to it.

ESSENTIAL, es-sen'shal, *a.* (*essentialis*, Lat.) Necessary to the constitution or existence of a thing; important in the highest degree; pure; highly rectified;—*s.* first or constituent principles; the chief point; that which is most important; existence; being.—Seldom used in the last two senses.

ETHAL, e'thal, *s.* In Chemistry, a substance obtained from spermaceti, and susceptible of union with various bases, with which it forms salts. It is fusible at nearly the same point as spermaceti, and on cooling crystalizes in plates.

ETHE, *ethe*, *a.* (*eath*, Sax.) Easy.—Obsolete.

> A fool is *ethe* to beguile.—*Chaucer.*

ETHEL, e'thel, *a.* (Saxon.) Noble.—Obsolete.

ETHER, e'ther, *s.* (*aither*, Gr.) In Chemistry, a highly volatile, fragrant, inflammable, and intoxicating liquid, produced by distilling equal weights of sulphuric acid and alcohol. Formula, C^4, H^5, O; symb. AeO; syn. Sulphuric ether. The different *ethers* are—the acetic, oxalic, chloric, hydriotic, hydrochloric, hydrobromic, sulphuric, methylic, muriatic, carbonic, cyanic, benzoic, and chlorobenzoic.

ETHEREAL, e-the're-al, *a.* Formed of ether; containing or filled with ether; heavenly; celestial; consisting of ether or spirit.

ETHEREALIZE, e-the're-al-ize, *v. a.* To convert into ether, or into a very subtile fluid.

ETHEREOUS, e-the're-us, *a.* Formed of ether; heavenly.

ETHERIA, e-the're-a, *s.* (*etheira*, hair, Gr.) A genus of River Oysters, the shell of which has two muscular impressions: Type of the family Etheridæ.

ETHERIDÆ, e-ther'e-de, *s.* (*etheria*, one of the genera.) River Oysters, a family of Mollusca, in which the shell is irregular, inequivalve, and foliaceous; pearly within; the epidermis of an olive-green colour; and the ligament partly internal and partly external: Family, Ostracidæ.

ETHERIFORM, e'ther-e-fawrm, *a.* Having the resemblance of ether.

ETHERINE, e'the-rin, *s.* In Chemistry, a peculiar carburetted hydrogen, supposed to consist of 4 equivalents of carbon, and 4 of hydrogen.

ETHERIUM, e-the're-um, *s.* In Chemistry, a theoretic carburetted hydrogen, consisting of 4 equivalents of carbon = 24; and 5 of hydrogen = 5.

ETHERIZE, e'ther-ize, *v. a.* To convert into ether.

ETHEROLE, e'ther-ole, *s.* (*aither*, ether, *elaion*, oil, Gr.) Light oil of wine, a colourless oily liquid which boils at 536°, becomes viscid at —13°, and solid at —31°. It is sparingly soluble in rectified spirits, but very soluble in absolute alcohol and ether. When etherole is left for a long time at low temperature it deposits crystals of etherine, which are brilliant, long, translucent, tasteless, friable prisms and plates: soluble in alcohol and ether, but not in water. *Ethero-sulphuric acid*, an acid prepared by passing the vapour of a hydrous sulphuric acid slowly into absolute alcohol kept cold. It consists of two equivalents of sulphuric acid = 80; one of etherine = 28; one of water = 9.

ETHIC, *eth'ik*, } *a.* (*ethicus*, Lat.) Relating
ETHICAL, *eth'e-kal*, } to manners or morals; treating of morality; delivering precepts of morality.

ETHICALLY, *eth'e-kal-le*, *ad.* According to the doctrines of morality.
